01

Get to know:

Alvic is the UK's leading capped wood-composite specialists.

We proudly support the British economy by offering premium products that carry the Made in Britain stamp of approval. And as the only company to manufacture our decking boards in the UK, you confidently invest in stylish decking that boasts lasting luxury.

02 Our Decking Ranges

Our decking boards are crafted from a blend of FSC®-certified wood and recycled polymers — a proprietary blend that makes them 100% recyclable.

Each board is also capped in a durable layer of elegance that requires minimal care — which means you're investing in a lifestyle of enjoying your deck, not maintaining it.

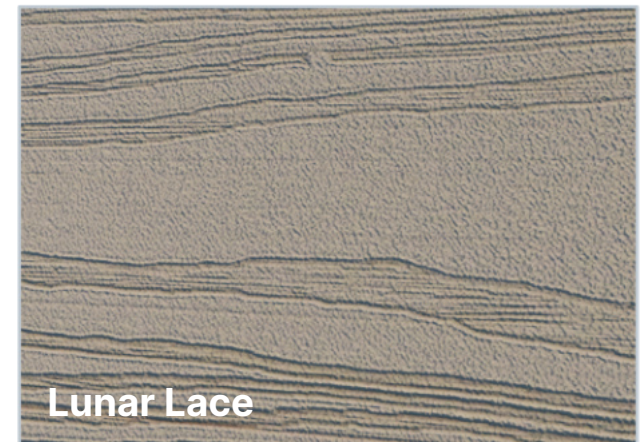

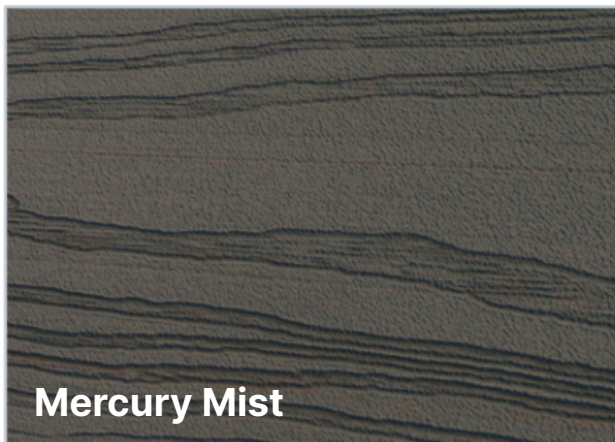

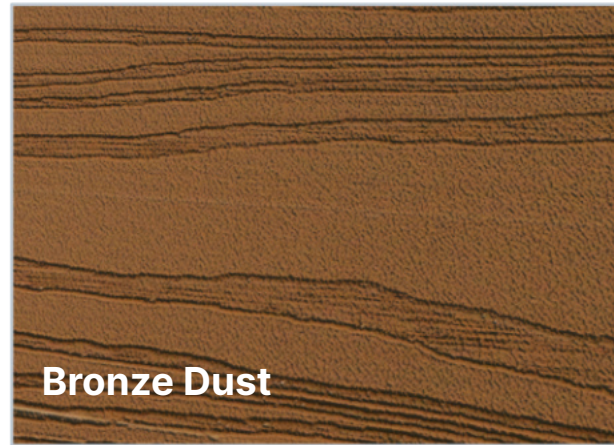

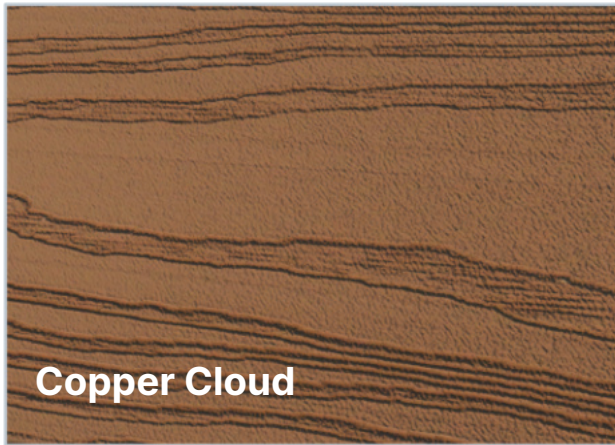

Look for our
FSC®-certified products

03

Range Colours

Our Decking Ranges are available in 6 stylish shades that complements any environment.

*Displayed colours may vary from the actual product colour.

Warranty Length	30	20	15	15
Dual-Faced	No	No	Yes	Yes
Colour Options	6	6	6	6
Fire-protection Grading	Yes	No	No	No

05

Why Does Alvic Offer Only Capped-Composite Products?

Only capped composite can truly provide lasting luxury as promised by our 15-30 Year Warranty.

That's why Alvic is invested in solely manufacturing capped composite products from our dedicated factory in the UK.

Although composite products provide many benefits when compared to pure wood products, our magic lies in capping an already robust core with a last layer of impenetrable elegance.

STRONG

Durable Decking

Composite Core

The durable core comprises a blend of FSC®-certified wood flour and recycled polymer, wrapped in a protective coating.

