SmartFoodSafe

A Smart Investment In Technology For Safer Food

Food Safety, Quality, Traceability & Regulatory Management Software Solution

Farm to Fork Solutions | Audit Readiness | Cost Effective | Positive ROI

SmartFoodSafe
Digitalize Food Safety

OVERVIEW

The landscape of food safety is constantly evolving due to the availability of information, research, investigation findings from food recalls, social media influence, and regulatory enforcement. Modern consumers are increasingly conscious of their expectations regarding food safety, demanding greater transparency, and social media amplifies awareness of food safety incidents.

ABOUT US

Transforming the World of Quality and Food Safety with Smart Software Solutions

In today's digital age, technology has become an integral part of almost every aspect of our lives. One area that's seeing a significant shift toward digitalization is quality and food safety management. Smart Food Safe is a leading and innovative software company specializing in providing state-of-the-art technology solutions for businesses to excel in Quality, Food Safety, Regulatory, and Traceability management. With a strong focus on empowering organizations, Smart Food Safe Software offers a comprehensive suite of customizable modules designed to streamline processes, ensure regulatory compliance, enhance product quality, and enable real-time visibility into operations.

Improve compliance, bring process efficiency and digital transparency to the growing food supply chain needs

01 OUR MISSION

Our mission is to revolutionize quality and food safety management through intelligent software solutions, ensuring compliance, and protecting consumer well-being. We strive to empower businesses with affordable and user-friendly tools, streamlining processes and promoting transparency, while driving industry-wide advancements in food safety practices.

02 OUR VISION

Our vision is to be the global leader in smart technology solutions for quality and food safety management, driving industry-wide transformation towards enhanced transparency, traceability, and compliance. We aim to empower businesses of all sizes, promoting a safer and sustainable food ecosystem while building trust and fostering collaboration across the supply chain.

03 OUR GOAL

Our goal is to provide businesses with innovative software solutions that optimize quality and food safety management, leading to safer products and improved regulatory compliance. By streamlining processes, enhancing traceability, and promoting sustainable practices, we aim to help businesses achieve operational excellence and build consumer trust in the global food ecosystem.

UPCOMING MODULES

Our goal is to provide businesses with innovative software solutions that optimize quality and food safety management, leading to safer products and improved regulatory compliance.

By streamlining processes, enhancing traceability, and promoting sustainable practices, we aim to help businesses achieve operational excellence and build consumer trust in the global food ecosystem.

INDUSTRIES WE SERVE

Smart Food Safe offers modular solutions that can be used independently or seamlessly integrated across multiple modules, making them versatile and applicable to various industry sectors. With tailored functionality for quality control, traceability, compliance management, and operational optimization, our solutions empower businesses to streamline processes, achieve regulatory compliance, improve product safety, and excel in their respective industries.

- Hospitality
- Food & Beverage
- IT Services
- BIOTECH
- RETAIL
- Warehousing

- Agriculture & Farming

SMART TECHNOLOGIES

ARTIFICIAL INTELLIGENCE

We are working to leverage artificial intelligence to proactively prevent food safety issues by analyzing data from diverse sources, including IoT devices, machine vision, and machine learning techniques

MACHINE LEARNING

Smart Food Safe aims to utilize machine learning to analyze data collected from various sources in the food supply chain, offering real-time predictions for food safety and quality compliance

INTERNET OF THINGS

We partner with leading Iot vendors making IoT devices by integrating our software for smart compliance of quality and food safety parameters

PREDICTIVE ANALYSIS

Proactively identify potential risks and quality issues with predictive analysis capabilities in our software to enable timely interventions and ensure safer, higher-quality food products

CLOUD COMPUTING

Our software models are hosted on regional customer clouds for secure and reliable data access worldwide without sacrificing performance or service level

BLOCKCHAIN

Our Blockchain solutions can allow any company to store and verify food safety and quality compliance transactions in the most transparent way

Cash-Wa Distributing

" The simplicity of the software combined with the outstanding customer service experience has significantly enhanced our organization of SQF documents while streamlining the entire auditing process..."

Emily Kornell *(QA Coordinator)*

Jasper Wyman & Son

" We have found the software to be very user friendly & intuitive which makes implementation & acceptance by users much easier..."

Shannon Fickett *(Director of Quality Assurance)*

Tippin's Gourmet Pies,

" We chose SFS over other systems because of the variety of modules available that allow us to streamline & digitize our Food Safety and Quality Management system. The platform is built with an auditor mindset & functions ...."

Morgan Baker *(Quality Manager)*

Rogers Poultry Co.

" SFS has given our company the ability to expand and grow by taking our Food Safety to the next level. With customers pushing for GSFI certifications, we were lost in the huge requirements to keep our GSFI Food Safety plan up to date."

Brett Butler *(GFSI and HACCP Coordinator)*

Gidney Fisheries

" Gidney Fisheries is in onboarding process now, the reason for selecting them is the platform they are providing which is designed for the food industry sector as well as their approach and commitment towards service..."

Chandan Sharma *(Quality Control Manager)*

IE Hospitality and Dry Storage

" The software is intuitive & extremely flexible & has been great match for our business even though we are using it for both food manufacturing and restaurant applications. ..."

Mara King *(Director of Fermentation, Mill Gen.Manager)*

Daybreak

" Smart Food Safe has brought my food safety program into the digital world. The full support you need to create, manage, and thrive with your food safety program. This software is the future of food safety programs...."

Kieran McKeown *(General Manager)*

Cozy Harbor Seafood Inc.

" We opted to go with the Smart Food Safe platform after researching multiple food safety platforms. Prasant and the onboarding team have been very responsive, and we are excited to get the system up and fully running...."
Kevin Burnsteel *(Quality Assurance Manager)*
