

27 - 29 October 2026

Cape Town International Convention Centre,
Cape Town, South Africa

9am to 5pm daily

Incorporating:

**The biggest packaging show of
it's kind in the Western Cape.**

Theme days

NEW PRODUCTS & INNOVATION

Stay competitive with the latest machinery, products and technologies

SUSTAINABILITY

Practical packaging options to support your sustainability goals

AUTOMATION

Improve efficiency through robotics and automation

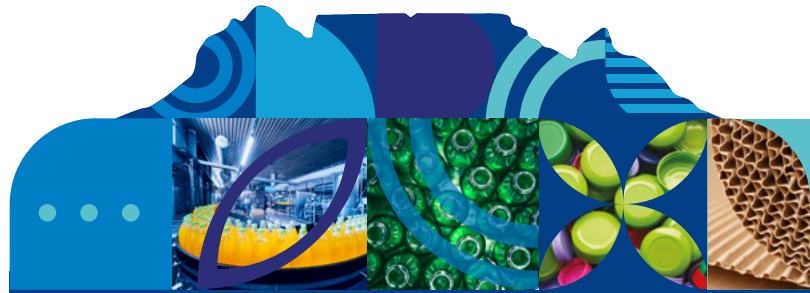

3 DAYS. 3 INDUSTRY FOCUS AREAS.

Each spotlighting the trends, technologies & solutions shaping the future of the industry.

FTASA Print Excellence Awards - 27 October

Royal Cape Yacht Club. **Fully Booked.**

What will you discover at Propak Cape 2026?

With 200+ exhibitors across packaging, plastics, printing, labelling and food processing, there's plenty to see and do at Propak Cape 2026. From live machinery demonstrations and new product launches to practical solutions, expert advice, competitions and show specials, you'll find a wide range of technologies, products and ideas to explore across the show floor.

We've put together a snapshot of some of the activities and attractions taking place at Propak Cape to help you make the most of your visit. Use it to discover what's happening across the show floor, then enjoy exploring the many other products, solutions and experiences on display during your visit.

Icons provide a quick guide to what you can expect from each exhibitor.

Featured Exhibitors

ADROIT TECHNOLOGIES | STAND E74

EXPLORE AUTOMATION TECHNOLOGY FOR FASTER, MORE EFFICIENT PACKAGING

See Mitsubishi Electric Factory Automation technologies designed for faster, smarter and more efficient packaging operations. The showcase includes MELSEC PLCs, GOT HMIs, FREQROL VSDs, MELSERVO servo and motion control solutions, low-voltage power distribution equipment and energy management technologies.

Discover real-time production visibility

Ask how Adroit Software complements the automation showcase

with real-time production visibility, OEE and reporting, and watch SCADA software demonstrations.

Meet the teams behind the technology

Engage with representatives from Mitsubishi Electric Europe B.V. Italian Branch alongside the Adroit Technologies team. The technologies on display support applications across food, beverage, plastics, printing, labelling and processing.

Main sectors: (Automation in all of these) Packaging | Plastics | Processing | Printing | Labelling | Production

ADVANCED PACKAGING TECHNOLOGY | STAND E5

WATCH LIVE FLOW-WRAPPING DEMONSTRATIONS

See LMC's LM650 and LM505 horizontal flow wrapping machines in operation and discuss their capabilities and suitability for specific applications. The LM650 will also be available for purchase.

Explore flexible packaging and plastics machinery

Discover BW Converting's Hudson-Sharp bag and pouch-making machinery, including the Inno-Lok, Ares and Apollo series,

alongside Pearl Technologies' ancillary equipment and punching systems and LaserPin's laser and mechanical systems.

Enter competitions and collect giveaways

Find out about the daily competitions at the stand and giveaways are wrapped using LMC flow-wrapping technology.

Main sectors: Packaging | Plastics

ARMOR-IIMAK | STAND A7

DISCOVER A NEW SOLVENT-FREE THERMAL TRANSFER RIBBON

Discover ARMOR-IIMAK's AWR XL wax ribbon, featuring a 100% solvent-free formulation, including the backcoat, and an ultra-thin 3.35µm PET film. The extra-long roll offers up to 40% more printer uptime, while the technology can result in reduced plastic waste by up to 26% and save 830g of CO₂ emissions per roll.

Explore the thermal transfer ribbon range

See the wider range of ARMOR-IIMAK thermal transfer ribbons, including the inkanto range which combines quality, security, simplicity and longevity.

Main sectors: Printing

ATI SYSTEMS | STAND E65

DISCOVER POSITION-FEEDBACK TECHNOLOGY AND INDUSTRIAL SOLUTIONS

See the latest position-feedback and measurement technologies from ATI Systems, including products being showcased for the first time. Explore rotary and linear speed and position sensors, encoders, magnetostrictive linear transducers, proximity sensors and cable-extension transducers.

