Better // Faster // Stronger

At Strongdor, we believe that the key to success is ensuring that the highest quality is achieved at every stage of the manufacturing process. A combination of skilled and accomplished craftspeople working in a custom built, 44,500 sq. ft state-of-the-art facility enables us to produce doors to an exacting standard time after time.

All our door-making processes are individually scrutinised, from welding and polyester powder coating to assembly and packing. Each door is checked at every stage. When complete, they are individually shrink-wrapped and stacked on bespoke pallets ready for delivery to you, on time and in budget.

STRONGDOR FACTORY

Bowness Public Conveniences.

Toilet Accessible Doors

When the district council earmarked the Bowness in Windermere public toilet block for closure, the Bowness and Windermere Community Care Trust stepped in with a bid to bring them up to scratch.

Chosen for its resilience, Steeldor was specified for the project. Easy to fit and maintain, the security doors were finished with stunning, highly colourful graphics that highlight the local wildlife and some of the Lake District's less well-known beauty spots.

Kirkby Stephen Business Park.

Personnel Entrance Doors

Kirkby Stephen Business Park is the brainchild of two local farmers, who pooled their energy, investment and resources to build new, bright, modern units for local businesses. They chose Steeldor for the new office units, maintaining security without compromising on looks.

These doors offered the perfect solution for this project incorporating letter boxes and Part M compliant vision panels, finished in the popular anthracite colour option.

Blackpool.

Fire Exit Doors

This conversion from a well-known Blackpool arcade into a public house is a success story that bears all the hallmarks of the owner's astute buying, pricing, high turnover and excellent brand awareness.

From the beginning of the project, Strongdor worked closely with the architects involved with the design, selection, supply and fitting of the best steel doors for the unusual and striking roof terrace restaurant.

What made this project particularly unique was the need to fit the panic bars to the outside of the double fire exits on the roof terrace, open to the renowned Blackpool weather and the beach-front saline environment.

FIRE-RATED STEEL DOORS

If the worst happens and fire breaks out, then seconds can make a huge difference. Independently tested and certified, Firedor has all the versatility and durability that you would expect from a Strongdor steel door, plus impressive test ratings up to two hours.

Suitable for both internal and external applications. CE marked to BS EN 1435-1 and EN 16034 standards.*
For fire and thermal ratings, look to Firedor Thermal for U-value as low as 1.5 W/m²K. Firedor Latchless and Firedor Smoke are your go-to solution for those high-traffic environments.

For the latest technical details for the Firedor range, simply click here.

* Please note only external fire doors are CE marked.

Ardmore Distillery.

Internal and External Fire-rated Doors

Nestled in the charming landscapes of Aberdeenshire, there lies a distillery celebrated for crafting world-famous Scotch whisky. Established in 1898, this enduring establishment is dedicated to the production of the finest Ardmore Whisky.

In a quest for durability that parallels the longevity of their historic building, the distillery turned to Strongdor for exceptional quality and visually striking doors. The choice was Firedor internal and external doors, selected for their certification and impressive 2-hour fire rating. Adorned in a sleek pure red finish, these door-sets complement the distillery’s aesthetic, combining both functionality and strength.

Securidor® Case study

Croydon Nihill Place.

Secured by Design PAS 24 Doors

Built by Bellway Homes in response to increased housing pressure and high property prices in and around London, Nihill Place consists of a range of one, two and three bedroom apartments.

The project's distinctive design makes use of striking yellow steel Securidor PAS 24 door-sets to complement the bright window panels. These practical doors offer excellent ventilation with Secured by Design louvre panels and provide high security without disrupting the buildings contemporary appearance.

ACOUSTIC-RATED STEEL DOORS

When it comes to keeping sound in or noise out, Acoustidor can be configured to meet your needs. With certified noise reduction of up to 39dB for Acoustidor and up to 56dB* for Acoustidor+, Strongdor leads the way in acoustic control.

*Subject to extended lead time.

St Luke's Birmingham.

Acoustidor+ Panic Exit Doors

Constructed in 1818, Birmingham's first gas works was bought by the Church of England. Its main function was the supply of gas to illuminate the dark streets. Now re-developed into a vibrant church named St. Luke's, Gas Street offers a different kind of light to the people of the city.

Strongdor worked with local contractors COS Shopfronts, supplying the project with three single Acoustidor+ fire exit doors. Acoustically rated to 42dB, these doors also included security astragals and low profile DDA-approved thresholds. The black powder coating complements the existing substantial ironwork.

Aviation Jet Test Centre.

Acoustidor+ Panic Exit Doors

Summit Aviation has been in the jet engine business for over 25 years. Based in Kent, they specialise in keeping jet engines ready for flight by offering maintenance, repair and overhaul services as well as supply, leasing and testing for second-hand units.

As part of the overhaul, the company ordered Acoustidor+ replacements for the substantial original metal door-sets. The oversized modern steel doors make it easier to transport the heavy engines in and out of the facility without compromising the acoustic damping required to meet noise pollution standards in and around the airport.

STRONGDOR

INNOVATIONCENTRE

10,500 SQ FT.

Situated at our original factory in Carnforth, Lancashire, the Strongdor Innovation Centre has been established as an additional site, dedicated to fostering innovative ideas and producing new products for our customers.

STRONGDOR
INNOVATIONCENTRE

"The doors will be opened to those who are bold enough to knock"

“

"In our unwavering commitment to innovation, over the past year and a half, we've engaged in extensive research and testing to improve our product offerings. This has resulted in the launch of our NEW Strongdor Innovation Centre located in Carnforth, Lancashire. This new centre houses a dedicated team of engineers, designers, and project managers who collaboratively work to transform innovative concepts into market-ready solutions, tackling the challenges posed by evolving legislation in today's market."

Terry James, Managing Director.
