

THE CLEAR ONE – QT562

Very high bond foamed acrylic adhesive tape - Clear. Highly transparent structural bonding tape for use on many substrates including glass, perspex, metal and painted surfaces. Excellent clarity on transparent surfaces. High temperature and UV resistant, suitable for interior and exterior applications. Available in 0.5mm, 1mm, 1.5mm and 2mm thickness

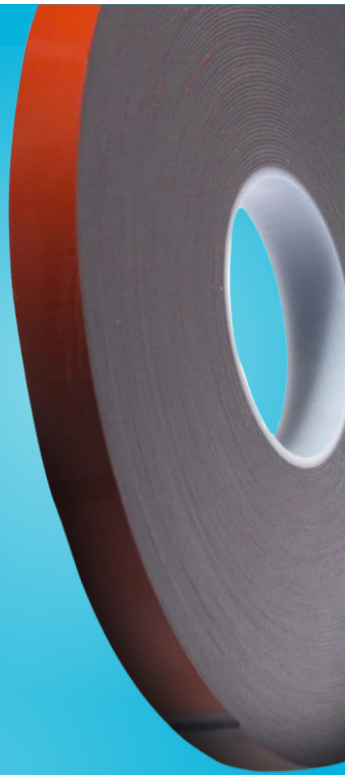

Sizes cut to width starting from 3mm up to 800mm Also available in Black and White

THE ALL ROUNDER – QT600G

Very high bond foamed acrylic adhesive tape – Grey. Versatile structural bonding tape for use on many substrates including metal, painted/powder coated surfaces and some plastics.

When used with SX100 accelerator, QT600G will bond permanently to powder-coated surfaces. High temperature and UV resistant, suitable for interior and exterior applications. 1mm thickness. Roll Length 33m. Sizes cut to width starting from 3mm up to 800mm

“CLEAN UP YOUR ACT”

Don't forget our multi-use surface cleaner for cleaning surfaces prior to applying tapes and adhesives.

ACCELERATOR, SEALER & PRIMER.

SX100 promotes the bond between tape and substrate where the substrate is difficult to bond to i.e powder coated surfaces.

PRESSURE ROLLER

For applying sufficient pressure to ensure maximum adhesion.

THE SIGN MAKERS FRIEND - QT910F

Clear acrylic thin bonding tape. Optically clear thin bonding double sided tape for general applications including plastic bonding, point of sale applications and decorative trims. Excellent high initial tack. High temperature & UV resistant, suitable for interior and exterior applications. 205 micron Roll length 50m Sizes cut to width starting from 3mm up to 1200mm
