

A central image of a Sangka water bottle in a pond. The bottle is clear with a blue label at the bottom. The label has 'SANGKA' in large gold letters, followed by Thai text, 'NATURAL MINERAL ALKALINE WATER', and 'PHANOM THUAN (SANGKA BRAND)'. The background is a lush pond scene with green lily pads, pink lotus flowers, and a golden fish jumping out of the water on the left. A golden bird is perched on a rock in the background. The word 'SANGKA' is written in large, elegant gold letters across the top of the image, with small golden birds flying around it.

SANGKA

100% NATURAL MINERAL
SPRING WATER pH 8-9

*“If the human body is
balanced in pH
and nutrients it is not
susceptible to disease”*

—— *Dr. Royal R.Rife* ——

The new Alkaline Diet trend involves eating mainly alkaline foods in order to keep the body's pH between 7.35 and 7.45 the ultimate aim is to eat 80% alkaline foods and 20% acidic foods. A large of this diet is cutting down on sugary acidic drink and introducing natural alkaline water into your lifestyle. This long term practice will have a direct effect on your overall health and fitness. Dr. Don Colbert, M.D. Stated

*“There is no life without water,
and there is SANGKA to keep your
lifestyle balanced from within”*

ENDORSED BY

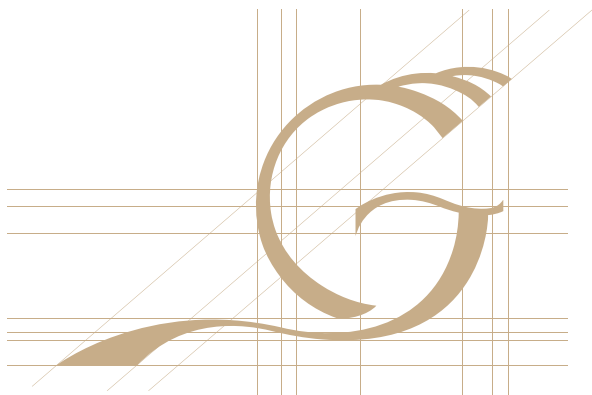

Por Thiengham
WATER SOMMELIER THAILAND

The name derived from its origin in Thailand

A '**Sangka**' is a conch that is often used in an auspicious ceremony in Thailand. The belief that whoever owns a Sangka will always be blessed with good fortune, money and luck. Prosperous with riches, surrounded by companions. Successful in work and keeps you on the bright side of life.

The Origin of Sangka Icon

● Acidic ●

pH less than 7

Metabolic acidosis is a condition in which acids build up in your body. Causes include untreated diabetes, the loss of bicarbonate in your body and kidney conditions. Symptoms include an accelerated heartbeat, confusion and fatigue. Blood and urine test can help diagnose it. *(Cr.Clevelandclinic.org)*

● Neutral ●

pH BALANCE 7

Usually our body is slightly alkaline. Our blood pH is between 7.3-7.4 slight changes causes your body to be acidic or alkaline state. pH 7 is neutral. This is the ideal pH of water in our bodies.

— WE SHOULD KEEP —
OUR BODY BALANCE

in order to keep ourselves in better health

Alkaline

pH More than 7

Food that we consume are mostly Acidic, therefore drinking NATURAL ALKALINE water helps to keep our body in pH scale balance.

Alkaline Water lessens the chance for diabetes Gastric Reflux, is it true? Let's find out what "Alkaline water" is :

Alkaline water has a pH of more than 7 and its molecule is much smaller than regular water

(Regular water pH is 7 or less but Alkaline water is more than pH 7 (8-9) if natural)

Natural Alkaline water helps the body to better absorb minerals and has anti-oxidant which helps to maintain healthy cells.

OUR CEO IS THAILAND'S

first WATER SOMMELIER

A **water sommelier** is an expert in identifying, tasting and recommending different types of water. Much like a wine sommelier does with wine, a water sommelier can guide individuals on the health benefits, distinguish flavours and tastes. Educate on environmental impacts and sustainable sourcing and enhance the dining experience by pairing specific waters with meals. As health consciousness grows, the role of a water sommelier becomes increasingly valuable in helping people make informed choices about the water they consume.

This is the passion of our CEO who has been certified by Water Sommelier from Germany and is a member of Water Sommelier Union.