See Products Up Close and Discuss Your Applications

Discover stainless-steel electrical enclosures and panels designed for demanding industrial environments, and watch live demonstrations of selected products. Speak to the ATI Systems technical team about your automation, motion control and measurement requirements, and explore solutions from its range of international technology partners.

Main Sectors: Packaging | Plastics | Processing | Printing | Labelling | Production | Other | Mining

AVOCET SCALES AND LABELS (BIZERBA) | STAND F70

EXPLORE INTELLIGENT WEIGHING, LABELLING AND AUTOMATION

See solutions for end-of-line weighing and labelling, inline metal detection and rejection, and automatic wrapping, weighing and labelling. Discover new labelling technology, labels and sustainability developments.

Discover a new Southern African partnership

Learn more about the Bizerba Southern Africa and Avocet Scales & Labels partnership, formed in April 2026, bringing together

Bizerba's weighing, labelling and retail software expertise with Avocet's local market knowledge, service capability and national footprint.

Speak to the teams about connected solutions

Discuss PC-based weighing, labelling and retail software solutions, including cloud-enabled technology, AI-driven object recognition and connected scale platforms, with the Bizerba and Avocet teams.

Main sectors: Processing Equipment (Weighing and Printing) | Printing | Labelling | Production

BECKHOFF | STAND A38

SEE XPLANAR TECHNOLOGY IN MOTION

Watch XPlanar and other Beckhoff Automation innovations in moving demonstrations. See PC-based control and EtherCAT technology in operation and discover how it delivers speed, precision and resource-efficient control for packaging machines and processes.

Ask the technical team

Bring your technical questions and design ideas to the local Beckhoff team and discuss how PC-based control and EtherCAT technology can be applied to packaging automation.

Main sectors: Packaging | Plastics | Processing | Printing | Labelling | Production

BMPE | STAND C76

GET AN EARLY LOOK AT A NEW CLIPPING MACHINE

See the Lorenzo e-BBK 90 Clipper, a new machine not yet formally launched. Visit the stand for an early look!

Meet the experts behind the technology

Meet technical experts from BMPE's European partner brands, ask

questions and learn more about the technology and operation of the five machines on display: the Kerres Universal System, NOMA/Nowicki Bowlcutter, Finova Slicer, Frimaq Vacuum Packer and Lorenzo e-BBK 90 Clipper.

Main sectors: Processing | Packaging

BUSCH VACUUM SOLUTIONS | STAND B45

DISCOVER TWO NEW PRODUCT LAUNCHES FROM BUSCH

Be among the first to discover two new products from Busch at Propak Cape 2026.

Busch R5 KD0050 Oil Rotary Vane Pump

Explore the new Busch R5 KD0050 oil rotary vane pump, designed specifically for tabletop packaging machines, alongside the new KL pumps, which combine a compact size with high performance.

Busch Vacuum Manager Software

See the official market launch of Busch Vacuum Manager, PC software developed for Busch ECOTORQUE products. Discover

how its guided interface simplifies commissioning, monitoring and optimisation of ECOTORQUE-equipped vacuum solutions, turning multiple parameter settings into one straightforward setting and a single activation control.

See Busch Vacuum Technology in Action

Watch a tabletop food-packaging machine operating with a Busch R5 oil-lubricated rotary vane vacuum pump, demonstrating the pump's role in the packaging process. Video presentations will also explain vacuum generation principles and compare technologies.

Main sectors: Packaging | Plastics | Processing | Production

CBMS CONVEYOR SOLUTIONS | STAND A75

EXPLORE CONVEYOR COMPONENTS AND POWER TRANSMISSION PRODUCTS

Discover CBMS's range of plastic modular belts, conveyor components, case conveyor chains, transmission chains, SMC pneumatics and TechTop electric motors.

Discuss your requirements with the CBMS team

Speak to the team about conveyor components, bearings, power

transmission products and custom-engineered solutions for packaging, food processing, manufacturing and other industrial applications. Ask about technical support, conveyor audits and product recommendations for your operation.

Main sectors: Packaging | Processing | Production | Other

FILMATIC PACKAGING SYSTEMS | STAND B16

GET A FIRST LOOK AT A NEW LABELLING MACHINE

Discover Filmatic's newly developed labelling machine, being introduced to manufacturers at Propak Cape 2026!

See Filmatic's packaging machinery in action

Watch live demonstrations of selected machines and see packaging technology in action. The showcase includes entry-level and semi-automatic fillers, a high-speed piston filler, tub filler, rotary self-adhesive labeller, roll-fed labelling technology and a robotic palletiser.

