CONTEMPORARY CLADDING

Brought to you by:

Our range of contemporary cladding infuses any façade with durable elegance — lifting the appearance of your property while providing a host of protective properties.

Made in Britain and backed by our 20-year UK-Warranty, our cladding gifts your home with instant sophistication that will last for decades.

The Benefits of Alvic Cladding

Noise Reduction

Whether you're on a busy street or have noisy neighbours, our cladding adds significant acoustic insulation to reduce sounds entering or leaving your building.

Energy Efficient

Our cladding's composition and thickness provide a high level of insulation — meaning less use of artificial heating and lower energy bills!

Family-Friendly

Enjoy complete peace of mind with cladding that doesn't splinter, crack, or chip, plus a surface that's mould- and mildew-resistant!

Colour Consistency

Our fade and stain warranty promises that your cladding will keep its striking looks for decades to come.

The Benefits of Alvic Cladding

Minimal Maintenance

No matter which cladding range you select, you'll never have to waste time on sanding, staining, sealing, or painting! Just a light wash will keep your cladding pristine.

Flexible Application

Add your own personality to your building's cladding design by choosing one of our 3 ranges in either a vertical or horizontal application.

Quality Guaranteed

Investing in our cladding doubles your peace of mind with two quality badges: 20-year UK-Warranty and Made in Britain.

Weather-resistant

Acting as a rain screen, our cladding protects your building structure against any water damage.

Cladding Ranges

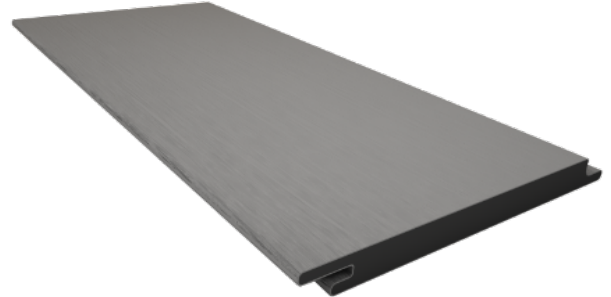

We offer 3 cladding ranges to suit various design and composition requirements.

So whether you're renovating your current home or constructing a new building, one of our cladding ranges will ensure your project is a success story — start to finish!

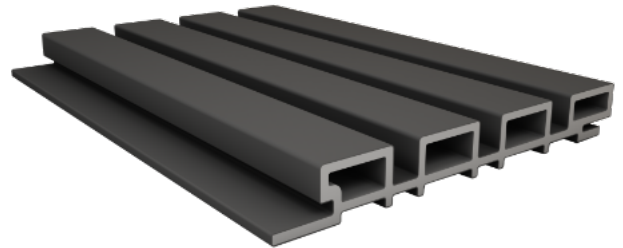

Traditional Cladding

This classic range features traditional capped composite panels that create a smooth appearance with a modern yet organic feel.

Castellation Cladding

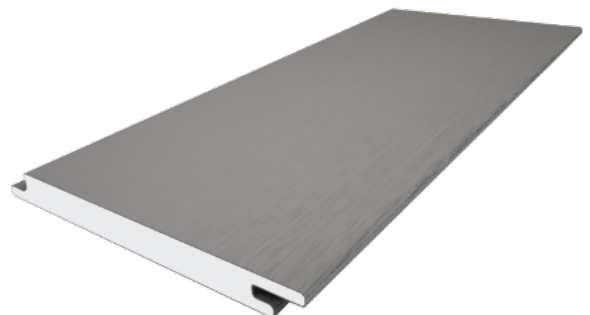

Our castellation range features 4-rib capped composite panels that add a striking decorative element reminiscent of the top of a castle wall.

Cellular Foam Cladding

Our cellular foam cladding system boasts a fire rating, made possible by the cellular PVC panels and aluminium parts.

*Approved where cladding remediation work is needed on high-rise buildings.

