# WHY CHOOSE AKANTE?

## *Sustainable Furniture*

At Akante, we are committed to offering our customers durable, long-lasting products that are environmentally friendly.

### *Respect for the environment*

Our steel bases are powder-coated.

Powder coating is a «dry» spraying technique that does not use harmful solvents for humans or the environment.

### *What is the Reach regulation ?*

REACH stands for Registration, Evaluation and Authorisation of Chemicals. It is a European regulation (Regulation No. 1907/2006) that came into effect in 2007 to ensure the safe manufacturing and use of chemical substances within the European industry. The regulation aims to identify, assess, and control chemical substances that are produced, imported, or placed on the European market.

### *Objective*

To protect human health and the environment from the risks posed by chemical substances. The goal is to gradually replace hazardous chemicals with safer alternatives for both people and the planet.

### *Durability*

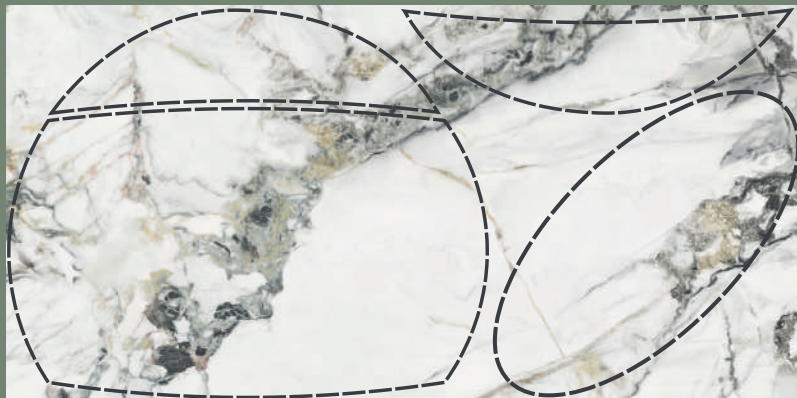

We aim to offer our customers durable products that stand the test of time and are easy to repair. The uniqueness of our Spanish ceramics lies in their resistance to chemicals, scratches, and wear. They remain intact and retain their original appearance even after years of intensive use.

## *Eco-Design*

We place great importance on eco-design and waste reduction. That's why our dining tables are cut to the same size as our ceramic slabs to maximize their use. Every ceramic offcut is recovered to create another Akante product. Through this approach, we minimize waste and contribute to protecting our environment.

*Reuse*

## *Fire resistance*

Our fabrics comply with fire-retardant standards to reduce the risks associated with ignition. The fire resistance of our fabrics meets the current European standards EN 1021-1 (cigarette resistance) and EN 1021-2 (flame resistance).

## *A complete website*

You can directly download from the product pages:

- DWG and SKP files

- Technical data sheets

- High-definition lifestyle images

- Descriptive brochures  
Customizable ranges\*

# OUR EXPERTISE

## *Akante Ceramics*

Ceramics are made from a mixture of fine clay particles, natural aluminosilicate minerals, silica and kaolin. The creation of ceramics involves a process of shaping, printing, and final firing at temperatures exceeding 1000°C. This process makes the material extremely robust, resistant to wear, scratches, heat and deformation.

### *The characteristics of our Ceramics:*

Akante offers a wide range of tabletop surfaces made from 3 to 6 mm ceramic bonded to 6 to 8 mm glass, or from 11 mm solid ceramic. These tabletops are crafted from slabs as large as 160 x 320 cm. Each ceramic cut results in a unique tabletop.

Most of Akante's ceramics are produced in Spain, and certain finishes such as Clear Oak, Silver and Titanium are exclusively designed by Akante and manufactured specifically for the brand.

Matt Marble

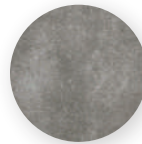

Clear Oak

Silver

Travertine

Argile

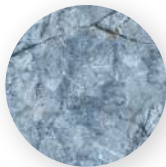

Dark Steel

Titanium

Calcutta Marble

Blue Onyx Marble

Marquina Marble

Doro Marble

Fiorentino Marble

Emperador Marble

### *The New Ceramics:*

Discover Akante's new marbled ceramics and their unique colors. These new ceramics mimic marble with various and highly realistic patterns to closely resemble the natural material.

The polished (shiny) ceramics offer strong durability. However, they may be more susceptible to scratches compared to matte ceramics. You will find them on coffee tables, dining tables, side tables, or even consoles.

### *Heat-Resistant*

Having already withstood the test of fire when it was created. You can safely place hot pots and pans on the surface without risk of damage.

### *Chemical Resistant*

Unaffected by the chemical agents found in cleaning products, solvents, disinfectants, and detergents.

### *Abrasion and Scratch Resistant*

Its hardness makes it highly resistant to wear and scratches, even after several years of intensive use.

### *Durable*

Ceramic is a durable material that allows you to enjoy superior product quality for at least 10 years thanks to its strenght.

### *Natural*

The surface releases no harmful substances and prevents the growth of bacteria, making it safe for contact with food.

### *Easy to Clean*

Our tabletops require no special cleaning products for maintenance.

### *Ecological and recyclable*

Ceramic is 100% natural and releases no harmful substances into the environment. It can also be recycled.

### *Colour that lasts*

The colour resists UV rays and the harshest weather conditions.