Discuss your packaging requirements

Speak to Filmatic's technical and sales specialists about your production and packaging requirements, and explore the machinery on display.

Ask about our product giveaways

Stop by Stand B16 for product giveaways available throughout the show.

Main sectors: Packaging | Labelling | Production

GOLDPACK | STAND A51

EXPLORE PACKAGING TECHNOLOGY FROM WEIGHING TO LOAD SECURING

Discover Goldpack's packaging solutions for fresh produce, food and FMCG, from weighing and flow-wrapping to coding, bag closure and end-of-line packaging.

See strapping technology in operation

Watch a strapping machine running at the stand and speak to the Goldpack team about packaging applications and equipment to suit your requirements.

Explore bag closure and strapping technology

Discover Kwik Lok bag-closure solutions and GroupMosca strapping and end-of-line packaging systems, including locally manufactured polypropylene strapping.

Discover weighing, wrapping and coding solutions

Explore Newtec weighing technology, automated packaging from JASA and Gillenkirsch, Fuji Machinery flow-wrapping systems, and Squid Ink coding and marking technologies.

Main sectors: Packaging | Processing | Printing

GREENTECH PLASTICS MACHINERY | STAND B55

DISCOVER THE LATEST IN PLASTICS PROCESSING

See equipment from motan, HB-Therm and Tantec on the stand. Explore technologies spanning injection moulding, extrusion, blow moulding, recycling, automation, material handling, temperature control, cooling, surface treatment, printing and mould handling.

Meet the brands behind the technology

Discover GreenTech Machinery's portfolio of international brands, including ENGEL, WINTEC, motan, swift, HB-Therm, Frigel,

battenfeld-cincinnati, BBM, NGR, TAMPOPRINT, Tantec, Moldo Plastico and EAS

Talk to the team about your production needs

Meet the GreenTech team and technology partners to discuss solutions for your operation, including technologies designed to improve productivity, energy efficiency and process performance.

Main sectors: Plastics | Processing

MOLENAAR | STAND C10

SEE TUNNEL PASTEURISATION WITH DYNAMIC PU CONTROL

Visit Molenaar to discover its recently launched tunnel pasteurisation technology with Dynamic PU Control, designed for the cider and beer industry. The system automatically adjusts temperatures in individual tunnel zones during production stoppages to help prevent over-pasteurisation and maintain the required pasteurisation level.

Talk to the Team About Your Production Needs

Find out how Dynamic PU Control can help improve product quality and consistency, reduce waste and support more efficient beverage production. Meet the Molenaar team to discuss your requirements and explore the technology.

Main sectors: Packaging | Processing

IGUS | STAND F60

SEE LOW-COST AUTOMATION IN ACTION

Watch a delta robot and XY linear gantries simulate pick-and-place applications, including picking fruit from a conveyor and packing it.

Get hands-on with new 3D-printed can twisters

See and handle the new 3D-printed can twisters, available to touch and feel at the stand.

Main sectors: Packaging | Plastics

INDISOL | STAND F14

VIEW THE MO-180 OBJECT PRINTER IN ACTION

Watch a live demonstration of the MO-180 UV flatbed printer. See how it produces high-definition graphics, fine details and textures directly onto objects, with an optional attachment for printing on cylindrical items.

Explore the VG4-540 eco-solvent printer

See the VG4-540 from the VG4 Series, combining high-quality eco-solvent printing with integrated contour cutting. Find out how improved ink efficiency and easier maintenance support day-to-day production.

Main sectors: Packaging | Printing | Labelling | Other

INDUSTRIAL-TECH | STAND C57

SEE NEW FLOW-WRAPPING MACHINES

Get a first look at GNA and Delta Engineering's newly launched vertical and horizontal flow-wrapping machines.

Explore packaging and plastics processing technology

Visit Industrial Tech's information stand to view product samples and brochures for equipment specialising in pharmaceutical

packaging equipment, plastic processing equipment and Automation.

Main sectors: Packaging | Plastics Processing

INTEGRATED AIR SOLUTIONS (IAS) | STAND C50

DISCOVER RECENTLY LAUNCHED PRODUCTS

See recently launched products from Integrated Air Solutions (IAS) and discover the latest additions to its compressed air offering.

Compressed air and air treatment solutions

Speak to IAS specialists about compressed air requirements

for food and beverage, packaging, manufacturing and industrial applications. Explore solutions designed to improve system efficiency and reliability, reduce operating costs and support production demands.

Main sectors: Processing | Other

ISHIDA | STAND D1

NPS AND ISHIDA TO UNVEIL SOMETHING NEW AT PROPAK CAPE 2026

NPS and Ishida are bringing something exciting to Propak Cape 2026! Visitors are invited to explore the latest in packaging technology, weighing, inspection and complete line solutions. Be among the first to discover their latest innovation.

