

About MULTIVAC UK

MULTIVAC UK, based in Swindon, was founded in 1984 and is a daughter company of **MULTIVAC** Group. Globally, Multivac is one of the leading equipment manufacturers for food, life science, healthcare and industrial items. The **MULTIVAC** portfolio covers the complete packaging solution; from up-stream portioning and processing equipment, to its well-known packaging technologies, automation solutions and end-of-line labelling and quality control systems.

MULTIVAC UK holds an accredited Local Innovation Centre status, which was awarded in September 2023. The newly renovated space gives customers the opportunity to trial products for NPD and hosts a temperature-controlled room, full line machine solutions and a supermarket area, to showcase the latest innovations on the market.

Materials

As a supplier of all grades of films; from the most economical to the most advanced forming and lidding systems, **MULTIVAC's** bespoke film solutions are used extensively in MAP, Vacuum, Skin and other flexible packaging applications.

MULTIVAC UK has a team of experts, The Right Pack Consultancy, who can help you make the right decisions for your business and your customers. With legislation in mind making sustainable packaging an easy reality for your business.

Technical Services

MULTIVAC has a dedicated technical sales team and over 60 regional service engineers across the UK, who deliver a fast, effective machine service as possible and support the materials department. All customers can also utilise our technical help desk to quickly diagnose and rectify a fault.

Small but mighty: The Compact Series from MULTIVAC UK

The perfect solution for start-up and scale-up businesses entering the market or looking to improve existing products. All machines are available for free product trials at the MULTIVAC UK Innovation Centre, with readily available stock.

Packaging

Thermoformers

Starting at just 2m long and with a model to suit every application and budget, MULTIVAC can deliver maximum efficiency at minimum cost for MAP, vacuum, air and skin packs (Multifresh™).

Traysealers

MULTIVAC's Compact Series of traysealers offer solutions from tabletop up to the first automatic machine in our lineup (still under 2.5 m long), including air and skin packs.

Chamber Vacuum Packaging

From Table-top to Swing-lid and Belt-fed machines MULTIVAC can provide vacuum and MAP packs for a range of products. Our machines are the industry standard: easy to operate, clean and service whilst offering the highest output with the smallest footprint.

Processing

MULTIVAC UK is proud to be in partnership with a range of processing equipment manufacturers including Laska, Risco, Schröter and Metalquimia. Including compact bowl cutters, mixers, grinders, injectors, tumblers, cookers, smokers, vacuum fillers and more.

Slicing & Portioning

Slicing

The Compact Series of slicers from MULTIVAC are designed to be an affordable and reliable solution in a small footprint, slicing for consistent, accurate results across a variety of applications.

Portioning

When using the TVI GMS 400, you always get the most out of your primals, be they pork, beef, lamb or anything else. With its unique 3D pressing technology, we can shingle slice at 99% prime yield with perfect presentation, always giving you one more steak.

End of Line

The L 300 conveyor belt labeller can apply labels from above, below and over edges. It has a small footprint and is a cost-effective solution for standard labelling tasks.
