

Inset Handles and Portholes

Future Phoenix

Future Phoenix is the innovative brand for Cooke Brothers new range of architectural door products.

The latest Inset Handles, together with complimentary Porthole ranges, have an instant strong visual appeal. Suited to both internal and external doors.

The Inset Handles are designed around a common mounting system which allows for the selection of different styled fascias.

There are five themed ranges: Art Deco, Twin, Eye, Edge and Yin Yang. Each range has a selection of complimentary styled products, as well as being available in three sizes.

For both Inset Handles and Portholes architects and designers also have the facility to style their own fascias to match particular building decor, period, or interior design. The stainless steel fascias are available in a range of finishes including satin or bright polished, brass lacquered or powder coated. Aluminium fascias are available as clear or colour anodised.

Where required bespoke engraving can be applied to any Inset Handle or Porthole.

Inset Handles

Inset Handles

Easy to fit modular design

The modular construction of each handle makes for simple step by step installation and easy final fascia fixing. The handle back box can be fitted in to pre prepared doors, with a temporary cover plate allowing use of the door during the construction period. The final decorative fascia plate can be fitted immediately prior to completion of the internal furnishings.

1. Back Box	Black powder coated mild or stainless steel as standard
2. Back Plate	Stainless steel frame attached to the back of the fascia
3. Protective Cover	Construction cover plate, removable at final fix
4. Fascia Finishes	Polished stainless steel Polished stainless steel, lacquered brass effect Polished stainless steel, choice of powder coated colours Anodised aluminium, choice of anodised colours
5. Packaging	Each handle and all components are individually boxed

Portholes

Designed to suite perfectly with the Inset Handle ranges, the Porthole option offers the same iconic features of high quality and innovative styling.

- Solid stainless steel fascia panels
- Choice of powder coated finishes
- Satin polished or black powder coated internal rims
- Intumescent seals and pyro glass to BS 476 Part 20 :1987, available on request