Join the unveiling at 14:30 on 27 October at the NPS and Ishida stand as they reveal what they've been working on. As part of their continued commitment to innovation and helping manufacturers improve production efficiency, this is an opportunity to see what's new. You won't want to miss it!

Main sectors: Packaging | Processing | Production

KHS MANUFACTURING (SOUTH AFRICA) | STAND D10

EXPLORE THE LATEST BEVERAGE PRODUCTION AND PACKAGING TECHNOLOGIES

Discover the latest technologies including the InnoPET BloFill, SmartCan Eco system and Innocheck TSI inspection solution. The showcase will also feature the CSM Nitro-Infused Beverage solution and the latest developments in filling, packaging, inspection and end-of-line processes. Find out how these technologies can support efficient production and resource conservation.

Discuss your beverage production requirements

Speak to KHS experts about complete production lines or individual

machines for water, beer, soft drinks, juice, wine and dairy products. Explore solutions for PET bottle production, filling and capping, inspection, can packaging, labelling, conveying and digitalisation, and discuss ways to improve line efficiency and support more sustainable production.

Main sectors: Packaging | Processing | Production | Filling | Beverage technology | PET technology | Canning | Labelling | Inspection | Palletising | Conveying | Digitalisation | Service and line optimisation

KUBEPAC – OXYGEN ABSORBERS | STAND E59

DISCOVER O'BUSTER OXYGEN ABSORBERS

Find out more about O'BUSTER Oxygen Absorbers at the KubePac stand. Designed for use with products such as biltong, bakery goods, coffee, nuts and dried fruit, these provide an additional option for manufacturers looking at packaging solutions that extend product shelf-life, preserve quality and reduce food waste.

Explore processing and packaging solutions

Speak to the KubePac team about your production and packaging

requirements. Explore machinery and solutions for filling, sealing, labelling, coding and marking, as well as equipment for food, beverage, pharmaceutical and cosmetic manufacturing applications.

Main sectors: Processing | Packaging | Other

LOGISTICS SYSTEMS ENGINEERING (LSE) | STAND D64

SEE LSE'S 6-WAY SHUTTLE OFFICIAL LIVE LAUNCH!

Be among the first in South Africa to see Logistics Systems Engineering (LSE) launch its 6-Way Shuttle, part of its Multi-Directional Shuttle Range, operating live at Stand D64 throughout Propak Cape 2026.

Designed to move pallets in multiple directions within an automated storage and retrieval system, the 6-Way Shuttle opens new possibilities for high-density warehouse storage and intelligent pallet movement.

Watch the technology in action and discover how multi-directional movement can support high-density storage, operational flexibility,

scalability and system redundancy.

Bring your warehouse challenges to LSE

The showcase goes beyond the launch. LSE specialises in the design, supply and implementation of warehouse storage and automation solutions across South Africa and Africa. Speak to the team about your operational requirements, from storage capacity and throughput to accessibility and future expansion.

Bring your warehouse layouts, capacity challenges or plans for a new facility to Stand D64 and explore how a different approach to warehouse automation could work for your operation.

Main sectors: Processing | Production | Other

MONITOR ENGINEERING | SPRAYING SYSTEMS | STAND C39

WATCH LIVE TANK CLEANING TECHNOLOGY IN ACTION

Don't miss the live tank cleaning demonstration at the Monitor Engineering | Spraying Systems Co. stand. See spray technology in action and discover solutions designed to support efficient, hygienic tank cleaning while reducing water, chemical and energy use.

Explore spray technology for food processing

Explore how spray technology is used across food processing operations for applications including coating, spray drying, cleaning, tank washing and lubrication. Speak to the team about your specific requirements and how the right spray technology can help meet performance goals while supporting food safety and sustainability.

Main sectors: Processing | Production

MULTIVAC SOUTHERN AFRICA | STAND A28

SEE MULTIVAC MACHINERY IN ACTION

Visit the MULTIVAC stand to see one of its machines running and discover its range of processing and packaging solutions. Speak to the team about equipment for thermoforming, tray sealing, vacuum packaging, flow wrapping, labelling and inspection, as well as automation solutions for integrated production lines.

Discuss your processing and packaging requirements

Explore solutions for food and other industries, with options designed to support product protection, hygiene and production efficiency. Visitors can also find out more about MULTIVAC's offering of packaging films and pouches, alongside processing and portioning equipment from its partners Handtmann and Tipper Tie.

Main sectors: Packaging | Processing

NPP | STAND F18

DISCOVER NEW PAPER SOLUTIONS FOR PACKAGING AND LABELLING

Learn about UPM Specialty Materials' new and recently launched paper solutions through product samples, demonstrations and informative displays. See and feel different paper grades, and discover how advanced barrier papers provide grease, moisture and oxygen protection for packaging applications, while supporting recyclable, fibre-based alternatives.

