Struggling with safety and efficiency on your construction site? Indura's cutting-edge Safety Management Solution (SMS) is here to revolutionise your operations. Developed by seasoned Health & Safety professionals, our SMS ensures compliance, streamlines processes, and boosts site safety.

Indura's Safety Management Solution (SMS) streamlines safety inspections and registers by automating schedules and maintaining real-time records for equipment and personnel. It enhances compliance, reduces paperwork, and ensures all site personnel are informed and up-to-date. With a mobile app for on-the-go access, SMS improves overall site safety and efficiency.

KEY FEATURES

- Streamlined Inductions**
Comprehensive online modules simplify and expedite the induction process for construction workers.
- Automated Compliance**
Digitisation of RAMS, CoSSH submissions, and permits, significantly reducing paperwork and manual processes.
- Real-Time Monitoring**
Instant access to safety statistics, training records, and site updates ensures your construction site runs smoothly.
- Enhanced Safety**
Efficiently track training, certification, and operative details to maintain high safety standards.
- Mobile Accessibility**
Access essential information and updates on the go with our mobile app, directly from the construction site.

Core Features

KEY FEATURES

- ✓ Online inductions
- ✓ Sub-contractor document management
- ✓ Automated inspection schedules
- ✓ Real-time registers
- ✓ Emergency roll call Incident recording
