OUR EXPERT
Francisco Baeten

ABOUT *BIMvisible*

BIMvisible is an app designed to show technical installations, typically concealed, onto reality with augmented reality, enhancing visibility and interaction. Additionally, it retrieves sensor data linked to these installations, providing real-time insights and control.

BUILDINGS IN OPERATION

Perfect for existing structures, BIMvisible optimizes your operations with remarkable ease and efficiency.

bimvisible.be

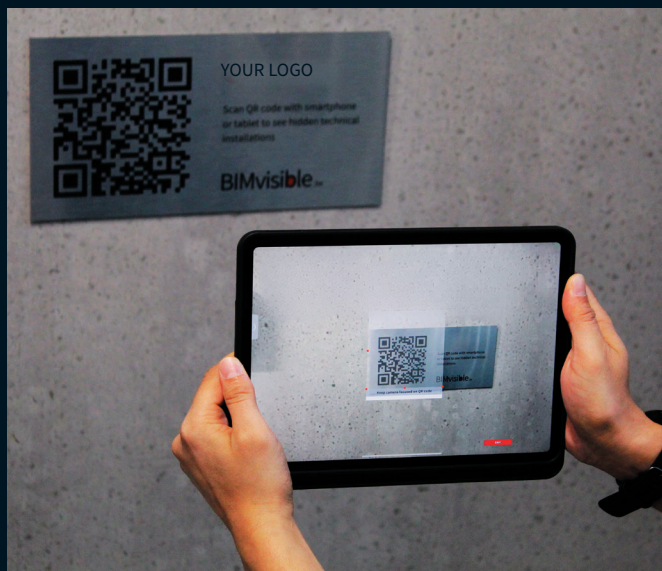

HOW IT WORKS

- Uploading your BIM-model
- Placing virtual markers in model
- Placing physical markers in building
- IoT data integration (optional)
- App installation and use

USER-FRIENDLY

BIMvisible offers intuitive, single-click access to centralized building model data without requiring deep BIM or CAD knowledge, and allows administrators flexible user access control.

"I think this could be a huge step forward for a lot of my colleagues"