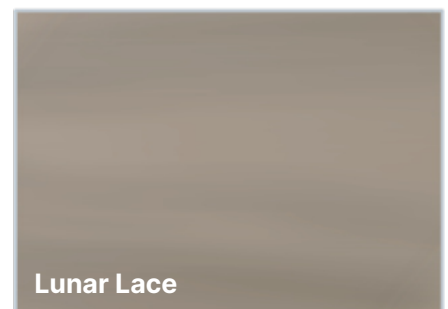

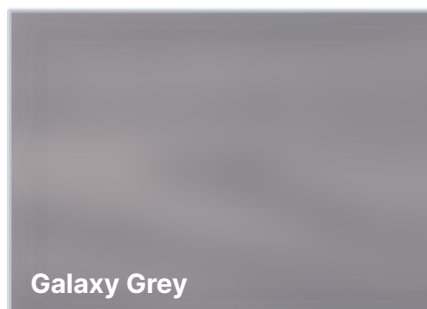

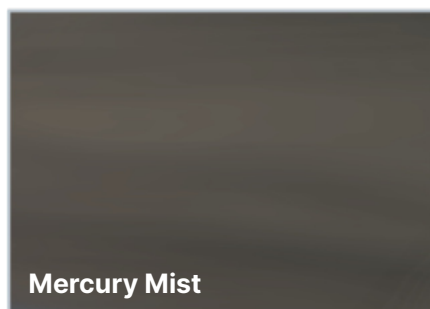

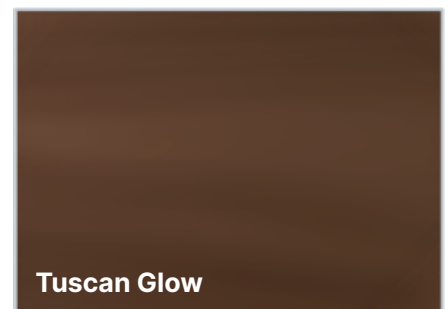

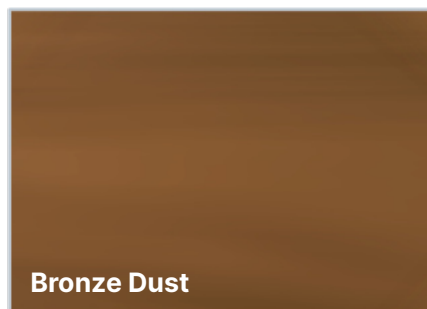

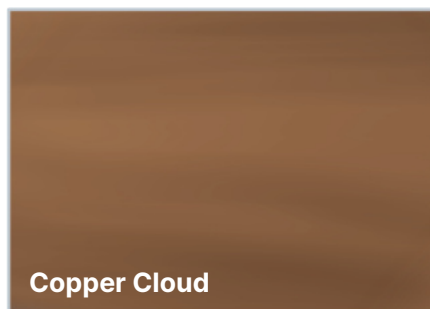

Cladding Colours

Alvic cladding is available in 6 shades — each adding its own striking effect!

Selecting the perfect cladding colour to complement your home can be tricky. That's why we carefully chose 6 striking shades that will enhance the aesthetics of any building type.

Each shade features our proprietary brushing technique to mimic the appeal of natural wood — adding both charm and sophistication to any façade.

*Displayed colours may vary from the actual product colour.

Sole provider of capped composite cladding — Made in Britain.

Our traditional - and castellation cladding features a wood composite core, wrapped in a multi-purpose capping that promises lasting protection.

Why Capped Composite?

Only wood composite cladding that's capped in a protective layer can provide complete protection against the elements — the key to honouring our 20-year warranty.

The secret lies in capping an already robust composite core in a multi-purpose protective layer — creating a durable product needing minimal maintenance.

Look for our
FSC®-certified products

Alvic = Sustainable

We only use FSC® certified wood in our wood composite panels!

Cellular Foam Cladding = Fire Resistant

Our cellular foam cladding boasts a cellular PVC core, wrapped in a hard-wearing acrylic capping.

The Benefits of our Cellular Foam Cladding

Fire rating

Excellent sound & heat insulator

Recyclable

Zero water absorption

Lightweight yet robust

Your Vision + Our Cladding = Perfection!

Alvic cladding shines in a multitude of applications and designs. Customise your design by using both horizontal and vertical applications or create eye-catching contrasts with various shades.

Cladding Panels & Parts

Decades of knowledge, research, and experience allowed us to create high-performance, premium-quality products backed by our trusted 20-year UK warranty.

We've designed each item with precision, keeping structural integrity and longevity top of mind. This dedication led to a cladding system that's reliable, durable, and easy to install.

