

# Barnwood

## Case study

**Barnwood Ltd already used several web and app-based applications but wanted a product that would give them access to all the solutions they needed in one product.**

**Nathanael Challacombe, Group HSQE Manager:**

“We particularly wanted a product that would give us analysis and a means to desk top audit.

We already used software to help us with the following things:

- HSQE Audits
- Near miss notifying
- Prestart induction
- Point of Work Risk Assessments
- Web based signing in

**The Compliance Genie wraps these five different Apps into one easy-to-use product.**

We also wanted a system that would link to our internal intranet and with the API in development this will be a possibility.

The team at Be-Safe Technologies have engaged with us from concept and helped us to successfully on-board.

Having a friendly single point of contact has been great and the engaging collaborative approach suits Barnwood.

“The Compliance Genie is paving the way for Barnwood to digitalise our HSQE systems and providing greater visibility for site teams, management and support teams to monitor performance through the dashboards.”  
Nathanael Challacombe

I also like that fact that we can share our ideas with the team at Be-Safe and **The Compliance Genie** is aimed to be tailored to how we work and not have to change our processes and digital forms to a prerequisite set of fields.

Using **The Compliance Genie** we, for example, quickly introduced a Waste Transfer Note system removing the need to order triplicate coloured log books. A simple digital form on **The Compliance Genie** speeds up the process and is accessible to our Plant and Transport department and the HSQE team.

Our ISO Auditors also like the system as the digital records were straightforward to access and a data trail showed how we complied with legislation and ISO standards.”

# Happy Customers

## Customers tell us what they think of The Compliance Genie:

“This App is a game-changer for Alumasc! The fact we can set up paperless inspection documents alone makes it worthwhile - even without all the other great features.”

Aled Lloyd Health & Safety Manager  
The Alumasc Group plc

“By using the Compliance Genie at CRSW I can ensure that everyone is safe, secure and, importantly, more efficient too. As a business owner what more could I ask for?”

Tony Davies Managing Director  
Central Roofing South Wales Ltd

“Put simply - The Compliance Genie has had a massive, and positive, impact on our business from the moment it was introduced. We looked at several other solutions and this was the best - as well as being easy to implement too!”

Jack Musto Senior Estimator  
Haywood Crushing Demolition (HCD) Ltd

“We particularly wanted a product that would give us analysis and a means to desk top audit - and this App allows this and much more! The Compliance Genie wraps all the things we need into ONE App.”

Nathanael Challacombe Group HSQE Manager
