

Introducing RAPID KERB

Top Performance, Built-In:

Significant Time Savings On Site

Engineered for rapid, consistent installation – dramatically reduces labour time.

Airtight & Watertight by Design

Eliminates the risk of leaks and improves overall building efficiency.

Precision-Moulded Construction

Guarantees a perfect fit with long-term reliability in all conditions.

Fully Insulated with PIR Core

Delivers outstanding thermal performance and consistently high U-values.

Available in 9 Standard Sizes from Stock

Covers the most common rooflight dimensions – ready to go when you are.

Suitable for Most Roofing Finishes

Compatible with GRP, EDPM, Torch-on felt, single ply membranes, and more.

Built-In 4° Pitch

Designed to ensure optimal water run off. 6° pitch when installed on a 1:40 roof fall.

10-Year Manufacturer's Guarantee

Built for durability and backed by a decade of assured performance.

Installation Advantages:

Reduces On-Site Labour & Guesswork

Simplifies installation and minimises costly mistakes.

Professional Finish Every Time

Integrated design ensures clean lines and consistent aesthetics.

Installs in Record Time

Slash your onsite hours – dramatically faster installation.

Zero Stress, Maximum Reliability

Precision-engineered for peace of mind and consistent results.

Engineered for Reliability. Designed for Speed. Built for the Future.

Design

The perfect fit HITECH Triple Glazed Rooflight—the perfect complement to the Rapid Kerb system. Designed for seamless integration, this rooflight enhances both the aesthetic and functional aspects of your roofing projects.

✓ Exceptional Thermal Performance

With a U-value of 0.74 W/m²K, this triple-glazed unit ensures superior insulation, contributing to energy efficiency and comfort.

✓ EnduroShield Easy-Clean Coating

The glass features a special coating that repels dirt and water, reducing cleaning frequency and maintaining clarity over time.

✓ Sleek Aesthetics

A black ceramic border provides a modern, minimalist appearance that complements various architectural styles.

✓ Integrated Electric Blind

Sealed within the glass unit, the motorized blind offers effortless control over light and privacy, while remaining dust-free and maintenance-free.

✓ Durable Construction

Comprising 76mm thick units with toughened safety glass and argon gas-filled cavities, the rooflight is built for longevity and impact resistance.
