ABOUT US

KOÇBEY GROUP operates in both domestic and international markets under the brands 'FUSKA' and 'IRVA' with 20 years of experience in the Natural Spring Water sector. Our facility in Sapanca holds the largest natural spring reserves in Türkiye.

The economic value of water is determined by its proximity to markets with the highest consumption, as well as its quality. With FUSKA, we are one of the factories located closest to the two cities with the highest consumption, Istanbul and Ankara, while having the largest water reserves. Our source is covered by snow for five months each year, ensuring it is protected from any risk of pollution from human activity.
