

CPPL

**LEADING SPECIALISTS
IN ALUMINIUM
FABRICATION**

Here at CPPL, we supply bespoke aluminium panels and pressings. Using the 30+ years of construction industry experience that we have behind us, we have managed to build a reputation as one of the leading suppliers in the UK.

- Professional manufacture and supply service
- Aluminium Panels, Pressings, Louvres, Brackets and Perforated Panels
- A1 Fire Rated Insulation compliant to standard EN13501
- Nationwide delivery

HIGH PERFORMANCE INSULATED PANELS, PRESSINGS & LOUVRES

For any commercial building projects, CPPL are the company to call. We are aluminium fabrication experts and offer a bespoke powder coating service to cope with the demands of any project, no matter how simple or complex

Aluminium Insulated Panels

Aluminium Panels at CPPL are manufactured in our purpose-built factory to a high-performing standard, to meet all your façade requirements. All our insulated panels are bonded with a water activated adhesive and then vacuum pressed for a minimum of 45 minutes to ensure they are rigid and ready to be glazed.

Our panels can be provided in a range of finishes, from powder coated to anodised or trespas and plastisol finishes. Tray panels can also be manufactured to help achieve the U Value you require.

Aluminium panels

- Vacuum bonded with extra robust and durable adhesive
- Can be manufactured up to 4000mm x 2000mm
- Range of finishes including textured, brushed, anodized and in-house powder coated
- Excellent thermal efficiency performance
- Equally suited to low-rise and high-rise commercial buildings

WHY WORK WITH CPPL?

At CPPL, we manufacture and supply a selection of high-quality, insulated aluminium panels and pressings, which are A1 Fire Rated. This ensures they can create a fire safe, non-flammable shell on the exterior of any commercial premises.

- Professional service and product expertise
- Specialised team of fabricators, welders, CAD technicians and press break operators
- Capacity to work with any design specifications (any size, shape, application)
- 20,000sq.ft. Northampton factory
- Latest CNC machinery
- A1 Fire Rated panel manufacturing

EXTENSIVE PRODUCT RANGE

In addition to panels, pressings & louvres, we supply cladding, cills, stop-ends and soffits

OVER 30 YEARS EXPERIENCE

We have more than 30 years of experience within the construction industry.

NATIONWIDE DELIVERY

We deliver our products throughout England and the UK.

MANUFACTURED IN THE UK

We manufacture everything using our in-house machinery

A1 FIRE RATED INSULATION

The interior of all our panels is equipped with the best quality insulating material, such as Fabrock Insulation and Nexus Siderise Insulation. We also use A1 Fire Rated hard edging on all our panels. All A1 Fire Rated Insulation used by CPPL is compliant with the European Standard EN13501.

PERFORATED PANELS

At CPPL, we can manufacture perforated panels with a variety of different perforations and in a wide range of Anolok anodized and powder coated finishes.

Aluminium perforated panels for the best in protection and appearance

Aluminium is the perfect material for fabricating perforated panels. It is far more malleable than steel, making it easier to work with and much more versatile when it comes to creating bespoke and detailed designs. Unlike steel, aluminium is also rust resistant. This means that it will provide longer protection against adverse weather conditions without deteriorating either in appearance or protection capacity.

Our Anolok anodised finishes include Natural Silver, Bronze, Regency Gold, Black and Grey, which comes in a range of tones from dark to light. Anolok anodising is known for creating the most stylish finish available today, whilst it is extremely durable and corrosion resistant to withstand even the harshest weather conditions. Plus, our polyester powder coatings are available in any RAL colour, including a selection of metallic finishes.

PRESSINGS

Aluminium pressings from CPPL can be fabricated in both regular and irregular shapes and sizes, up to 4m. Our cladding, capping and cills are also designed and manufactured to meet your exact specifications.

Our aluminium pressings are versatile enough to fit the design requirements of any new-build or refurbishment commercial projects. From seamlessly welded stop-ends to extremely adaptable cladding, all our pressings are hard wearing and provide long lasting protection for your commercial property exterior.

CPPL high performing aluminium pressings

- **Cladding** – Square or shaped aluminium sheets perfect for contemporary refurbishments
- **Cills/flushing** – Trims and edging products to enhance and protect any building façade
- **Coping/capping/stop-ends** – Compatible with curves, irregular corners and tapered sections
- **Soffits** – Outstanding protection against moisture build-up and condensation

Louvres & Brackets

At CPPL, our louvres and brackets perfectly combine outstanding air ventilation and superior weather protection. They can be powder coated in any colour to complement any sections of curtain walling and cladding. They are quick and easy to install and can be specified in almost any size.

Louvres

Louvres from CPPL are ideal for a wide range of commercial applications. They can be fabricated to match the wall panel's thickness for consistency and are compatible with meshing to prevent bird or insect damage.

Great for improving weather performance and visual ventilation, they are equally effective in enhancing the appearance of a building due to their customization capacity.

Brackets

Every bracket we supply is totally bespoke to the requested design and reinforced to support the heaviest aluminium components. They can also be provided galvanised, in red oxide or powder coated to match the design and appearance of the panels and cladding they are supporting, for a completely seamless appearance.

Panels • Pressings

Thanks to our years of industry experience, we've had the pleasure of providing our products for use in various commercial projects throughout the UK. Feel free to browse our range of insulated panels and cladding panels here at cppluk.co.uk
