ABOUT US

Nudo, Türkiye's first domestic instant noodle brand, has been growing since it first met consumers in 2013 by adding new varieties to its product family. Behind this young and dynamic instant noodle brand is Eris, which has over 100 years of food experience. While developing NUDO products, we blended flavor habits from Anatolian traditions with modern dietary preferences and the new taste preferences of the younger generation. Another source of inspiration for us was the noodle culture that originated in the Far East and has spread to world cuisines, being

reinterpreted in each culture. NUDO, produced with reliable and Halal food criteria, does not contain artificial preservatives, artificial Flavoring, and additives such as MSG (Monosodium Glutamate). NUDO products are offered to the market with GIMDES halal food certification. Our care for our business and our understanding of providing healthy and reliable food to our people were certified with the International Superior Taste Award certificate in 2016, 2018, 2021, and 2022.
