F.H. NOWALIJKA

Piotr Wychowatek

One of the largest fruit and vegetable companies in Poland, engaged in the production and wholesale of these products

We are the only one in the country who simultaneously grows, produces and distributes our products.

F.H. Nowalijka
Piotr Wychowatek

The company's central headquarters with warehouse space and its own transport base.

NOVITA
Horticultural farm

The first Polish horticultural farm dealing with growth of lettuces and herbs in the hydroponic system.

Nowalijka
Convenience Food

The plant, opened in 2019, produces ready-to-eat meals based on its own vegetables and herbs.

NOWALIJKĄ IN NUMBERS

We have been on the market since **1999**

We employ almost **750** employees

We have over **40** refrigerated cars

We export products to **10** countries

STRENGTHS

Highest quality - The Nowalijka's product line is systematically examined. Our warehouses are regularly controlled by cooperative market chains. We have many certifications including BRC, IFS and GLOBALG.A.P.

Guaranteed delivery - ORDER FULFILLMENT WITHIN 24 hours, or even faster. Thanks to the central location of the company, we are able to ensure short delivery times and attractive prices regardless of the destination.

Own cultivation - our products are with us from the seed to the store shelf, so we know what we are selling.

100% Polish capital - Nowalijka is a Polish family company founded by Piotr and Renata Wychowatek, who successfully manage it to this day.

Clean label - all ingredients in the products result from the natural production process, not the desire to artificially improve the product, enhance its taste, color or shelf life.

PRODUCTION SPACE

5,5 ha

production greenhouses

6,6 ha

foil tunnels

33 ha

farmlands

1,5 ha

warehouse space

The company's central location relative to Polish borders allows us to maintain not only an attractive price for transport, but also the quality and freshness of products due to short delivery times. Vegetables go straight from the fields to store shelves.

MACHINE PARK

Piotrków Trybunalski

The sold assortment can be divided into parts of several hundred grams and delivered on trays in bags from flowpack machines and modern lines for regular sorting, weighing and inspection of spinach. We have our own carton gluing machines, and 5 cold rooms are stored with temperatures adapted to the needs of given products.

Kosów

The entire complex is available in lines for sowing seeds in greenhouses, which load peat into containers, calibrate the grain and put it into pots, conveyors transporting lettuces to the packing hall, and a state-of-the-art irrigation system, and the climate is computer-controlled. Several sets of lamps under the glass roof activate when the sun level is applied, speeding up the photosynthesis process.

Jarosty

Ready-to-connect refrigeration meals are provided by modern production halls and appropriately adapted warehouses. Production lines wash, peel, cut, cook and pack every type of vegetables, with the ability to flow out.

We were the first in Poland to start hydroponic production of lettuces.

Cultivation takes place in an area of 5 ha of a modern greenhouse.

Advantages of hydroponics:

- ✓ There are no restrictions on the rotation of plants - you can grow different varieties of lettuces and herbs one after the other.
- ✓ No pesticides are used in water culture.
- ✓ Heavy metals do not enter the food because there is no contact with the soil.
- ✓ Possibility of year-round cultivation.

PRODUCTS

SALAD MIXES

A quick and healthy way to eat – as an addition to salads and green smoothies

PRODUCTS

READY DISHES

Perfect solutions for people who want to eat healthily but do not have time to prepare meals

They are prepared from the highest quality vegetables grown on our horticultural farm or delivered by reliable suppliers. The production technology means that they retain their unique taste and aroma WITHOUT ANY IMPROVEMENTS. We offer over 40 flavors of soups.

Traditional

Cream soup

Flavours of the world

Superfood

It is not a coincidence that the ingredients are carefully selected to create an ideal, easily digestible meal that is a perfect complement to the daily diet. They are perfect for consumption at home, at work and at school. The variety of lunchboxes goes hand in hand with their freshness - lettuces picked in the morning, combined with the rest of the ingredients, are delivered to the store the next day.