This creates a robust decking board that won't warp, splinter or crack – giving you decades of endurance and hassle-free enjoyment.

STYLISH

Hidden Fixing System

Seamless Sophistication

Our hidden fixing system provides a seamless finish as well as a safe environment with no unsightly or hazardous protruding screws.

It allows you to easily slide each decking board into place, finished off with colour-matched screws and skirting if preferred.

SUPERIOR

Protective Capping

Capped Composite Composition

We seal our decking boards on all 4 sides to fully protect your deck against the elements. This prevents fading and staining, while providing a surface that's scratch and mould resistant.

This protective layer also boasts our proprietary embossing to create a product that beautifully combines the appeal of natural wood, with the protective qualities of premium-quality polymer.

06

The Benefits of Capped Composite Decking

Why should you
only invest in capped
composite decking?

15-30 Year Warranty

Our warranty is your guarantee against fading, scratching, warping, and weathering, promising deluxe durability and high performance for all outdoor areas.

Minimal Maintenance

Install your capped composite decking and revel in the thrill of owning effortless elegance. No sanding, staining, sealing or painting required to preserve its timeless glamour.

Family Friendly

Our multi-purpose protective capping protects against cracks, splinters and slipping, allowing you to provide a safe outdoor area for your family, friends and pets!

Wood-like Colours

Our superior streaking technology creates realistic wood grain patterns, gifting you with a wide range of natural, yet vibrant decking board colours.

Made in Britain

As the only company that produces their capped composite products in the UK, you gain access to the finest decking boards the world has to offer.

Eco-Friendly

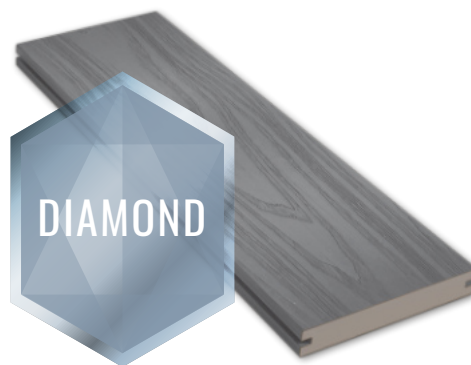

By using only FSC-certified wood to produce our 100% recyclable decking boards, you're getting both the look and feel of a wooden deck, while saving the planet from deforestation.

07

Diamond Range

Elegance Encapsulated

Our Diamond range is the epitome of durable luxury, perfect for both residential and commercial installations.

Diamond Range In Detail

Diamond decking panels are finished with our proprietary streaking technology that combines the striking colour-depth of natural wood, with the exceptional resilience of polymer and acrylic.

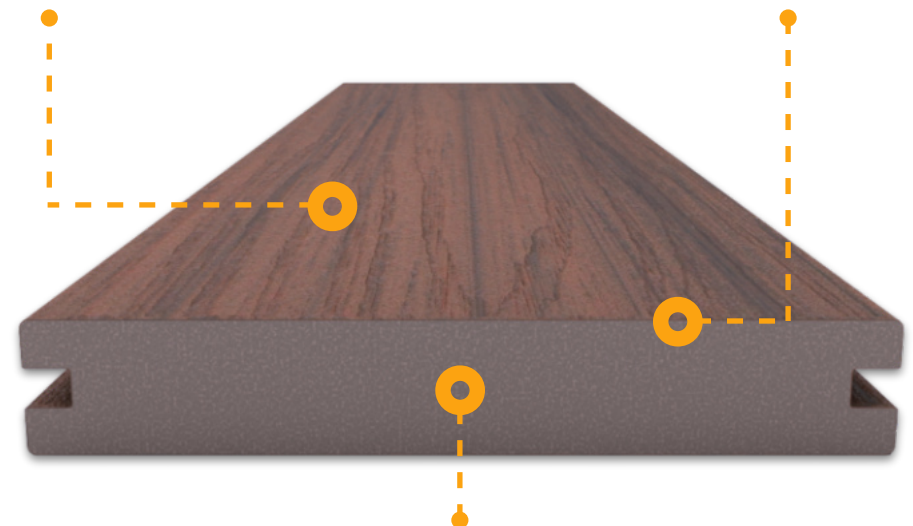

This capping enhances an already durable product by wrapping it in the ultimate protective layer.

Physical Properties

Besides a splinter- and crack-free surface, this fire-rated decking panel features slip-free technology to provide an ultra-safe environment, ideal for both customers and entertaining guests at home.

08

Ruby Range

Crowned in Quality

Unsurpassed elegance, ideal for both residential
and commercial installations.

Ruby Range In Detail

The Ruby range panels' solid-core is covered in our industrial-quality protective capping, ideal for large footfall areas or commercial projects.

