

DRINKS CABINET SHELL SPECIFICATION

The system includes:

- Walls
- Electrics
- Carpet
- Ceiling beams
- Fascia and Nameboard

WALLS

The shell scheme white wall structure comprises of 2.5m high extruded aluminium posts and beams which enclose 3mm thick white Foamex panels. Each post has an octagonal cross section and measures 40mm in diameter, whilst connecting beams feature a rectangular cross section of 16mm width and 70mm height.

It is essential that these dimensions are taken into consideration if building an interior to the shell scheme or ordering internal graphics. Please contact **Showlite** for any exact dimensions or calculations required for a specific stand.

- **The graphic panel size is 950mm x 2340mm (Width x Height)**
- **Half panel size is 455mm x 2340mm (Width x Height)**

For any questions regarding graphics please contact Showlite.

The panels are non-loadbearing, but lightweight display material may be attached to them. The preferred method of fixing is Velcro or sticky tabs, or by other means that do not damage the panels in any way. **In the event that damage occurs, Showlite may charge the stand holder for the full panel price.**

ELECTRICS

All shell scheme stands will be equipped with a basic electrical package as follows including test and inspect upon fitting:

Up to 2.9 m ²	2 x Spotlights on track
3 - 20 m ²	2 x Spotlights on track & 1 x 500W socket
20.1 – 26m ²	4 x Spotlights on track & 1 x 500W socket
26.1 – 36m ²	6 x Spotlights on track & 1 x 500W socket

NB: Power to sockets is automatically on a **24-hour supply**, but you will need to let Showlite know what you are running off the sockets/ whether your products rely on 24-hour supply.

If you require your socket/s in a specific location, you must send a diagram/ stand plan to Showlite in advance to indicate.

FLOORCOVERING

- ◆ **Grey carpet** will be laid direct to the floor.
- ◆ **No platforms are provided with shell scheme stands.** However, if you are ordering services such as water & waste, mains gas or heavy-duty electrics, the Organisers highly recommend laying a platform direct to the hall floor.

NB: No refund will be given to any exhibitor who decides to provide their own floor covering to shell scheme stands.

CEILING

All shell schemes feature a ceiling grid where lighting may be placed. This is once again non weight bearing but lightweight fixtures may be attached to it.

The distance from the floor the ceiling grid is 2430mm.

FASCIA/ NAMEBOARD

Drinks Cabinet stands will have a blue clad fascia (174mm deep) and holds the nameboard. A white Nameboard with black lettering will be fitted to each open side and carry the stand number and exhibiting company name. The stand number will also appear on a white upright fin with the section icon as indicated on the visuals on the second page.

The Nameboard will display the name as it appears on your contract; please let the [organisers](#) know if you require a nameboard change by Friday 12 August 2022. Any changes made after the deadline or onsite may incur a charge of £30.00 + VAT from Showlite. It is helpful for visitors if the company name on the stand is the same as the catalogue entry.
