ELDERFLOWER

To butter up a party

Elderflower has a typical floral, slightly sweet flavour that does great in drinks. Organic elderflower is hand-picked from the wild in Croatian forests. We add almost nothing else to our syrup, as there is no need for that. A delicious thirst quencher both with flat and sparkling water.

RASPBERRY

Summer fruit one of thousands

The raspberries we use in our syrup come from the Balkan region. Thanks to the big temperature differences there, with cold nights and hot days, the raspberries there have an extra intense flavour. Sweet, yet deliciously fresh. Our raspberry lemonade contains no less than 50% fruit and you can taste it!

LAVENDER

Nice and zen

The main ingredient of our lavender syrup is organic lavender from Croatia, 'Lavandula Angusifolia' to be precise. We pick it by hand there, when the plant is just in bloom. That way, we can be sure we have the tastiest base for our syrup.

LEMON

Classic thirst quencher

We use fragrant lemons from Sicily, where the climate is perfect for this fruit. The tastiest organic lemons grow here. We pick and squeeze them by hand, so that only the best fruit ends up in our syrup. We add almost nothing. So you taste nothing but lemon in every sip.

SAGE

Spicy flavouring for your drink

We pick the organic sage flowers along the coast in Croatia, in the wild. We do so at the moment when the bud of the plant turns into a flower, because that is when it has the most fragrance and flavour. This careful picking requires time, attention and craftsmanship, and you can taste it all in our sage syrup!

MINT

For a fresh twist to your drink

For our mint syrup, we use mint (the Minta Spicata): a type of mint that is deliciously fresh but not overpowering. Each sprig is hand-picked, so we can be sure it is picked at exactly the right time. This care and attention are fully reflected in this refreshing mint syrup.

STRAWBERRY

Strawberries at their best

The organic strawberries we use are intensely sweet and aromatic: the best basis for our strawberry syrup. All strawberries are handpicked in Croatia, when they are deep red and at their very best. The climate there, with very hot days and cold nights, makes the flavour of the strawberries extra intense.

LEMONGRASS & GINGER

Syrup with a spicy kick

Sweet and spicy are in complete harmony in this organic syrup. In our syrup, lemongrass gives a subtle, aromatic citrus flavour that goes very well with the spiciness of the ginger. Ginger is especially famous for its fresh, tangy taste and gives just that spicy kick to the aftertaste. An ultimate combination.

AGROPOŠTA IS IDEAL FOR COCKTAILS OR MOCKTAILS

Cocktail: Amour en Parfum

 $7.5\ ml$ Agropošta lavender syrup | $50\ ml$ Plymouth gin | 3 splashes of Peychauds bitters

Pour the lavender syrup, gin and bitters into an ice-filled glass or pouring jug. Stir and pour through a strainer into a large cognac glass. Garnish with a strip of lemon peel and a lavender flower.

100% ORGANIC products

^{*} From organic origin | All our syrups are pasteurised | Best before raspberry, strawberry and lemon is 9 months | Best before elderflower, sage, lavender, lemongrass/ginger and mint 2 I months

OUR PRODUCTS

SINGLE-SERVE SACHETS

32 ml of syrup

Serve dhe sachet in catering next to a glass with water, ice and a sprig of mint or present the sachets in retail in a display.

* unique experience for the guest in the catering industry

* takes up little (cooling) space

* low carbon footprint

* packaging made of 100% recyclable plastic

Contents: 32 nd syrup (to be mixed with 200 ml water or more according to flavour) [Packed per 50 in a box, also available in a mix box.

GIFTBOX SACHETS

5 agropošta sachets

5 agropošta sachets in the flavours respiration mint, elderflower, sage and lavender play and A7 flyer with tips & tricks.

(Can be personalised for large volumes)

Letterbox size so ideal as a gift, actually receive "Mail from Nature".

PRE-MIX BOTTLE

250 ml lemonade (diluted)

The glass ready-to-drink bottle can be served right away.

* easy to serve

* non-carbonated

* glass bottle, luxury label

Packed per 12 in a box.

WHAT IS AGROPOŠTA?

Our story begins in 2011, in Croatia. There, the Svaic family started making syrups based on local plants and fruits. They named the brand Agropošta, which means 'mail from nature'. The Svaic family's knowledge of everything that grows and flourishes is passed on from generation to generation. This still forms the basis of our brand today. Nature is always our starting point, and our greatest source of inspiration.

With great care and respect for nature, the ingredients are hand-picked. Only the best fruit and plants are chosen and processed into syrups. This allows us to ensure that every drop of syrup is of top quality. We have chosen different types of syrups, all of which have their own typical flavour. Good to know: all our products are glutenfree, vegan, made with purely organic ingredients and we do not use any artificial additives or preservatives.
