

MOVING MOUNTAINS

HUNGRY FOR CHANGE?

JOIN THE PLANT BASED MOVEMENT

MOVING MOUNTAINS SUPERFOODS

Our mission is to encourage real change through everyday choices, by making eating healthier and more sustainably the easy and obvious choice, through delicious plant based products. At the core of our mission since we were founded in 2018, the Superfoods range is the next phase of innovation at Moving Mountains providing 'health hacking' products, that do not compromise on flavour or nutritional value.

WHAT IS A SUPERFOOD?

"Superfood" refers to a category of nutrient rich foods considered to be especially beneficial for health and well-being. These foods are typically high in vitamins, minerals, antioxidants, and other nutrients that can promote good health and reduce the risk of chronic diseases.

WHAT ARE THE BENEFITS?

The superfoods products are free from allergens including Soy, Gluten and Nuts. The products are low in saturated fat and sugar, high in protein, and they provide a source of fibre. Unlike products currently on the market our superfoods range is not padded out with cheaper ingredients such as potato and rice. The product contains a high proportion of superfoods ingredients, all found in your cupboard or fridge at home, which provides improved nutritional quality and value.

HOW DOES THIS PRODUCT DIFFER FROM EXISTING MM PRODUCTS?

The new superfoods range is an extension to Moving Mountains existing product range, developed to address changing trends in the global food market and customer demands for allergen free, nutrient rich, protein packed, and delicious products. Packed with protein and superfood ingredients, we describe the new range as a 'health hacking' due to the products high quality and nutritionally balanced ingredient list.

WHAT ARE SUPERFOOD INGREDIENTS?

Our superfoods ingredients list focuses on high quality, high nutritional value foods, that you can find in your cupboard at home. In our products you can expect to find:

Courgette

Sunflower seeds

Tomatoes

Quinoa

Garden peas

Mushrooms

Green lentils

Goji berries

Green bell peppers

Chickpeas

Pumpkin seeds

Chia seeds