Traditional Cladding Panel

Traditional Cladding System

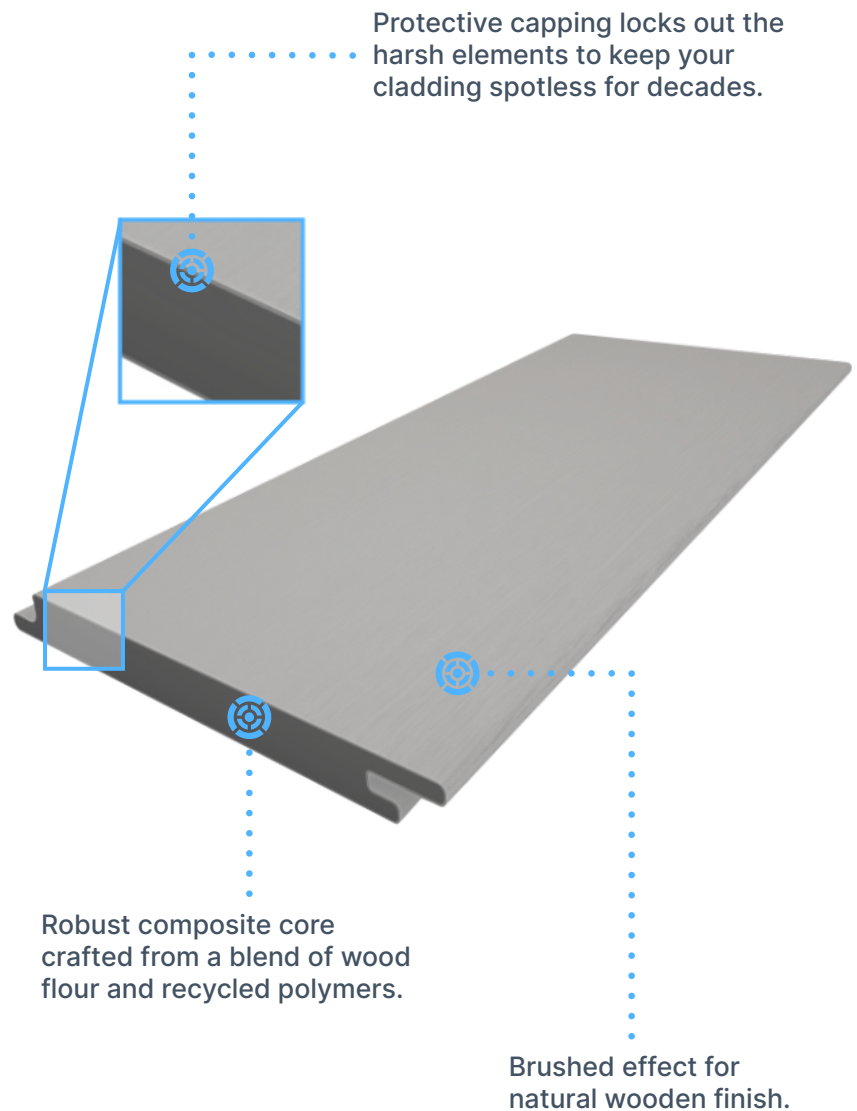

Traditional cladding panels are added to your structure either vertically or horizontally, depending on your required design.

Features:

- Won't splinter, crack or chip
- Mould & mildew resistant
- Fade & stain resistant
- UV & colour stability
- Waterproof
- Recyclable
- **FSC® certified**

*The forest-based material in this product is recycled.

20 YEAR

UK-based warranty

Dimensions

Length	Width
3600mm	148mm
Depth	
14mm	

Available Colours

Copper Cloud	Bronze Dust	Tuscan Glow
Mercury Mist	Galaxy Grey	Lunar Lace

*Displayed colours may vary from the actual product colour.

Starter Rail

Traditional Cladding System

Starter rails are fixed to your joisting system as the starting point for your first cladding panel.

Dimensions

Length	Width
3600mm	43.5mm
Depth	
42mm	

Crafted from aluminium for maximum longevity.

20 YEAR

UK-based warranty

Available Colour

Aluminium

*Displayed colours may vary from the actual product colour.

