Freshness meets efficiency

Smeg Professional cabinets ensure food freshness with fast temperature recovery and uniform cooling.

Evaporator and air conveyor for uniform cold distribution

The cooling system with external cavity evaporator and air conveyor ensure even cooling, reduce temperature fluctuations, minimise food waste, and simplify maintenance for lower costs and easier servicing.

Optimised insulation for maximum thermal efficiency

Thick insulation and reinforced seals ensure thermal stability, boosting energy efficiency and lowering running costs.

Sustainable performance

Smeg Professional focuses on sustainability and energy efficiency, offering reliable and durable products designed to ensure high performance and long-term operational efficiency.

Optimised insulation

Natural refrigerant gas

Energy-saving activation

High energy efficiency

Reliable construction

Hygiene and cleaning

In professional kitchens, quick and efficient cleaning is essential. Smeg Professional refrigerated cabinets ensure impeccable hygiene with minimal effort.

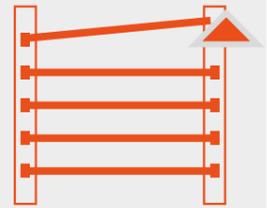

Rounded edges prevent dirt build-up and make cleaning easier.

AISI 304

AISI 304 stainless steel resists dirt and bacteria thanks to its smooth, non-porous surface.

Quick-release shelf supports to simplify cleaning operations.

Sturdy door design

Door with automatic closing and lock for maximum security. Reversible aluminium handle, scratch- and corrosion-resistant, designed for heavy use. 120° door stop eases loading and unloading.

Flexibility of use

Adjustable shelves (up to 24 positions) and choice of racks or moulded sides for maximum versatility. Available with stainless steel feet or castors, suitable for various settings.

AISI 304 stainless steel

Exterior and interior made entirely of AISI 304 stainless steel with Scotch-Brite finish, ensuring durability, resistance, and protection against rust and oxidation even in tough conditions.

Minibars

Comfort and performance

The Smeg Professional minibars combine comfort, quiet operation, and energy efficiency. Compact but spacious, they're ideal for hotel rooms, offices, and hospitality spaces. Their smart design and reliable performance enhance user experience and optimise space.

Minibar FAB5: compact, with an unmistakable style

Designed to complement hospitality areas in offices, hotels and living spaces, this compact mini fridge combines practicality, dependability, and a distinctive 1950s-inspired design.

The FAB5 minibar is equipped with the innovative Ecosmart system, which automatically adjusts compressor activity according to guest presence, reducing noise and further enhancing the overall experience.

Silent for maximum comfort

Compressor free, they operate entirely without noise, ensuring a discreet presence in any room. This feature allows guests to enjoy a peaceful and comfortable stay, while providing hoteliers with a reliable and practical solution that upholds the highest standards of comfort.

Wine Cooler

Flavour-preserving excellence

Wine tasting is a sensory journey – an art that engages sight, smell and taste. Whether white, red, still or sparkling, wines deserve to be stored in optimal conditions to preserve their essence, character and quality.

Control of humidity

The activated charcoal filter keeps the air clean, protecting the wine from external odours. Adjustable ventilation ensures the ideal humidity level for optimal storage conditions.

Protection from vibrations

Even the most imperceptible vibrations can negatively affect the wine. Smeg wine cellars are designed with a cooling system that minimises vibrations, thus preserving the wine's quality in every detail.

Temperature regulation

Thanks to the electronic control system, it is possible to set a temperature and maintain it consistently, thus preserving the quality of the wines.

Exposure to light

The Eclipse black glass, elegant and UV-protective, provides transparency when the light is on and total darkness when off. The LED lighting, activated from the inside, ensures perfect visibility.

The beauty of performance.

There is a distinctive beauty in the operation of Smeg Professional equipment, born from the precision of its design and engineering. Every element is created to function flawlessly, reflecting the harmony between form and function. The elegance of its performance lies in this perfection, where every detail is refined to ensure efficiency, reliability, and exceptional results.