Explore paper options for your packaging needs

View UPM's range of high-performance papers for packaging and labelling, with properties including printability, grease and moisture resistance. Learn how barrier and barrier-base papers can offer alternatives to fossil-based packaging materials, and speak to the team about material options and customised solutions for your specific applications.

Main sectors: Packaging

NORTHFIELD ENGINEERING | STAND F31

SEE THE LATEST IN CRANE TECHNOLOGY

Visit Northfield Engineering to see its **brand-new** UD Quester 440 Twin Steer, recently fitted with a FASSI F905R.2.9-HXP TECHNO knuckle boom crane. This is the first crane-truck in South Africa to be equipped with a knuckle boom crane from Italian manufacturer FASSI's new TECHNO range.

A key feature is the crane's X-Design boom construction, which combines a ten-sided profile with ultra-high-strength steel to improve structural rigidity and vertical lifting performance. The crane has a maximum lifting capacity of 22 tonnes and a horizontal outreach of approximately 30 metres.

Meet the Northfield Engineering team

Speak to Northfield's engineers and heavy machine moving and rigging specialists about its three core areas of expertise: rigging and machine moving, process pipe installations and fluid transfer. The team will be available to share technical advice, practical insights and experience gained across these specialised fields.

Main sectors: Rigging & Machine Moving | Process Pipe Installations | Fluid Transfer

PALIAN | STAND C5

TAKE THE PALIAN PICKING CHALLENGE

Put your picking skills to the test at the Palian stand! Running throughout the exhibition, the Palian Picking Challenge invites visitors to select boxes from a carton-flow display for a chance to win prizes. Experience how the system automatically moves the next box forward, helping to keep products accessible for efficient picking.

Explore warehouse storage solutions

Discover how Palian designs and manufactures warehouse

storage systems for demanding operational environments. Explore adjustable pallet racking, pick tunnel and carton-flow systems, timber and wire-mesh decking, and palletised storage through practical displays and project visuals. Speak to the team about solutions tailored to your warehouse requirements, from initial design and local manufacture through to installation, with a focus on space utilisation, picking efficiency, product accessibility and warehouse safety.

Main sectors: Manufacturing

PANTONE | STAND B82

DISCOVER 224 NEW PANTONE COLOURS AT PROPAK CAPE

Step into a world of bold, unapologetic colour at the Pantone stand! Explore the latest expansion of the Pantone Matching System (PMS), featuring 224 new colours. Say goodbye to stark minimalism and hello to vibrant nostalgia, citrusy yellows and mystical purples designed to spark joy and creativity.

See the new shades first-hand in the updated Formula Guide, Colour Bridge and Solid Chips Set. Immerse yourself in dynamic colour displays and discover fresh inspiration for your next design project.

Main sectors: Packaging | Plastics | Processing | Printing | Labelling | Production | Other

PETCO PRODUCER RESPONSIBILITY ORGANISATION NPC | STAND F21

EXPLORE HOW PACKAGING IS RECYCLED WITH PETCO

See samples illustrating the recycling of PET plastic bottles and liquid board packaging, and discover how these materials can be recovered and recycled.

Supporting South Africa's packaging recycling value chain

Petco is a Producer Responsibility Organisation (PRO) that works with its members to support the collection and recycling of packaging in South Africa. Its work includes supporting the

recycling value chain, encouraging packaging design that considers recyclability, developing markets for recycled materials and raising awareness of recycling. Visit the stand to learn more about Petco's role in promoting responsible packaging management and a circular economy.

Main sectors: Packaging | Other - Producer Responsibility Organisation

PKG GROUP | STAND A20

DISCOVER SHIFT: DIRECT-TO-PRODUCT PRINTING

Explore PKG Group's latest innovation, Shift: direct-to-product printing, and discover new possibilities for product branding and decoration. Visit the stand to find out more about this approach to product presentation and see how it could open up new opportunities for packaging design.

Explore plastic packaging and circular solutions

Discover a diverse range of plastic packaging products from across PKG Group's businesses, showcasing solutions for multiple

industries. A dedicated sustainability display will highlight the journey from material recovery and recycling through to the creation of new products. Meet the team to explore the group's packaging capabilities and learn more about its approach to practical, innovative and sustainable packaging solutions.

Main sectors: Packaging | Plastics | Production

POLYOAK PACKAGING | STAND B32

EXPLORE SUSTAINABLE PACKAGING SOLUTIONS AT POLYOAK PACKAGING

Celebrating 45 years as a proudly South African packaging company, Polyoak Packaging invites visitors to Stand B32 to explore its innovative range of packaging solutions and see new products showcased through live demonstrations.

