- Production and transit lead-times **are not included** in timelines below. Please refer to commercial guidelines for further detail.
- Total estimated product development lead-time from customer approval, Generic Cases: **5 weeks** – Custom Cases: **8 weeks**

A Natural Source of Energy

A single 60 ml (1/4 cup) serving of 100% pure and natural maple syrup:

- Meets 72% of daily nutritional requirement for manganese, 27% for riboflavin, 17% for copper, and 6% for calcium.
- Contains a wide range of vitamins and minerals, amino acids, phytohormones, and insulin, which acts as a probiotic that encourages the growth of “good” bacteria in the gut.
- Has 67 polyphenols, 9 of which are unique to it. One of these polyphenols, called Quebecol, appears naturally when sap is boiled to produce maple syrup.

Nutrition Facts		Valeur nutritive	
Per 1/4 cup (60 mL)			
pour 1/4 tasse (60 mL)			
Calories 220		% Daily Value*	
		% valeur quotidienne*	
Fat / Lipides 0 g			0 %
Carbohydrate / Glucides 55 g			
Sugars / Sucres 48 g			48 %
