OUR STORY

PASSIONATE ABOUT OLIVES

Olive Lucarelli is an Italian company located in Rocca Massima, Lazio, a region in central Italy, which has been operating in the olive sector since 1949. For over 70 years our company has been specialized in the production and distribution of table **olives**, but also **lupin beans**, capers and vegetables preserved in oil.

Passion is what has driven us for years to cultivate our lands, rich in culinary history, and to market the fruits of our love for the territory, handing down the passion from father to son.

We process about 18 cultivars (olive varieties) with different methods (Castelvetrano, Sevillian, Natural and Baked). The company is a major player in the industry, specializing in the production and distribution of **GAETA PDO BLACK OLIVES**, **ITRANA BLACK OLIVES**, **ITRANA GREEN OLIVES**, and **LUPINS FROM LAZIO REGION**.

The company owns about 2,600 trees dedicated to the production of olives and 30 hectares of land intended to produce lupins, while also procuring products from local producers.

Lupins have the potential to become a leading product as a healthy and protein-rich snack, aligning with current consumer preferences.

The company is currently launching a dedicated research project on cultivating **Calcidica trees**, with the goal of commercializing their fruits.

The company covers an area of 20,000 square meters, 8,000 square meters of which are covered and allow a storage capacity of about 15,000 quintals. The production capacity is of 200/250 quintals per day with a production staff of over 35 people.

Lucarelli company stands out for its flexibility as its major strength is customization: our company can provide customized solutions to fulfill specific requests of different target markets.

Olive Lucarelli is **IFS** and **BRC FOOD** certified, and it is registered with **US FDA** and achieved **PDO recognition** for 'GAETA OLIVE', olive variety native of Lazio region.

The company collaborates with renowned brands in the Italian **RETAIL SECTOR** and exports to several international markets, mainly in **Europe** and the **United States**.

Olives

HEALTH BENEFITS OF OLIVES

CARDIOVASCULAR BENEFITS OF OLIVES

Free radicals oxidise LDL cholesterol. When this happens, blood vessels are damaged. As a result, fat continues to accumulate in the arteries increasing the risk of a heart attack. The large quantities of **antioxidants present in olives** (polyphenols, beta-carotene, vitamin E) prevent this process.

NATURAL IBUPROFEN

Another interesting property of olives is that they are rich in polyphenols. Among polyphenols, a particular molecule named "oleocanthal" has been recently identified. This substance is said to act as a natural analgesic and therefore has **anti-inflammatory properties**.

SKIN WELL-BEING

The **vitamin E** contained in olives also has many other properties. For example, it nourishes, moisturises and protects the tissues, thus prevents skin diseases and protects the skin from ultraviolet radiation.

SOURCE OF IRON

Olives are also an excellent source of minerals. They have a good amount of **calcium, potassium, magnesium and sodium**. They are also particularly **iron-rich**.

PRODUCTION & SUSTAINABILITY

GREEN ENERGY FROM SOLAR PANELS

Lucarelli Alferino SRL has always paid great attention to **hygiene and health regulations** in its 3000 square metres of warehouses built embracing the philosophy of **eco-sustainability**. It is indeed among the first structures in Italy to have used **photovoltaic energy** in order to reduce environmental impact.