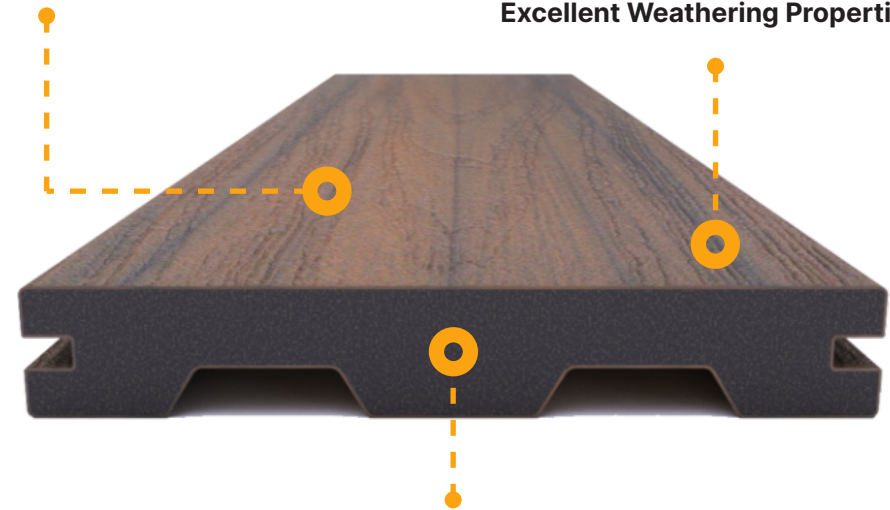

Our proprietary streaking technology adds embossing that creates a realistic wood-grain finish, allowing you to benefit from all the features of composite decking, while revelling in the beauty of natural wood.

Physical Properties

Ruby range panels feature a coating that safeguards your decking against everyday erosive elements to provide a surface that is fade and stain resistant, with excellent weathering properties. In addition, the durable capping ensures a safe environment that boasts zero splinters, no cracking and slip-free technology.

Slip-Free Technology

Single Facing Profile with Excellent Weathering Properties

The composite centre is capped in a protective coating that shields the board against any harsh elements – locking in lasting luster for decades.

09

Emerald Range

Wrapped in Lasting Luxury

Transform your home with our stylish decking and
be the envy of all.

Emerald Range In Detail

The Emerald range's composite centre is capped in a protective coating that shields the board against any harsh elements – locking in lasting luster for decades.

This keeps your deck in pristine condition without the need for sanding, staining or painting, while also providing a child friendly surface that won't crack, splinter or rot.

Physical Properties

Our Emerald decking boards are dual-sided with a traditional grooved side, or a wood-grain embossed side that features our unique streaking technology for a beautifully realistic wooden finish.

Unique Streaking
Technology

Dual-Sided
Surface Usage

Each Emerald decking board comprises a hollow core composite, capped in a protective layer that locks out moisture, UV light and various other harmful elements.

10

Sapphire Range

Confidently Capped in Quality

Add instant elegance to your home with our capped composite decking.

Sapphire Range In Detail

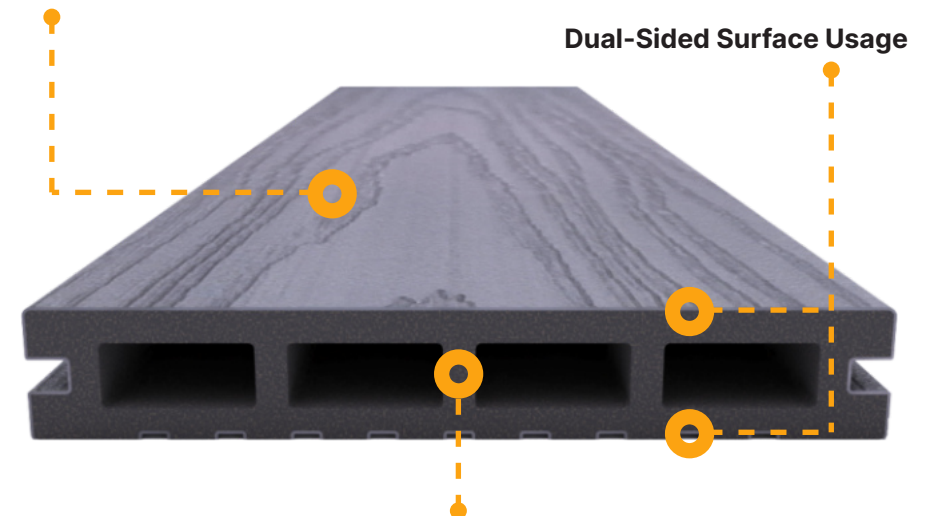

Sapphire panels' hollow core composition is coated with our multi-purpose capping layer that gifts your deck with a host of protective properties.

These attributes guard against the effects of the elements, such as fading, weathering and warping, while enhancing its family-friendliness with no cracking or splinters.

Physical Properties

Both sides of our Sapphire decking boards are functional, giving you the freedom to choose either the traditional grooved side, or the wood-grain embossed finish.

This luxurious layer also boasts scratch, stain and slip-resistant technology so you can enjoy entertaining, without worrying about any accidents.

The Sapphire panel's composite centre is capped in a protective coating that shields the board against any harsh elements – locking in lasting luster for decades.
