## WHO ARE WE?

PB Safety Consultancy Ltd provides a complete range of health and safety solutions designed to keep organisations, management and the workforce safe.

A flexible approach to Health and Safety with tailored and practical solutions supports clients in achieving Health and Safety legislative compliance.

Established in 2003, we provide pragmatic delivery of CDM and consultancy services. Our team are equally comfortable working on a fully operational construction site as they are attending design meetings and providing safety consultancy services for clients.

We are a Registered Member of the Association for Project Safety, SafeContractor Approved, and OSHCR Registered Consultants, demonstrating our ongoing commitment to high standards of health & safety practices. Our consultants are all experts in their field. They are IOSH Chartered or Tech IOSH Health & Safety Practitioners, and have been specifically selected for their practical and friendly approach, which is key to forming open and honest relationships with clients.

### HEALTH & SAFETY SERVICES

We can provide support in both construction and general health and safety working environments including full CDM and the following:

- Health & Safety Consultancy Service
- Risk and COSHH Assessments
- Construction Site Safety Visits and Inspections
- Method Statements / Risk Assessments
- Construction Phase Plans
- Asbestos Management Survey and Management Plans
- Safety, Health & Environmental Service
- Incident Investigation

SERVICES

# PRINCIPAL DESIGNER

Our Principal Designer service provides clients with a key project adviser covering construction plus health & safety risk management. We will assist with discharging duties, notifying HSE, collecting and identifying pre-construction information, co-ordinating design and planning work.

Our team of fully-qualified and APS-registered Principal Designers deliver the knowledge, experience and resources required. This ensures a successful service delivery to clients, across a variety construction projects.

SERVICES

# FIRE RISK ASSESSMENTS

To take the stress and responsibility away from you, we offer a full range of fire safety services. Fire Risk Assessments are carried out by one of our experienced and qualified Assessors. The assessments are documented in a comprehensive, written report with recommendations in the form of "Significant Findings" and an "Action Plan".

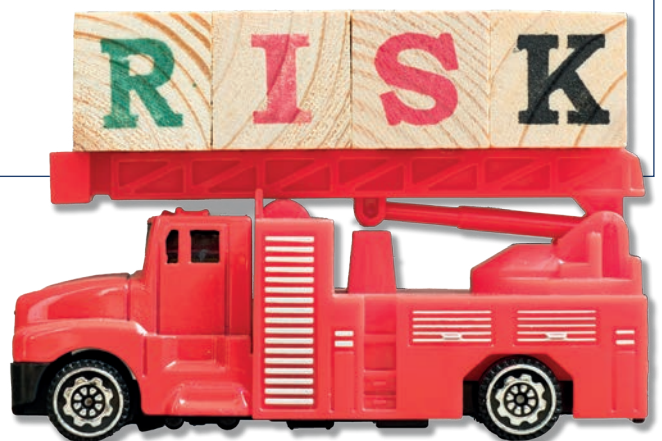

- ✓ Fire Risk Assessments are a legal requirement for all UK businesses and organisations. If you employ five or more people it must be documented and available for inspection.

Under the Fire Safety Order, the aim of a fire risk assessment is to identify the fire hazards; to reduce the risk of those hazards causing harm to as low as reasonably practicable, and to decide what physical fire precautions and management arrangements are necessary to ensure the safety of people in the premises, if a fire does start.

A key pillar of the order is that the responsible person should not only take the appropriate steps to reduce the fire risk, but also be able to demonstrate that they have complied with their duties under the Order.

Before taking any action, the responsible person must make a proper assessment of the risks to which the relevant people are exposed, to identify which measures they must take to comply with the Order. Assessments will depend on the type and function of the property, the users, and the risks associated with that use.

Responsible persons should review regularly their risk assessments to keep them updated and to ensure they reflect any necessary changes.

SERVICES

# SAFETY FILE SYSTEM INDURA SFS

Indura SFS has been designed and specified by a Health & Safety team with a wealth of experience in the construction industry and the production of Safety Files.