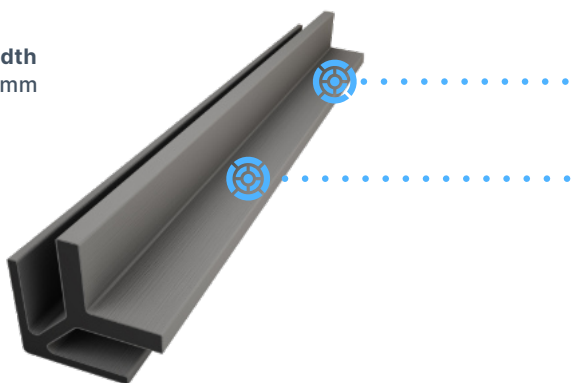

Outside Corner Trim

Traditional Cladding System

These corner trims are fixed to the joisting system on the outside corners of your wall. They're installed after your first set of cladding panels have been fixed into place.

Dimensions

Length	Width
3600mm	42mm
Depth	
42mm	

Protective capping with brushed effect to create natural wooden finish.

Robust composite core crafted from a blend of wood flour and recycled polymers.

Available Colours

Copper Cloud

Bronze Dust

Tuscan Glow

Mercury Mist

Galaxy Grey

Lunar Lace

*Displayed colours may vary from the actual product colour.

FSC® certified

*The forest-based material in this product is recycled.

20 YEAR

UK-based warranty

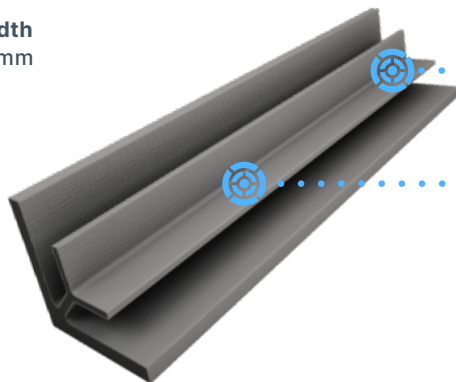

Internal Corner Trim

Traditional Cladding System

Internal corner trims are fixed to the joisting system where two walls meet in a corner — the centre point where the cladding panels slide into each side.

Dimensions

Length 3600mm
Width 65mm
Depth 65mm

Protective capping with brushed effect to create natural wooden finish.

Robust composite core crafted from a blend of wood flour and recycled polymers.

FSC® certified

*The forest-based material in this product is recycled.

20 YEAR

UK-based warranty

Available Colours

Copper Cloud

Bronze Dust

Tuscan Glow

Mercury Mist

Galaxy Grey

Lunar Lace

*Displayed colours may vary from the actual product colour.

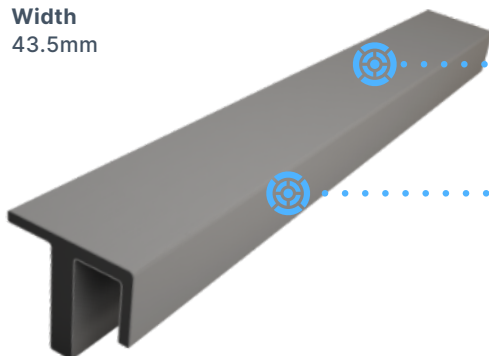

Finishing Trim

Traditional Cladding System

Traditional cladding finishing trims are multi-purpose, used as the finishing panel on the top and sides of the installed cladding and the trim used to finish the cladding around your window.

Dimensions

Length 3600mm
Width 43.5mm
Depth 26mm

Protective capping with brushed effect to create natural wooden finish.

Robust composite core crafted from a blend of wood flour and recycled polymers.

FSC® certified

*The forest-based material in this product is recycled.

20 YEAR

UK-based warranty

Available Colours

Copper Cloud

Bronze Dust

Tuscan Glow

Mercury Mist

Galaxy Grey

Lunar Lace

*Displayed colours may vary from the actual product colour.

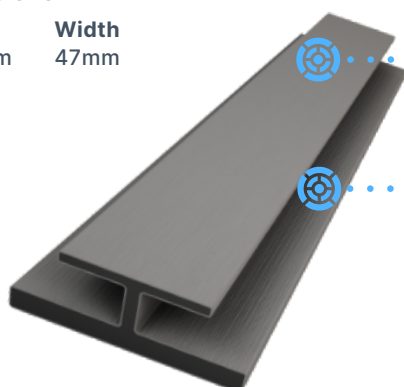

Joiner Trim

Traditional Cladding System

Joiner trims are fixed onto the joist at the end of a set of cladding panels to create the starting point for the next set of panels.

Dimensions

Length 3600mm
Width 47mm
Depth 29.1mm

Protective capping with brushed effect to create natural wooden finish.

Robust composite core crafted from a blend of wood flour and recycled polymers.

