

PROSWING

Prosale

A versatile operator for all your requirements. The Proswing is as comfortable on internal doors (where silence and ease of use are most important) as it is on a large external door (where durability is key). The Proswing range has been developed by Prosale to ensure a robust and reliable operator, that has the aesthetics that wouldn't look out of place internally. Able to work as a pair in tandem, coping with rebated doors isn't a problem with the extensive programming available. The Proswing range has everything covered.

BODY FINISH

Satin Anodised Aluminium
black end caps

DIMENSIONS

Height: 86mm
Length: 664mm
Depth: 130mm

13 AMP switched
fused spur

POWER USAGE

85 Watts

OPENING ANGLE

Up to 110 degrees

ELECTRIC LOCK POWER OUTPUT

12V or 24V

SPRING TENSION

EN4 – EN6

OPTIONS

PROSWING SB

Has the same functions as the Proswing S, but includes a battery back up, this does increase the width of the operator by 150mm.

PROSWING F

We have adapted the Proswing S operator to have a fire certificate rating of 30/30 and tested in the UK.

PROSWING M

The Proswing M is ideal for when you want the door to remain open in a power failure, as the operator is motor open, motor close (no spring).
