

AGROPOŠTA

A Taste of Nature

Because of love
for nature

01.
PURE TASTE

We only work with top-quality, unprocessed ingredients, full of flavour. So no concentrates or additives.

02.
ALWAYS ORGANIC

Our syrups consist of 100% natural and organic ingredients. Good for people and the environment.

03.
SUSTAINABLY MADE

We use environmentally friendly packaging, create as little waste as possible, produce energy efficiently and take good care of our people and the nature where we pick.

04.
ARTISANAL PRODUCTION

We make our syrups with a lot of personal attention and according to traditional recipes.

The Story

Our story begins in 2011, in Croatia. There, the Švaić family started making syrups based on local plants and fruits. They named the brand Agropošta, which means 'mail from nature'. The Švaić family's knowledge of everything that grows and flourishes is passed on from generation to generation. This still forms the basis of our brand today. Nature is always our starting point, and our greatest source of inspiration.

With great care and respect for nature, ingredients are hand-picked. Only the best fruit and plants are selected and processed into syrups. This allows us to ensure that every drop of syrup is top quality. Good to know: all our products are gluten free, vegan, made with purely organic ingredients and without any artificial additives or preservatives.

"THE KNOWLEDGE *is being*
passed on from GENERATION
to GENERATION."

Pavle Švaić

THE INGREDIENT *in the leading role*. With great care, only THE BEST INGREDIENTS are chosen. We use *NO* CONCENTRATES but always start from the ingredient. That gives the AUTHENTIC TASTE.

LAVENDER
Lavandula

LEMONGRASS / GINGER