FSC® certified

*The forest-based material in this product is recycled.

20 YEAR

UK-based warranty

Available Colours

Copper Cloud	Bronze Dust	Tuscan Glow
Mercury Mist	Galaxy Grey	Lunar Lace

*Displayed colours may vary from the actual product colour.

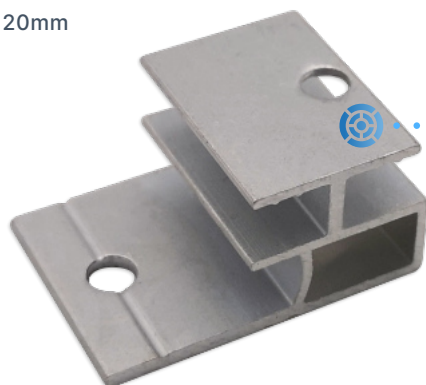

Clip

Traditional Cladding System

Clips are fixed to the joist in between each layer of cladding panels to indirectly fix the panels to the joisting system. Each clip also features a separate hole to fix (lock in) some panels directly to the clip.

Dimensions

Length 28.5mm
Width 20mm
Depth 14.8mm

Crafted from aluminium for maximum longevity.

20 YEAR

UK-based warranty

Available Colour

Aluminium

*Displayed colours may vary from the actual product colour.

Castellated Cladding Panel

Castellation Cladding System

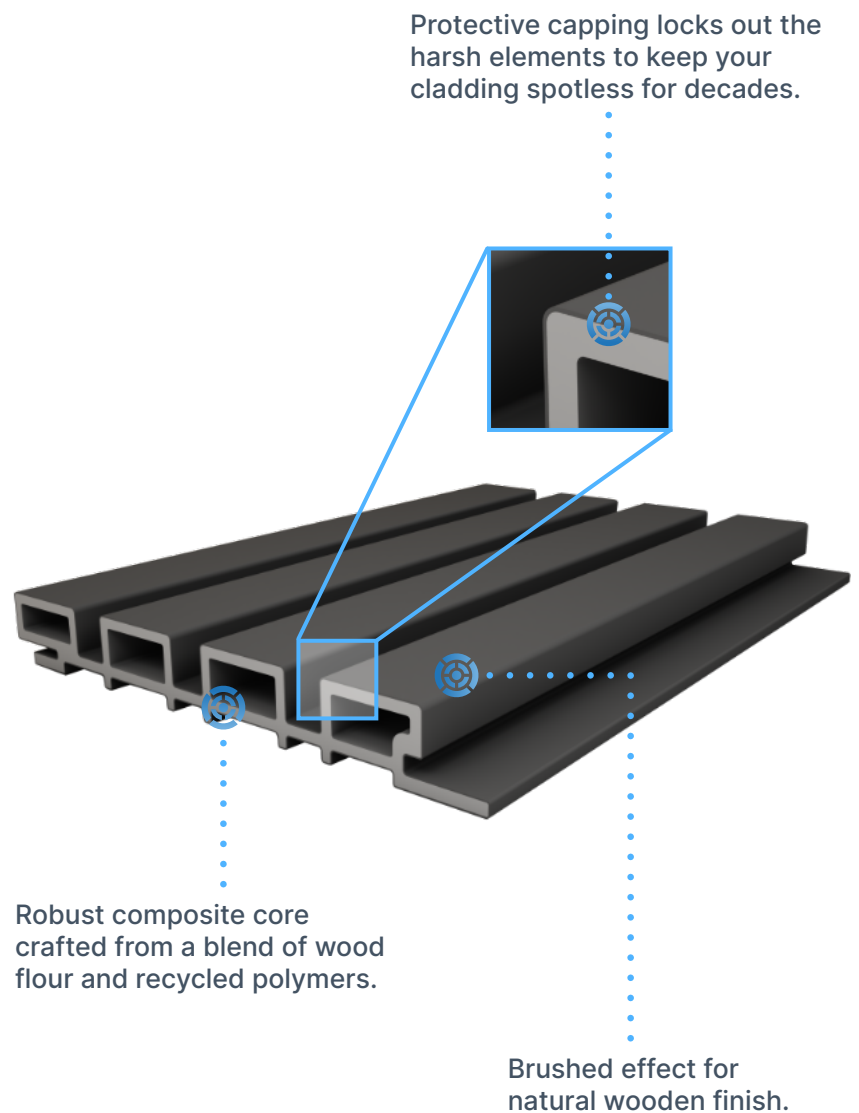

Castellated cladding panels are added to your structure either vertically or horizontally, depending on your required design.

