Unit designed to be built-in/dropped in on a work top. Can also be welded from underneath. Features **rotating heating elements** in each tank, whose movement enables easy cleaning of the empty tank and ensures simple and accurate maintenance. **Fast and efficient** heating of the oil through the high-performance heating element while the intuitive control system allows simple and precise temperature management. Furthermore, the presence of a security thermostat guarantees reliable and safe use of the deep fryer.

### Standard specifications

- Moulded tank and drop-in frame in AISI 304
- Heating element:
  - Tubular heating element brazed on a specific nozzle for oil tanks
  - High performance for fast and efficient heating
  - Single phase or tri-phase connection
  - Stainless steel heating element
  - Rotating heating element for easy cleaning
- Thermostat:
  - Thermostat to set the operating temperature
  - Safety thermostat for the protection of the unit
- Accessories:
  - Nichel-chromed basket with handle in Bakelite
  - Nichel-chromed protection grid
  - Stainless steel lid
- Electrics/electronics:
  - Power connection box and wired electrical parts

### Spare parts

All units come with built-in drawing, exploded view and list of components

### Optionals

- Oil collection container with metallic filter
- Stainless steel basket with handle in bakelite
- Electrical testing of unit
- Dedicated cardboard packing
