

natuzon

AMAZON FLAVORS

# Our story

In 2023, açai natuzon was founded by the Lamoia Group, the largest company in the frozen desserts sector in Espírito Santo, Brazil. Its mission is to bring the authentic Açai to both the domestic and international markets, preserving the nutritional properties and the exotic flavor of the most delicious fruit of the Amazon rainforest. Our production facility for the European market is located in Italy, specifically in Rovereto (TN), amidst the splendid scenery of Trentino Alto Adige. Natuzon is built on the principles of Balance and Respect. Balance that we cultivate with nature, the communities we collaborate with, and the customers we serve. Respect for the environment and the cycles through which Nature provides us Açai berries. The fruits are selected to meet the needs of the most discerning customers.

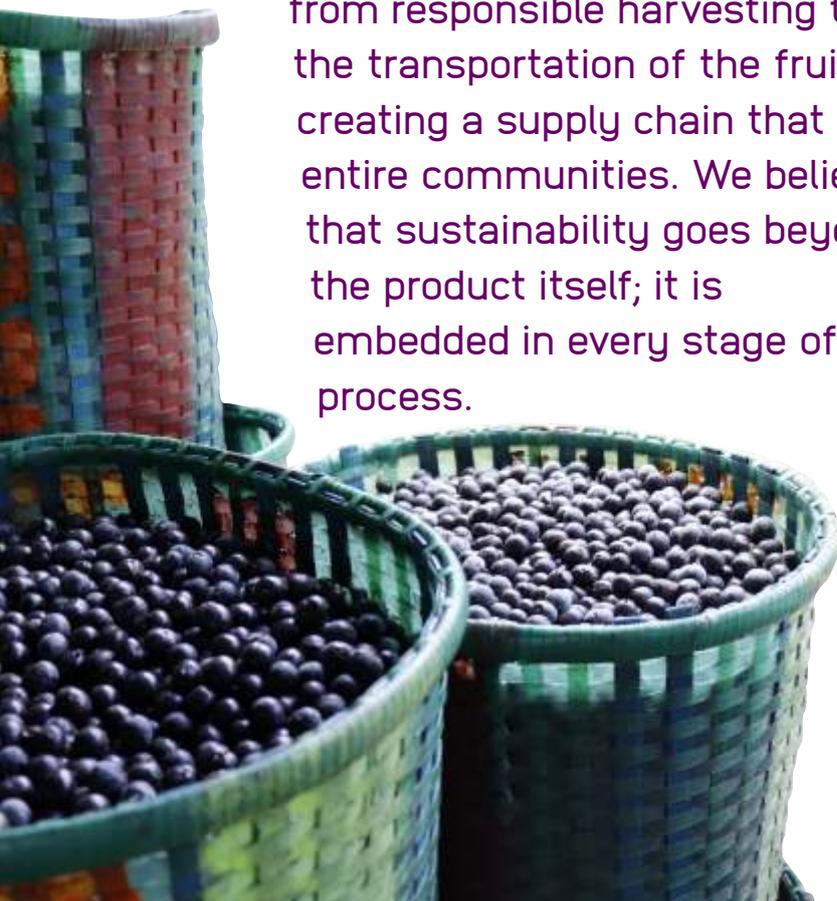

# Where does our Açaí come from?

From the greatest natural, cultural, and historical heritage of Brazil: the Amazon!

## Sustainability and Responsibility

Açaí Natuzon is cultivated using environmentally friendly practices, preserving biodiversity and natural resources. We value local labor, from responsible harvesting to the transportation of the fruit, creating a supply chain that benefits entire communities. We believe that sustainability goes beyond the product itself; it is embedded in every stage of the process.

# The properties of Açai berries

Açai berries contain a variety of properties that can contribute to overall well-being; furthermore, the characteristics and nutrients found in derived products may help provide positive effects in the prevention of various health conditions. However, it should be noted that the potential benefits of Açai are primarily based on preliminary laboratory studies or research on individual components of the fruit. Açai has the following properties

Rich in fiber;

Proteins;

High in anthocyanins and flavonoids, powerful antioxidants that protect the body from the aging and excess free radicals;

Contains polyunsaturated fatty acids (omega 3, 6, 9) that help reduce cholesterol buildup in the arteries;

Contains a rare synergy of amino acids and a high concentration of phytosterols, which protect the heart;

Rich in iron, vitamins B1, B2, B3, C, E, and minerals like potassium, calcium, magnesium, copper, and zinc.

# What are the potential health benefits?

The benefits of Açai Natuzon are numerous. The main ones include:

- Supporting the immune system;
- Boosting energy levels;
- Fighting inflammation;
- Protecting the cardiovascular system.

Unlike how it has been presented in the US market so far (as juice or berries), we offer it in the most popular form in Brazil the pulp. Our industrial processes preserve all the characteristics of the fruit in its natural state.

# Agai Tube

A mini portion to enjoy at any time of the day. Convenient and packed with nutrients, it contributes to daily well-being, providing the perfect dose of energy for those who value practicality.

# Açai cup

## medium and small

A smart option for those who want to incorporate Açai Natuzon into a healthy and balanced diet, taking advantage of its endless combinations or enjoying it pure. Ideal for maintaining a healthy eating routine, which is essential for achieving optimal performance. For athletes, Açai Natuzon is an excellent choice. In addition to being a great source of energy, this fruit has antioxidant properties that combat free radicals in the body, overall contributing to health and fitness. Consuming Açai in the form of sorbet, naturally produced with a high concentration of fruit (like Natuzon sorbet), is an excellent choice.

# 5 liter

The 5-liter tub of Açaí Natuzon is the perfect choice for family gatherings or enjoying with friends, whether at restaurants, ice cream parlors, or other commercial establishments. It can be served in cups or used to create delicious desserts.