Discover award-winning PET wine bottles, lightweight stackable drums, recycled-content buckets, new-design tethered closures,

retort-able plastic tubs, and home and personal care packaging in generic and customer-exclusive designs. Find out more about Polyoak's packaging technologies and solutions, and how the company is addressing sustainability through its products and environmental initiatives.

Main sectors: Packaging | Plastics | Printing | Labelling | Production

PROTOFILL | STAND G68

SEE THE NEW ROTARY PACKAGING MACHINE IN ACTION

Be among the first to see the launch of a new rotary machine for the food packaging industry. Watch a live demonstration of this

newly engineered model and explore its design, precision and performance in operation. Visit the stand to experience the latest in food packaging technology first-hand.

Main sectors: Packaging | Processing | Production

PYROTEC | STAND B12

SEE PACKAGING AND PRODUCTION TECHNOLOGY IN ACTION

Visit the Pyrotec stand for live demonstrations and a closer look at solutions for today's production environments. See the SmartDate X65, F250 Fibre Laser, 5940 G, NBI Machine, Checkweigher with TIJ, robotics, ALbelt with SPH and more in action, with the 9710 also on display.

At the PackMedia counter, explore a range of labels, cartons, product inserts and merchandising solutions. Speak to the team about solutions tailored to your packaging and production needs.

Main sectors: Packaging | Printing | Labelling | Production

QUALIPAK | STAND A1

DISCOVER QUALIPAK'S NEW SPIRAL CONVEYOR TECHNOLOGY

Visit Qualipak to discover its new spiral incline/decline conveyor featuring side-drive technology. Designed with a focus on ease of maintenance and minimising belt stress, the system offers an innovative approach to product movement in processing and production environments.

Explore Integrated Processing Solutions

Specialising in solutions for the food and beverage processing industries, the company offers an end-to-end service encompassing concept design, manufacturing, installation and commissioning. Speak to the team about your processing requirements and explore solutions tailored to your operation.

Main sectors: Processing | Production

QUIX SCS | STAND F2

SEE QWIX SOFTWARE SOLUTIONS IN ACTION

Watch short, live demonstrations of three solutions from Qwix's stack of software solutions:

- **Qwix Warehouse Management System (WMS):** See a picking demonstration using Qwix's rugged, Android-native WMS, designed for complex warehouses to eliminate paper bottlenecks and picking errors.
- **Qwix Electronic Proof of Delivery (EPOD):** Watch a customer door-delivery demonstration featuring sign-on-

glass functionality. Discover how EPOD helps secure the last-mile logistics chain, eliminate paperwork and speed up invoicing cycles.

- **Qwix Manufacturing Execution System (MES):** See how the system supports picking and verification against a Bill of Materials, bridging the gap between enterprise planning and the factory floor through real-time Work in Progress tracking.

Main sectors: Supply Chain & Logistics Software

REA SA / STAND D32

FOLLOW THE MARKING AND CODING JOURNEY – AND WIN!

Experience marking and coding in action at the REA SA stand, where live demonstrations will use wine bottles to illustrate real-world applications throughout the production process. Take a bottle of Ken Forrester wine through all four marking stations, from label creation and primary marking to secondary marking and end-of-line coding, and enter the competition with a chance to win one of five REA JET printing systems for your company.

Watch technologies operating live

See REA JET, REA LABEL, REA LASER and REA VERIFY technologies operating live, with technical experts on hand to

answer your questions. GS1 South Africa will also share insights into 2D codes, Digital Product Passports and evolving traceability standards.

Discover Flexible End-of-Line Box Marking

See custom-made end-of-line box marking solutions, designed for manufacturers handling a variety of produce and different-sized corrugated boxes. Find out more about flexible marking options for changing packaging requirements.

Main sectors: Packaging | Plastics | Printing | Labelling | Production

RESILUX / STAND E8

SEE THE LATEST IN PET PACKAGING SOLUTIONS

Explore recently launched products and discover PET bottle solutions for carbonated beverages, still drinks and non-food applications. Find out how bottles developed to precise weight and composition specifications can deliver the functionality and sustainability profile your product requires.

Experience Specialist PET Bottle Technologies

Find the latest PET packaging solutions featuring oxygen, CO₂,

UV and light barriers, as well as hot-fill and refill options. Speak to the team about your product's specific requirements and how different barrier types and formulations can help protect product quality and maintain taste.

Main sectors: Packaging | Plastics

RJE GROUP / STAND B41

WATCH LIVE DEMONSTRATIONS AND ENTER TO WIN

Visit the stand for live demonstrations and the chance to take part in competitions and lucky draws. Discover solutions for processing, manufacturing and industrial environments, and speak to the team about your operational requirements.

