

# Compressed Himalayan Animals Salt Licks

Nén động vật Himalaya liếm muối

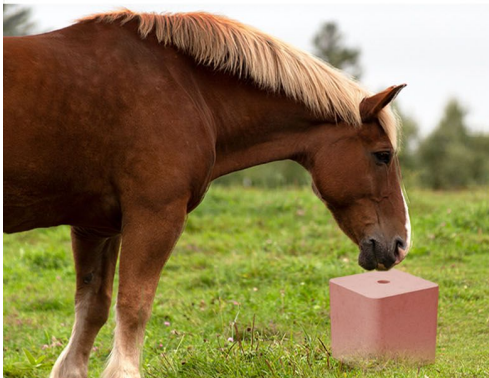

**100% Natural  
& Full of  
Minerals**

Available in **2 kg** | **2.5 kg** | **4 kg** | **5 kg** | **10 kg**

**Salt Licks** are 100% natural and additives-free deposit of mineral salts for farm as well as other domestic animals, to supplement their nutrition.

**Himalayan Salt Licks in particular are 100% natural and pure forms of Mineral Salts**, formed over 250 million years ago as a direct result of massive geological changes and earthquakes that trapped ancient oceans beneath the earth's crust. These trapped oceans, over the course of roughly 250 million years, crystallized and formed Rock Salt and we have made this ancient rock salt available to supplement the varied dietary needs of living beings.

**It is also the preferred choice for dairy farms, stable horses, cattle and sheep farms, camels, buffaloes etc.**

**100%**  
natural and  
additives-free

Typically, free choice salt intake for cattle and horse is between 1 and 2 oz. per day, however that along is not enough as trace elements are also required which are unavailable in normal salt. Himalayan Salt Licks are consumed by the animals on demand depending on animals' species and their specific needs. They provide convenience and really work! The presence of 84 natural minerals and trace elements in this rock salt makes it the ultimate choice for a healthy and nourished growth of animals.

Available in | **2 kg** | **2.5 kg** | **5 kg** | **10 kg**

## Why Himalayan Salt Licks?

Himalayan Salt Licks allow for convenience using an animal's '*nutritional wisdom*' providing an all natural one stop solution to an animal's requirements.

They also have several benefits:

- Reduces nervous animal behaviors
- Decreases stressful behaviors such as constant licking, chewing on fences etc.
- Strengthens immune system
- Increases milk yields by 5-15% (12.8%)
- Helps animals develop shiny & healthy coats
- Helps harden the hooves of animals

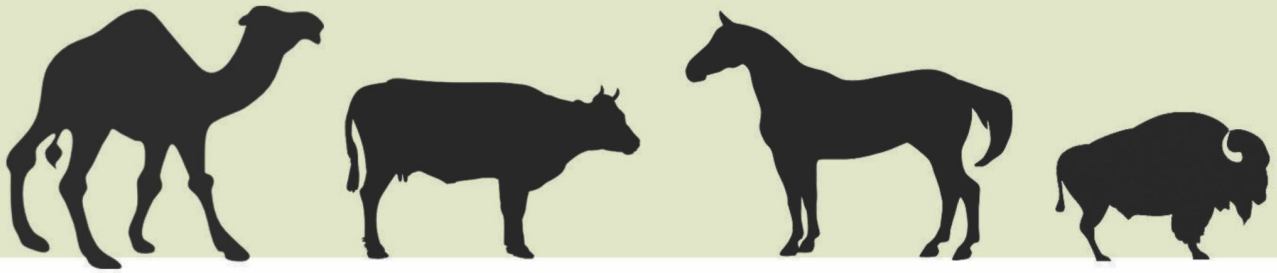

Salt intake for **cattle** and **horse** is between 1 and 2 oz. per day

**84** natural minerals and trace elements

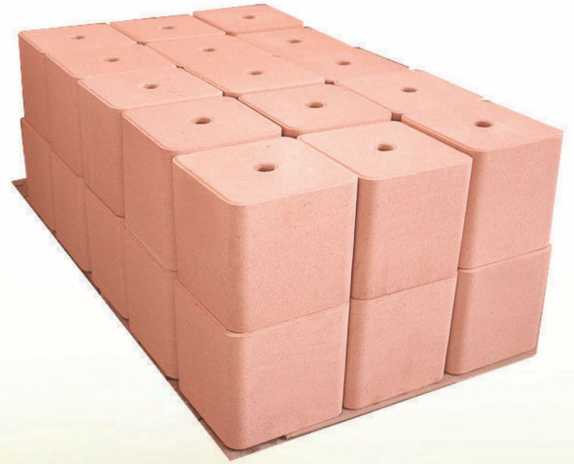

- Restores salt lost by animals via sweating in hot climates
- Increase in the threshold at which animals/horses sweat with exercise
- Reduces animal drowsiness
- Increases feed intake
- Increases animal weight
- Increased farm efficiency & productivity

Available in | **2 kg** | **2.5 kg** | **5 kg** | **10 kg**

## Quality matters!

It is simply a matter of selecting the best alternative natural product available to fulfill your requirements.
