DISCOVER THE TASTE OF AUSTRALIA'S FINEST CRAFT BEER

Heritage - Over 160 Years!

Coopers Brewery has a rich heritage as a family run brewery since 1862 when Thomas Cooper began brewing in Adelaide. Now, six generations later, the Coopers family continues to brew Australia's iconic craft ales, seeing Coopers grow from a niche South Australian beer, to an iconic Australian and World favourite.

For The Love Of Ale!

Coopers remains the only major brewer in Australia that is 100% Australian owned. 1 in 4 ales consumed in Australia is a Coopers Ale. Coopers Original Pale Ale is the only ale in the Top 10 Beers in Australia by volume, with the rest being lagers.

All Natural Ales

Coopers beers achieve their unique flavour and cloudy appearance through a process called natural conditioning. To achieve this, a small amount of live yeast is added to the beer just before packaging. This causes a secondary fermentation inside the bottle which naturally carbonates the beer and eliminates the need for preservatives or additives. This combination of using an original recipe blended with modern techniques, delivers a unique, forever original experience.

This Is How We Roll...

For the full Coopers experience, roll the bottle or can before opening. This helps the sediment move through the beer, unlocking its full flavour and cloudy appearance.
