WALLS

Information of walling

- The height of the stand is 2.5m
 - The panels will be painted, RAL 9010.
 - The walling has framework inside the wall, which is where you can fix your art.
 - There is one wooden batten per 500mm.
 - 2 layers of triplex 3mm.
 - 1 wooden batten, contour of panel (45mm h x 22mm w)
 - Weight limit is 60kg per exhibitor.
 - Items should not protrude more than 20cm.
- Please see below the details of this framework.

- Wallpaper can be applied, but this would be required to be done/arranged by the exhibitor. The wallpaper must be removed after. The wallpaper adhesive must be water-based. Should they fail to remove the wallpaper there will be a charge.
- It is the exhibitors responsibility to fix their art as they wish on their walls. This must be done safely and securely. Our Health & Safety Officer will check and should there be concerns the organisers and/or venue will have the right to remove it.
- The fixing of exhibits is permitted using nails, screws, staples and pins.

Please note, that this is a different build to standard shell scheme, standard shell scheme walling is non-loadbearing, but lightweight display material may be attached to them. The preferred method of fixing is hooks and chains (hanging from the aluminium frame) or sticky tabs - or by other means that do not damage the panels in any way.