Discuss Solutions for Your Operation

Explore how the right equipment and solutions can support

reliability, efficiency, hygiene and continuity of operations. Meet the team to discuss your requirements and learn more about their approach to delivering complete solutions and building lasting customer relationships.

Main sectors: Processing | Production | Other

RM INDUSTRIAL AUTOMATION / STAND F55

DISCOVER NEW MACHINE CAPABILITIES FOR RECYCLABLE PACKAGING

Visit RM Industrial Automation to explore a new series of machines and the latest capabilities for recyclable packaging. Discover options for integrating new equipment into production lines, with complete turnkey solutions as well as retrofits to adapt existing machines for recyclable packaging requirements.

Explore Solutions for Your Production Line

Speak to the team about your packaging and production needs, from new machine installations and integrated systems to upgrades of existing equipment.

Main sectors: Packaging | Production

SGI INDUSTRIES / STAND A9

VIEW NEW FOOD AND FRESH PRODUCE PACKAGING

Explore new products and a wide range of packaging for the food and fresh produce markets. Discover punnets for grapes, strawberries and stone fruit, as well as trays for meat packaging.

Find a range of Packaging for Your Products

See the range of standard and custom-made packaging,

including tubs, trays, punnets and clamshell containers for fresh produce, alongside bowls, containers and microwavable options for prepared foods. With packaging made from recycled material also available, SGI Industries offers options for fruit packers, food processors, retailers and other food businesses. Speak to the team about packaging suited to your products and requirements.

Main sectors: Packaging | Plastics | Processing | Production

SIRIUS ENGINEERING / STAND C53

EXPLORE FOOD MANUFACTURING ENGINEERING SOLUTIONS

Discover how Sirius Engineering brings food manufacturing projects to life through master planning, process engineering, hygienic facility design and project management.

Plan for Growth and Future Expansion

Meet the team to discuss your facility requirements and explore how strategic planning and tailored engineering solutions can support your production needs, business growth and future expansion.

Main sectors: Consulting Project Engineers & Project Managers

SLONITEC / STAND D20

DISCOVER ASEPTIC BAG-IN-BOX FILLING TECHNOLOGY

Visit SloniTec to discover its Aseptic Bag-in-Box Filler and the aseptic processing technology behind it. Designed for liquid products that require extended shelf life at ambient temperatures, the technology can help reduce the need for refrigerated storage and transport.

Explore Applications for a Wide Range of Products

See how aseptic filling can be used for juices and concentrates,

fruit and flavour preparations, sauces, ketchup, soups, dairy products, liquid sugar, honey and other liquid ingredients. Benefits include flexible packaging sizes, protection against oxygen and UV exposure, and the potential to achieve extended shelf life without preservatives or refrigeration, depending on the product and process. Speak to the SloniTec team about your product and processing requirements.

Main sectors: Processing

SPECIALISED PRINTING PRODUCTS / STAND A66

WATCH A LOCALLY MANUFACTURED HOT FOIL STAMPING MACHINE IN ACTION

See a locally manufactured manual hot foil stamping machine, recently launched and on display at the stand. Visitors can also request a live demonstration to see the machine in action and explore its capabilities.

Explore Best-Before Coding Printers and Consumables

See a range of budget-friendly online BEST BEFORE coding printers, along with coding consumables. Also speak to the team to find out more about the company's thermal printing heads for the most popular Thermal Transfer Overprinter brands on the market in South Africa.

Main sectors: Packaging | Printing | Labelling

STARRATE HEALTHCARE / STAND B43

EXPLORE HEALTHCARE AND PHARMACEUTICAL SOLUTIONS

Discover Starrate Healthcare's range of healthcare and pharmaceutical solutions, including advanced spray delivery systems designed to support dosing precision, performance and reliability across a range of applications.

Discover Specialist Chemicals and Laboratory Products

Explore products from Advent Chembio, of which Starrate

Healthcare is the exclusive South African representative. The range includes fine chemicals, pharmaceutical impurities, laboratory reagents, reference standards and specialty chemicals. Speak to the team about your product requirements and discover solutions for pharmaceutical, healthcare, research and laboratory applications across Southern Africa.

Main sectors: Packaging

STM RIDUTTORI SOUTH AFRICA | STAND A57

EXPLORE GEARBOX AND MOTOR SOLUTIONS

Discover gearboxes and motors for packing, processing machines and equipment from STM Riduttori South Africa, the official South African distributor of STM Team products. Offering high-quality gearbox and motor solutions for packaging and

processing equipment, with reliable options to suit a wide range of applications.

Main sectors: Gearboxes and motors for packing, processing machines and equipment

SUPPLYWISE | STAND D48

SIMPLIFY YOUR BUSINESS PROCUREMENT WITH SUPPLYWISE

Discover how Supplywise helps businesses source products from multiple categories through one convenient procurement platform. From industrial equipment and safety products to material handling, storage and workplace essentials, explore options for a wide range of business needs.

