BRISTLE

Acqua Performante+
blend of synthetic filaments

Specialized paint brush of highest quality level developed and intended for precision and control upon working with acrylic and latex based paints. Characterized by specially developed **Acqua Performante +** bristle blend which contains filaments made of highest quality synthetic materials, balanced perfectly so that the diversity of structure, shapes, production technologies, processing techniques, and softness enables excellent control, superior stroke quality over 100cm length, perfect finish, and easy washing. Unique by its angled design which enables cutting in and working around delicate edges and corners. Contains a high quality ergonomic handle designed for optimal weight distribution in hand and made from European beech wood. The bristle is secured in place by a special epoxy resin based adhesive that ensures no bristle loss upon work.

WOOD

Stain & Varnish

Specialized paint brush developed and intended for sueprior performance upon working with water based and solvent based stains and varnishes. Characterized by a specially developed **Delicato** blend of synthetic filaments which contains small diameter, extremely fine and soft filaments with delicate tops. The properties of the blend, combined with the otpimal volume of bristle ensure a perfectly consistent, smooth, glass like stroke without bristle marks. The bristle is secured in place by a special epoxy resin based adhesive that ensures no bristle loss upon work.

WOOD

Painting

Specialized paintbrush developed and intended for excellent performance with water and solvent based wood paints and coatings. Characterized by a specially developed **Optimo** blend of synthetic filaments which contains a mixture of filaments that enblee superior paint pickup and release performance upon covering large areas of smooth or rough wooden surfaces. Contains a robust and comfortable handle that lays nicely in hand and allows for greater comfort and control upon work. The bristle is secured in place by a special epoxy resin based adhesive that ensures no bristle loss upon work.

METAL

Standard

Specialized paint brush developed and intended for application of oil and solvent based primers, paints and 3/1 paints on metal surfaces. Characterized by a specially developed **Stella** blend of synthetic filaments structured and processed with an intention to enable smooth and consistent stroke without bristle marks, allowing for easy and efficient metal painting with smooth texture finishing. This brush makes metal coating an efficient process with high quality resluts. The bristle is secured in place by a special epoxy resin based adhesive that ensures no bristle loss upon work.

DECORATIVE

Decorative

Specialized paint brush developed and intended for application of structured decorative materials upon interior decorating projects. Contains a special mix of high quality hog bristle and synthetic HIB filaments that combine durability, and pick-up & release properties for optimal performance with materials of different granulation and abrasion properties.Contains a high quality ergonomic handle designed for perfect ergonomy upon decorating and made from European beech wood. The bristle is secured in place by a special polyester adhesive that ensures bristle loss upon work.
