

Smart Food Safe

— Digitalize Food Safety —

A Smart Investment in Technology for Safer Food
Quality, Food Safety, Regulatory & Traceability
Management Software Solutions

About Us

Vision : The future of quality & food safety compliance the integration of advanced technology solutions. By harnessing the power

Mission : The future of quality & food safety compliance the integration of advanced technology solutions.

How We Started : The future of quality & food safety compliance the integration of advanced technology solutions.

FARM TO FORK SOFTWARE SOLUTIONS

One software platform for the entire food supply chain with real-time traceability

BE AUDIT READY 365 DAYS OF THE YEAR

Stay compliant with global food safety and quality program requirements

POSITIVE RETURN ON THE INVESTMENT

Cutting costs without compromising on the quality or food safety with technology

BUILT-IN SMART TECHNOLOGIES

Integration with latest technologies makes business processes smart & efficient

“

My experience in the food safety industry has taught me that manufacturers strive to prioritize food safety but face challenges in keeping up with the constantly evolving landscape.

Smart Food Safe was founded to enable food companies to track, manage, and improve their food safety programs, ultimately safeguarding both consumers and their brand with the power of technology.

Prasant Prusty (CEO & Founder)

”

Our Software Solutions

The future of quality & food safety compliance is the integration of advanced technology solutions. By harnessing the power of artificial intelligence, IoT devices, blockchain & data analytics, businesses can achieve real-time monitoring, predictive analysis, seamless traceability & automated compliance management. This technological advancement will revolutionize the industry, enhancing transparency, efficiency, and ultimately & automated compliance management.

The future of quality & food safety compliance is the integration of advanced technology solutions. By harnessing the power of artificial intelligence, IoT devices, blockchain & data analytics, businesses can achieve real-time monitoring, predictive analysis, seamless traceability & automated compliance management.
