

Calling hospitality businesses

We'll help you squeeze every drop of value out of your business utilities.

At a time when business overheads are rising, don't let your utilities be an unnecessary drain on your profit margins. Instead, switch to Everflow and we'll help you minimise the impact of rising water, waste management and connectivity costs.

Why hospitality businesses choose Everflow

Save time

We take the hassle out of managing your utility contracts so your team can focus on what they do best.

Save money

We save customers hundreds or even thousands of pounds a year by switching to us. We'll help you stay ahead of rising costs and make it easier to plan for the future.

Save water

We help you lower consumption, reduce leaks and save thousands of wasted litres per year.

Save on landfill

Our waste management services are designed to help you optimise collections so it's easier to do your bit for the planet.

As a hospitality business you naturally **use more water and generate more waste** than most industries, so every utility price increase hits that bit harder. That's why it's important to shop around for a better deal.

Understand your water usage and make serious savings with an Everflow EcoMOT

Our EcoMOT service audits your business water supply to identify leaks, spot water-saving opportunities and help you reduce your environmental impact. EcoMOTs are designed to lower your bills and your annual carbon emissions.

Does your business have multiple premises?

Then make your life easier – we can be your single water, waste and connectivity provider, providing consistent billing and support across all your locations via a single, easy-to-use dashboard.

Case study:

Buckingham Arms

By retrofitting a number of water saving products for this pub and restaurant we helped this small business achieve immediate results, including:

56%

reduction in
water usage and
carbon emissions

Business waste management: don't settle for a rubbish service

We work hard to help you beat recent price hikes on waste disposal. Plus, our customer service team is among the most responsive in the industry.

Let us help tackle your carbon emissions

Our service includes the offsetting of carbon emissions associated with the collection and disposal of your waste. These high standards help you to reduce your Scope 3 emissions and prioritise sustainability.