Features:

- Won't splinter, crack or chip
- Mould & mildew resistant
- Fade & stain resistant
- UV & colour stability
- Waterproof
- Recyclable
- **FSC® certified**

*The forest-based material in this product is recycled.

20 YEAR

UK-based warranty

Dimensions

Length	Width
3600mm	208mm
Depth	
26mm	

Available Colours

Copper Cloud	Bronze Dust	Tuscan Glow
Mercury Mist	Galaxy Grey	Lunar Lace

*Displayed colours may vary from the actual product colour.

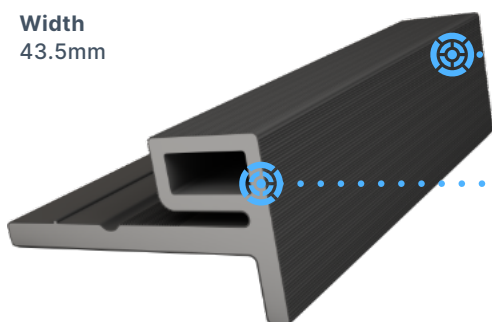

Starter Rail

Castellation Cladding System

Starter rails are fixed to your joisting system as the starting point for your first cladding panel.

Dimensions

Length	Width
3600mm	43.5mm
Depth	
42mm	

Protective capping with brushed effect to create natural wooden finish.

Robust composite core crafted from a blend of wood flour and recycled polymers.

FSC® certified

*The forest-based material in this product is recycled.

20 YEAR

UK-based warranty

Available Colours

Copper Cloud	Bronze Dust	Tuscan Glow
Mercury Mist	Galaxy Grey	Lunar Lace

*Displayed colours may vary from the actual product colour.

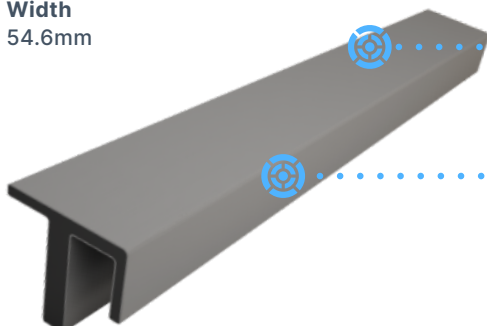

Finishing Trim

Castellation Cladding System

Castellation finishing trims are used as the first and last panel, installed at the outermost edges of your wall.

Dimensions

Length	Width
3600mm	54.6mm
Depth	
100mm	

Protective capping with brushed effect to create natural wooden finish.

Robust composite core crafted from a blend of wood flour and recycled polymers.

FSC® certified

*The forest-based material in this product is recycled.

20 YEAR

UK-based warranty

Available Colours

Copper Cloud	Bronze Dust	Tuscan Glow
Mercury Mist	Galaxy Grey	Lunar Lace

*Displayed colours may vary from the actual product colour.

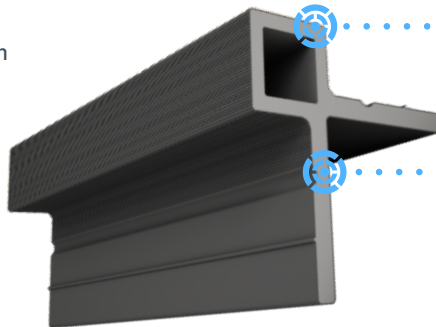

Corner Trim

Castellation Cladding System

Castellation corner trims are fixed to the joisting system on all the outside corners of your wall.

Dimensions

Length
3600mm
Width
100mm
Depth
100mm

Protective capping with brushed effect to create natural wooden finish.

Robust composite core crafted from a blend of wood flour and recycled polymers.

FSC® certified

*The forest-based material in this product is recycled.

20 YEAR

UK-based warranty

Available Colours

Copper Cloud	Bronze Dust	Tuscan Glow
Mercury Mist	Galaxy Grey	Lunar Lace

*Displayed colours may vary from the actual product colour.

Clip

Castellation Cladding System

Clips are fixed to the joist in between each layer of cladding panels to indirectly fix the panels to the joisting system. Each clip also features a separate hole to fix (lock in) some panels directly to the clip.