Meet the team to discuss your requirements, find suitable products and learn how Supplywise can assist with quotations, orders and procurement to make sourcing simpler and more efficient.

Main sectors: Packaging | Production | Other

TETRA PAK | STAND E3

SUSTAINABILITY PRESENTATION: GROWING SOUTH AFRICA'S CARTON COLLECTION AND RECYCLING ECONOMY

How can carton waste become a valuable resource? Join Masale Manoko, Head of Sustainability for Tetra Pak Sub-Saharan Africa, to explore opportunities to grow South Africa's carton

collection and recycling economy and turn waste into valuable raw materials.

Date: Tuesday, 27 October 2026

Time: 14:30–15:00

Venue: IPSA Seminar Theatre

TETRA PAK | STAND E3

DISCOVER INNOVATION ACROSS PROCESSING, PACKAGING AND SERVICES

Hear how Tetra Pak is more than packaging, with integrated end to end food and beverage solutions that span processing, packaging and services. Explore the innovations that help customers improve efficiency, quality and competitiveness across their operations. Find the latest processing technologies, digital solutions and packaging developments designed to meet the evolving needs of producers and consumers. Uncover how Tetra

Pak's services can help optimise performance and costs, while supporting long-term business growth.

Explore Sustainability and Local Capabilities

Learn more about Tetra Pak's work to advance a circular economy for carton packaging through local recycling initiatives, manufacturing capabilities and a resilient supply chain serving Southern Africa.

Main sectors: Packaging | Processing | Production

TRANSPACO & FUTURE PACKAGING & MACHINERY | STAND D6

UNVEILING TWO NEW END-OF-LINE PACKAGING SOLUTIONS

Visit Transpaco & Future Packaging to discover two new products: a Power Pre-Stretch Pallet Wrapping Machine, designed to maximise film yield and load stability, and a Paper Void Fill Dispensing Machine, new to the South African market.

See End-of-Line Packaging Equipment in Action

Watch the Automatic L-Sealing Shrink-Wrapping Line in action

and explore a selection of end-of-line packaging equipment and consumables. With applications spanning industries from agriculture and e-commerce to cellular, the team will be on hand to discuss your packaging requirements and showcase its wider product range.

VR PRINT / STAND A60

DISCOVER NEXT-GENERATION LABEL INNOVATIONS

Explore a new generation of label technology at VR Print, including Augmented Reality Labels, Audible QR Codes designed to improve access to information for visually impaired patients, Glow-in-the-Dark Labels, RFID technology, 3D Holographic Labels and innovative 3-ply, 5-panel Peel & Read Labels. See these innovations up close and discover new possibilities for packaging, product information and brand engagement.

Launching a New Online Ordering Platform

Discover VR Print's new online ordering platform, designed to

streamline the customer experience, simplifying repeat ordering and providing convenient access to previous orders and order history.

Also explore its wider range of specialised print and packaging solutions, from self-adhesive, peel and read, booklet and extended-content labels to flexible packaging, shrink sleeves and security labels. Speak to the team about label formats, finishes and materials suited to your product and application.

Main sectors: Packaging | Printing

WD HEARN MACHINE TOOLS / STAND D19

EXPLORE THREE ADVANCED INDUSTRIAL TECHNOLOGIES

See plastics manufacturing in action with the NPC 72 Ton Injection Moulding Machine. Featuring servo-hydraulic technology, a bi-metallic screw and advanced controls, it is designed for reliable, efficient plastics production.

Discover precision 3D scanning with the Scanology NimbleTrack 3D Scanning System. Capturing up to 4.9 million

measurements per second, it supports applications including reverse engineering, quality control and digital manufacturing.

Explore high-precision laser marking with the Glory Star GS-FM 30M Fibre Marking Laser. See how fibre laser technology can provide fast, permanent marking for product identification, branding and traceability across a wide range of materials.

Main sectors: Plastics | Processing | Production

ZIBO CONTAINERS / STAND A12

DISCOVER NEW PACKAGING EQUIPMENT FOR SMALLER BUSINESSES

Be among the first to discover Zibo Containers' new packaging equipment, launching at Propak Cape 2026! Designed specifically for smaller retail stores and businesses, the equipment will help retailers achieve a more premium, professional packaging finish while keeping equipment investment and operating costs low. Speak to the team about how it could suit your business.

Explore Sustainable Packaging Solutions

Discover Zibo Containers' packaging concepts focused on recyclability, sustainability and practical alternatives to traditional packaging materials. Find out more about solutions designed to support the objectives of South Africa's Extended Producer Responsibility (EPR) regulations.
