

SUSTAINABILITY ZONE

GALLERY RAIL

SHELL SPECIFICATION

The system includes:

- Walls
- Electrics
- Ceiling beams
- Fascia and Nameboard

There will be no carpet on stands or gangways of the Sustainability Zone.

WALLS

The shell scheme white wall structure comprises of 2.5m high extruded aluminium posts and beams which enclose 3mm thick white Foamex panels. Each post has an octagonal cross section and measures 40mm in diameter, whilst connecting beams feature a rectangular cross section of 16mm width and 70mm height.

It is essential that these dimensions are taken into consideration if building an interior to the shell scheme or ordering internal graphics. Please contact **Showlite** for any exact dimensions or calculations required for a specific stand.

- *The graphic panel size is 950mm x 2340mm (Width x Height)*
- *Half panel size is 455mm x 2340mm (Width x Height)*

Half-Height Back Walling:

Please note that walls parallel to the gallery rail will be half-height for good visibility to visitors below. See the visuals on the following pages for further details.

We would like to remind you that exhibitors may not make use of full height pop-ups or graphics on the wall that looks over the gallery to the ground floor as this will restrict visibility. Please note the frame can only take very light-weight items.

- *The half-height graphic panel size is 1940mm x 740mm (Width x Height)*

The panels are non-loadbearing, but lightweight display material may be attached to them. The preferred method of fixing is Velcro or sticky tabs, or by other means that do not damage the panels in any way. **In the event that damage occurs, Showlite may charge the stand holder for the full panel price.**

ELECTRICS

All shell scheme stands will be equipped with a basic electrical package as follows including test and inspect upon fitting:

Up to 2.9 m ²	2 x Spotlights on track
3 - 20 m ²	2 x Spotlights on track & 1 x 500W socket
20.1 – 26m ²	4 x Spotlights on track & 1 x 500W socket
26.1 – 36m ²	6 x Spotlights on track & 1 x 500W socket

If you have requested a lockable cabinet with your stand, the socket will NOT be included.

CEILING

The modular system includes ceiling beams. LED spotlights will be attached to the ceiling – please contact Showlite if you would like them placed in a specific location. The height to the underside of any ceiling beams put in place is 2430mm.

FASCIA / NAMEBOARD

The SFFF22 Sustainability Shell Scheme will have a wood clad fascia (174mm deep) and holds the nameboard. A white Nameboard with black lettering will be fitted to each open side and carry the stand number and exhibiting company name. The stand number will also appear on a white upright fin with the section icon as indicated on the visuals on the second page.

NB: Power to sockets is automatically on a **24-hour supply**, but you will need to let Showlite know what you are running off the sockets/ whether your products rely on 24-hour supply.

If you require your socket/s in a specific location, you must send a diagram/ stand plan to Showlite in advance.

The Nameboard will display the name as it appears on your contract; please let the [organisers](#) know if you require a nameboard change by Friday 12 August 2022. Any changes made after the deadline or onsite may incur a charge of £30.00 + VAT from Showlite. It is helpful for visitors if the company name on the stand is the same as the catalogue entry.

SUSTAINABILITY INFORMATION

Sustainability is at the forefront of Montgomery Group’s minds, and we are on a mission to make our shows as sustainable as possible. The sustainability Shell Scheme is sustainable for the following reasons.

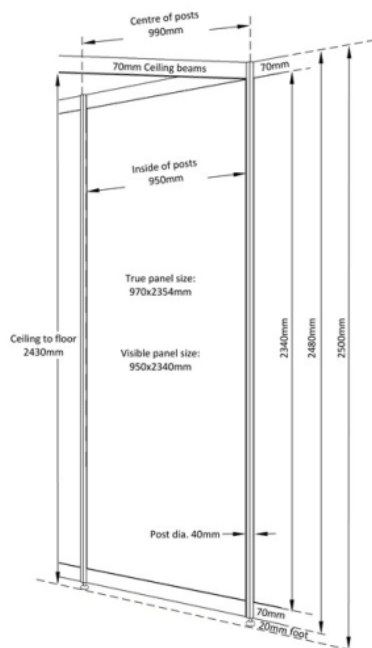

1. All metalwork is cleaned between shows & re-used. Any damaged metal work is cut down and repurposed.
2. All foam panels are cleaned between shows & re-used. Any damaged panels are cut up and repurposed in packaging or counter infills.
3. No carpet is used to reduce any waste.
4. LED lighting is used which requires less power to run.
