Chocolat MADAGASCAR

Depuis 1940

Great choice

Multi-awarding winning Chocolat Madagascar's luxury single origin chocolate range includes white, milk, dark and extra bitter chocolates, plus their delicious vegan 'milk' chocolate, which is made with cashews. The brand also produces a selection of organic cocoa powders, cocoa nibs and cocoa beans coated in chocolate.

LOCAL SOURCING

Chocolat Madagascar products are grown locally and sustainably, with the whole manufacturing process conducted locally too. Exporting world class chocolate from Madagascar creates a greater economic benefit for the Malagasy people than only exporting the cocoa.

NATURE'S FLAVOURS

By growing the fine cocoa in a rainforest environment, Chocolat Madagascar are creating a sustainable and growing haven for the endangered animals and fauna of Madagascar.

Due to the unique rainforest soil and climate environment, the cacao speciate and develop their own unique fruity flavour profile. Subsequently, Chocolat Madagascar don't need to chemically manipulate and enhance or even add flavours to their dark and milk chocolates. When they do need to add an emulsifier, they only use sunflower lecithin.

Chocolat Madagascar won the prestigious Golden Bean Award in 2017 & 2020 and Shining Bright Award 2020.

UNIQUE TERROIR

The brand's finest rare terroir cacao is grown in the north west and east coast of Madagascar. The unique rainforest, soil and climate have allowed the cacao to develop its own unique fruity flavour profile.

ON-SITE

Unlike most chocolate factories, Chocolat Madagascar's factory is very close to the cocoa plantations, which means they're able to craft and optimise the fermented and dried cocoa into chocolate in a matter of days. This ensures that the fresh flavours and quality of the chocolate are preserved, whilst also boosting the local economy and funding investment in wider social benefits.

DARK CHOCOLATE COUVERTURE

Chocolat Madagascar