## INDURA SFS

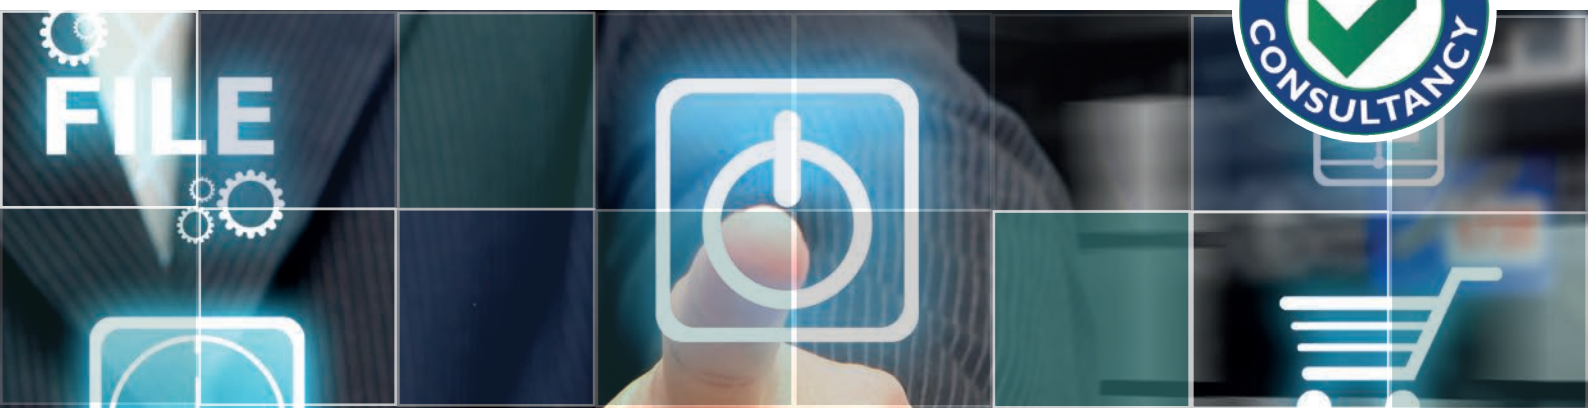

Indura SFS has been designed and specified by a Health & Safety team with a wealth of experience in the construction industry and the production of Safety Files.

The System provides a Regulatory compliant and BIM compatible method \* that is a simple but effective way of recovering information about a construction project, the materials, specifications and suppliers concerned. *\*(In compliance with the new Building Safety Bill, as part of the 'Golden Thread')*

Full searchable access to maintain the building and facilities post-build.

Web-based portal supports the assembly of documents, drawings, specifications and contractors' details.

All in a secure format, with embedded encryption.

SERVICES

# SAFETY & COMPLIANCE TRAINING

We work with our clients to recommend, organise and deliver the training relevant to their needs.

We provide up-to-date compliant training, monitoring, arrange refresher courses and maintain training records.

- Plant and Equipment
- First Aid
- Safety Management
- General and Fire Safety
- Safety Awareness
- Asbestos Awareness and Handling
- Directors' Health and Safety

SERVICES

# ADDED VALUE SAFETY

## AUDITING

Audits are often overlooked by many organisations due to time and resource constraints. We conduct the audit and issue a report on our findings, with recommendations where necessary.

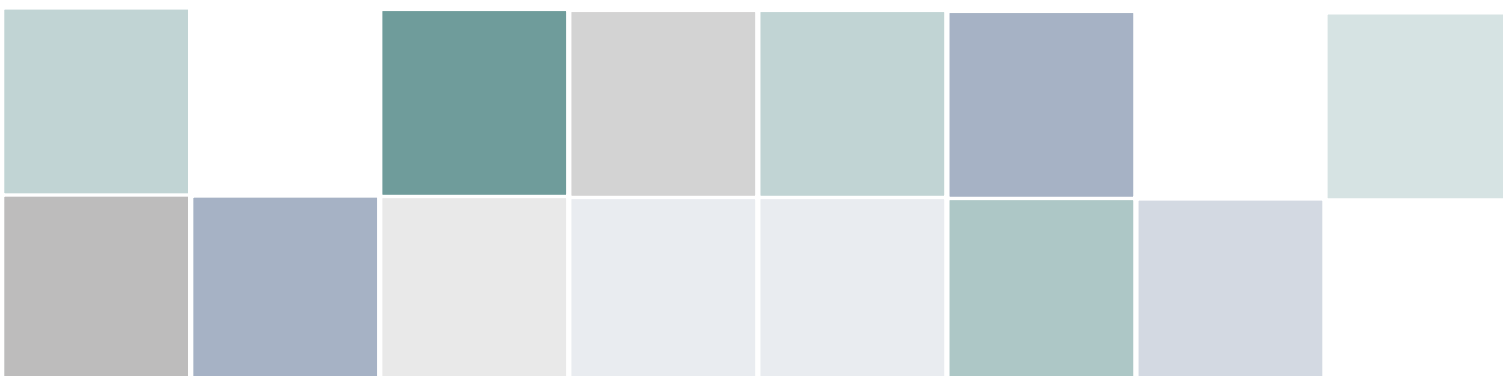

## Accreditation Schemes

Demonstrate that you have the appropriate health & safety management systems in place by completing one of the many Contractor Safety Schemes.

Our consultants are on hand to assist in getting you ready to apply for these accreditations, and with your submissions.

Compliance support for ISO Accreditations such as 45001, 9001 and 18001

CHAS (Contractors Health and Safety Assessment Scheme) registration requires you to have a recognised standard of health and safety management and covers compliance issues regarding your field of work. With our CHAS Application service, we can support contractors of all shapes and sizes - including builders, developers, architects and surveyors - achieve this vital certification and enjoy all the benefits which come with it. We do all the heavy lifting and maximise your chances of approval. We assist you with your CHAS application, or complete it for you leaving you to focus on the day to day running of your business. For more information or a no obligation quote, just call us ...
