

# KLB Kötztal

## Lacke + Beschichtungen GmbH

**Reactive resin flooring**  
for commercial and industrial areas

**We stand out due to:**

- multi-purpose and high-capacity range of products
- products with highest quality standards: tested systems
- reliable partner
- KLB – research and development-department
- customized solutions
- certified according to DIN EN ISO 9001

# We offer solutions for your success!

Speedy. Flexible. Unconventional. These attributes made KLB Kötztal Lacke + Beschichtungen GmbH to what we are today: a reliable partner with solutions for your success. Since the formation of our company in 1995 we aim for a clearly defined target: we develop and distribute high quality reactive resins for sturdy industrial flooring with specific product features. Our multi-purpose program offers high-capacity flooring, aligned with your demands.

**We are well grounded.  
And beyond that we still prosper.**

Our demand from day one: to improve our products. We search for new ways and enable the impossible. We never lost contact to our customers and we are very flexible when it comes to our customers special needs. Because we know: the strength of a medium-sized company is speedy action and staying close to our customers. This is how we can react on changes. This credo is what lets us grow continuously.

Our family-run business produces flooring for more than 5 million m<sup>2</sup> every year. The foundation for today's efficiency has been laid at the end of the 90's when we moved to Ichenhausen with production, storage and offices. Further expansion is possible for new product research, further development on already existing products and the expansion of our production area. So we may offer the right solution even in the future!

**Our standard - safety  
for men and environment.**

High standards for occupational health and safety environmental protection are essential when working with chemicals. To protect our staff, clients and the environment we keep from using dangerous or problematic materials as well as solvents as far as possible. We aim for even lower emission in ongoing developments. Today we produce products for tomorrows flooring.

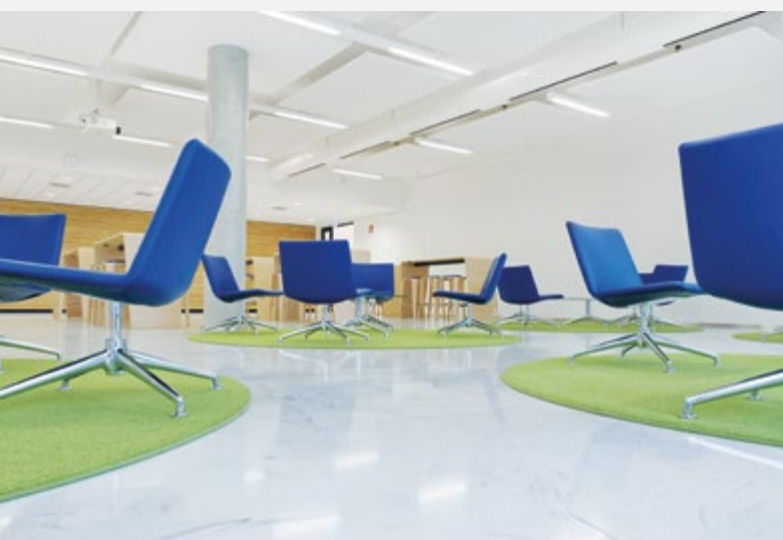

# Our expertise in products - working for you!

We provide coating systems made of:

- epoxy resin
- acrylic resin
- polyurethane
- special resin

Based upon our own recipes, developed in our own laboratories and produced in our own production area we manufacture industrial flooring very thoroughly. This grants a consistent high quality, flexibility in specific product features and assured properties.

### Flooring: made just for you.

Flooring has to meet your demands. Not vice versa. It may not slow down your manufacturing process or your business operation. More than that the flooring with its properties needs to support your business activities. Independent of what branch of business you're in. We offer a wide product range for your specific needs. Flexibility in design, form, colour or structure as well as a wide range of product features will be at your disposal. Slip resistant, flexible at cold temperatures and photostable – everything is possible. We even offer special customized solutions for your needs. Our service for more security: we supply samples for even small amounts.

### Quality without making a compromise.

At KLB Kötztal Lacke + Beschichtungen GmbH quality starts with choosing the raw materials. Because only high quality raw material results in a perfect final product and assures the properties of our products. Throughout the production process we do not accept any loss in quality which is assured by quality control throughout all manufacturing processes.

### Reliability – beyond our products.

Reliability doesn't stop when our product has been delivered. We stay in close contact with our customers for all kinds of questions in regard to all of our products. All of our service features are aligned to supply you with an optimum of flooring. Accordingly our sales representatives and distribution partners are always there for you!

### Our coatings are:

- wear-resistant
  - slip resistant
  - sturdy
  - jointless
  - waterproof
  - electrically conductive
  - resistant to chemicals
  - resistant to humidity
  - crack bridging
  - flexible even at low temperatures
  - water vapour permeable
  - weatherproof
  - photostable
  - abrasion resistant
  - impact resistant
  - decorative
    - glossy to matt
    - pigmented to uncoloured
- and many more.

**Why to choose  
KLB Kötztal:**

- research and development department
- continuously upgrading and enhancing our products
- promptness and quality
- advance in innovation

# New ideas fall on fertile ground!

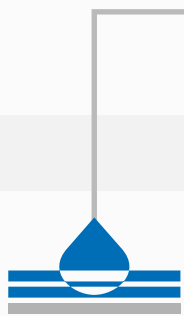

## New developments – optimizing already existing products.

Innovation means the constant pursuit for even more efficient solutions for you. That's why we keep looking for new ideas, keep on developing those, test the results and start from the beginning if necessary. Just until we can be sure that we have developed the best product with the best material possible. We do not rest on our existing products. Continuous testing is guaranteed and is being improved by new technical solutions.

## Advantage by progress.

Highly motivated employees take on the challenge and assure the long-term success with their engagement. They don't lose time, because they know: we can only keep our position on the market with a head start, an advantage in innovation compared to our competitors. You, our customer will benefit from this: the innovative products from KLB Kötztal Lacke + Beschichtungen GmbH support you with the perfect flooring for further developments of your company.