Dimensions

Length
28.5mm
Width

20 YEAR

UK-based warranty

Available Colour

Aluminium

*Displayed colours may vary from the actual product colour.

Cellular Foam Cladding Panel

Cellular Foam Cladding System

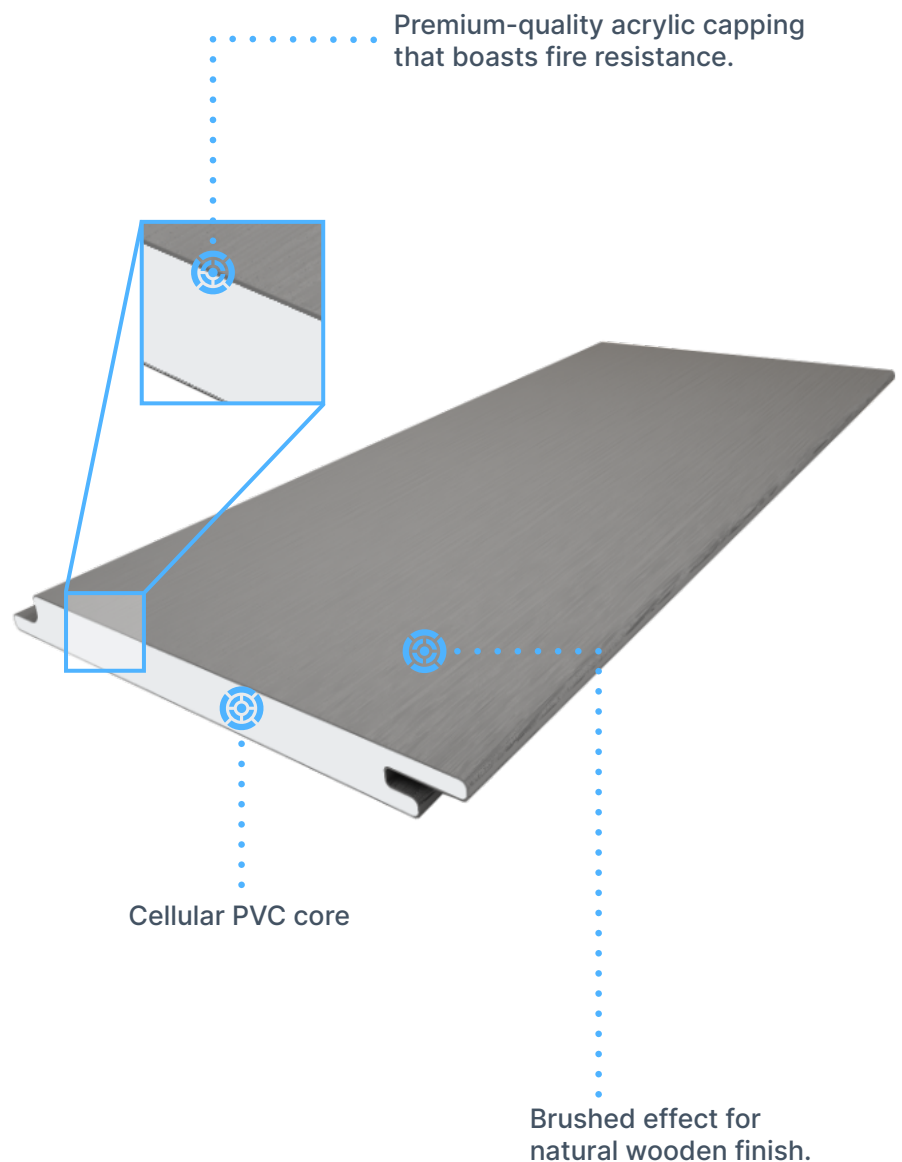

Cellular foam cladding panels are added to your structure either vertically or horizontally, depending on your required design.

Its cellular PVC core and protective acrylic capping creates a cladding panel that's fire resistant.

Features:

- Waterproof
- Recyclable
- Fire grading
- UV & colour stability
- Fade & stain resistant
- Mould & mildew resistant
- Won't splinter, crack or chip

20 YEAR

UK-based warranty

Dimensions

Length	Width
3600mm	148mm
Depth	
14mm	

Available Colours

Copper Cloud	Bronze Dust	Tuscan Glow
Mercury Mist	Galaxy Grey	Lunar Lace
