Our Purpose

Santevia inspires health through exceptional drinking water. We manufacture and sell quality home water filters designed to support your health and wellness.

Our unique filtration technology works in two stages: first, we filter out tap water contaminants like lead and chlorine, then we add back essential minerals like calcium and magnesium. The result: clean, mineralized alkaline water that tastes delicious.

Our Story

Santevia wasn't born in a boardroom it started with a genuine need. When founder David struggled with a health issue, his wife Yvonne spent months researching natural solutions, eventually discovering something that changed everything: mineralized water.

What began as a personal health breakthrough expanded when they both noticed additional benefits like renewed energy, mental clarity, and a daily sense of vitality. Through this discovery, it became clear that water today often lacks what our bodies truly need to thrive. Most treated water is safe, but it loses the essential minerals that naturally hydrate and support wellness. Santevia was created to bring water back to its purest form, restoring essential minerals through a science backed method inspired by how water filters through rock and earth in nature.

As our research and understanding deepened, so did our purpose. Mineralized water isn't just refreshing, it's a simple but powerful way to gently energize, naturally nourish every cell, and unlock the potential to feel your best.

Santevia Gives Back

We believe clean drinking water is a right that is sadly not available to all. In partnership with Acts for Water, we're on a mission to change this.

Every MINA® Alkaline Pitcher and Gravity Water System sold gives 100 days of clean drinking water to communities in Africa living in water poverty.

Clean, disease-free water changes lives: it allows children to get an education, it allows mothers to join the workforce, and it allows communities to break the cycle of water poverty. Together, we can make a difference.

Our giving goal: 100,000 years of clean drinking water by 2030.

Our Uniques

Advanced Filtration

Santevia filters chlorine, lead and other contaminants.

Minerals in Every Glass

Santevia adds minerals like calcium and magnesium.

The Alkaline Difference

Santevia raises the pH of water by up to +2.0 units.

Optimized for Taste

Healthy minerals make Santevia water taste fresh and delicious.

Minerals in Every Glass

Ordinary filters remove essential minerals that your body needs to thrive. Santevia adds minerals like calcium and magnesium to create water that's healthier for you. The World Health Organization (WHO) recommends drinking mineralized water to support optimal health.

Advanced Filtration

Tap water contains contaminants like lead, chlorine and even pharmaceuticals. Our products use a combination of granulated activated carbon, kinetic degradation fluxion, ion-exchange resin and activated alumina to ensure you're protected from tap water contaminants.

Every Santevia product is independently tested to meet or exceed NSF Standards 42, 53 and 401 for water quality and the reduction of chemicals and contaminants.

The Alkaline Difference

By adding minerals like calcium and magnesium, Santevia water filters raise the pH of water by up to +2.0 units creating a smooth and silky taste. These minerals raise the alkalinity (resistance to acid) of water to help the body neutralize excess acidity. Too much acidity, caused by certain foods and stress, can lead to poor health.

Optimized for Taste

Adding minerals to water is not only better for your health, it also creates a fresh and delicious taste. Santevia water tastes so smooth that you'll drink more and stay better hydrated. Don't take our word for it, ask our thousands of happy customers.

"Tastes so delicious that my family drinks more water" - Crystal Hughes, Registered Holistic Nutritionist, Blogger & Recipe Developer

Santevia vs. Brita

We take filtration to the next level. Here's how the Santevia MINA Pitcher compares to a standard Brita Pitcher.

Capacity
2.1 L / 9 cups

Filter Life
2 months

Material
BPA & BPS-free Tritan plastic

Product Weight
3.1lbs / 1.4 kg

Product Size (L x W x H)
11" x 5" x 10.5"
28.1 cm x 12.7 cm x 27.1 cm

HOW IT WORKS

Our two-stage filter echoes earth's natural mineral filtration to give you water that tastes refreshingly smooth.

The MINA Filter uses granulated activated carbon (GAC) to reduce chemicals like chlorine, as well as ion-exchange resin to filter heavy metals like lead and cadmium.

Ordinary filters strip away essential minerals that your body needs to thrive. Santevia infuses healthy minerals like calcium and magnesium into water to support your optimal body balance and make your water taste great.

Tastes Delicious

HOW IT WORKS

Our recyclable **MINA Fluoride Filter** is made in Canada and tested to NSF standards for fluoride, lead and chlorine removal.

Granulated media, activated carbon, and ion-exchange resin filter fluoride, chlorine, lead, mercury, cadmium, copper, PFAS and PFOS, volatile organic compounds and other contaminants.

The MINA Filter and Mineral Stones add calcium, magnesium and trace minerals to raise the pH by up to +2.0 units and make the water healthier.

27.9 cm x 27.9 cm x 25.4 cm

Gravity Water System Filters

HOW IT WORKS

This multi-stage system delivers the highest level of filtration to create clean, mineralized water that tastes delicious.

The Ceramic Pre-filter boasts a 0.3 micron pore size to filter rust, sediment and microplastics.

The Fluoride Filter includes multiple stages of filtration. First, activated alumina filters fluoride, and kinetic degradation fluxion reduces heavy metals. Then, granulated activated carbon filters chlorine. Finally, pH balls and stones add essential minerals while zeolite improves taste.

The Mineral Stones raise pH by +2.0 and continually release minerals to maintain the alkalinity of water.

FLUORIDE FILTER

Filter Life
4 months

Product Weight
1.8 lbs / 0.8 kg

Product Size (L x W x H)
3.7" x 3.7" x 6.5"
9.7 cm x 9.7 cm x 18.3 cm

5-STAGE FILTER

Filter Life
6 months

Product Weight
1.8 lbs / 0.8 kg

Product Size (L x W x H)
3.7" x 3.7" x 6.5"
9.7 cm x 9.7 cm x 18.3 cm

Note: The 5-stage Filter functions the same as the Fluoride Filter, but it does not filter fluoride.

Bath Filter

Naturally nourish and protect skin by filtering chlorine and adding minerals.

*Filters
Chlorine*

*Protects
Sensitive Skin*

Bath Filter

Protects skin from irritation caused by chlorine

Filters 99.9% chlorine

Adds magnesium & zinc to nourish skin and hair

Helps dry and itchy skin

Material
Organic cotton

Filter Life
2 months

Product Weight
0.24 lbs / 0.11 kg

Product Size (L x W x H)
3.94" x 3.94" x 4.92"
10 cm x 10 cm x 12.5 cm

HOW IT WORKS

Bathing in chlorinated water can cause dry skin and damaged hair. **The Bath Filter** reduces absorption and inhalation of chlorine, and restores water's natural properties promoting softer hair and smoother skin. Perfect for those with sensitive skin.

Simply hang over your bathtub faucet and let the water run through. Chlorine is reduced as the water flows. For optimal results, swirl the filter in the bath for 3-5 minutes once tub is full.

The Bath Filter can either be left in the tub or taken out during a bath, and it can be used with bath soaps and oils.

Water Bottle Filter

Filters Chlorine

Adds Minerals

Raises pH

Tastes Delicious

HOW IT WORKS

Ensure that you have healthy, filtered water wherever you go.

The Water Bottle Filter's unique formula filters 99% of chlorine and adds minerals, creating a delicious taste.

Simply place in any bottle or glass, add water, then shake or stir for 30 seconds. The result: clean, mineralized and naturally alkaline water that tastes delicious and supports your health.

NEW LOOK!

With its eye-catching new packaging, the Water Bottle Filter will drive revenue and increase average order size. The packaging now includes a hanger for clip strip and checkout-line placement, while the 6-pack display option can be merchandised with the rest of the brand.
