

FISH AND SEAFOOD

fresh, processed,
and frozen

pescado y marisco

GARCIDEN

The best offer of fresh and processed **GARCIDEN** fish

This offer is valid and exclusive for the receiving company and/or individual, and should not be sent to any other recipient.

GARCIDEN is a panish company with over 25 years in the market. The company comprises various lines of business, enabling it to address a wide range of needs. Currently, **GARCIDEN** is active in the food industry as well as in the logistics and road transportation sector.

AD Pescado y Marisco is the brand through which GARCIDEN markets fresh, processed, and frozen fish and seafood. In the logistics sector, ADLOGISTICS is the brand that provides transportation and distribution

services for goods by road at both national and European levels, handling both its own and third-party cargo.

The company's core principles revolve around product quality, service accuracy, social responsibility, and environmental respect. With the commitment and involvement of over 500 professionals, **GARCIDEN** plays a leading role in the domestic and international markets where it operates.

PHILOSOPHY

We **SELECT**

the finest products to meet the quality needs of each of our clients and the markets where we operate.

We **CONTROL**

each and every process by applying stringent quality standards.

We **COMMERCIALIZE**

fresh, processed and frozen products of the highest quality, always adhering to the food safety regulations required by our certifications.

We **COMMIT**

ourselves to the environment and social responsibility because the **SEA** and **PEOPLE** are the future of a global world. Our commitment leads us to select only suppliers with sustainable fishing techniques, as is the case with the Dolphin Safe label, which we require with every purchase. We use 100% recyclable trays and strive to close the waste management cycle sustainably, along with generating energy for our consumption, a significant portion of which is produced through our solar panel parks.

BUREAU VERITAS
Certification

FISH LINE

AD Pescado y Marisco is the division of GARCIDEN responsible for the selection, processing, and marketing of fresh, frozen, and processed products of the highest quality.

The sustainable fishing policy implemented in this area ensures that the captured species come from suppliers who promote the sustainability of the species, their regeneration, and the preservation of their natural habitat.

AD Pescado y Marisco directly purchases from areas such as the Algarve, the Gulf of Cádiz, Málaga, Granada, Almería, and the Region of Murcia.

PRODUCTS

LOGISTICS

We distribute nationally and internationally with our extensive fleet of over 208 tractor units, 223 trailers (50 of them multi or dualtemperature), isotherms, and rigid vehicles. **We provide** real-time 24/7 tracking 365 days a year. **We ensure the delivery** of products in the best conditions, strictly adhering to the cold chain.

INNOVATION, FOOD SAFETY, AND QUALITY

GARCIDEN has its own laboratory equipped with some of the most innovative and precise scientific instrumentation, including a ion chromatograph for histamine determination, a direct mercury analyzer, and a heavy metal detector for internal control of all processes involved in the food safety certification of all our products. We ensure compliance with all quality standards and certifications related to food, so that our customers receive the best products with full assurance.

We invest in innovation in all our processes. We have precise and specific machinery that allows us to produce and tailor our products to the needs of each customer. Our processing rooms undergo rigorous food control, safety, and cleaning processes, ensuring full compliance with all food safety regulations that certify us.

RESPECT AND COMMITMENT
For a sustainable future
