

2026 Catalogue

The biggest selling Christmas lights in the USA, made especially for the UK market

C9 lights

The most popular Christmas lights in the US due to their versatility. Cut to any size, re-use the off cuts, adapt easily and perfectly to any property's architecture. Ideal for outlining driveways and lighting trees.

Garlands & Wreaths

Uniquely made with dual chip LED's on the tips, and almost invisible cable. Warm white and ice white as well as American multi-colour. Male/female connectors so you can add multiple sets together end to end.

Accessories

Giant bows in red and green with wired edges so they hold their shape, perfect for complementing a garland or wreath display.

What's it all about?

What exactly is American Christmas? Is it an American company trying to sell their decorations into the UK?

Not quite, we're actually a UK company that specialises in taking the biggest selling decorations on the US market and making them for the UK market.

Let's face it, when it comes to Christmas, no one does it better than our friends across the pond. In 2005, English husband and wife, Nick & Sarah Bolton started The Christmas Decorators in the Colorado Rockies. This, brought back to the UK, then became the UK's biggest Christmas decorating company. They have now created the brand "American Christmas" making these fab decorations available to the UK consumer.

There's no messing around with bulky, expensive transformers! All products have specifically been made to UK voltages and are fully certified for the UK.

We manufacture at our factory in China, who have been working for us for almost two decades and quality is at the forefront of everything we do. Our warehouses in Liverpool are fully stocked and our distribution team ready to dispatch year round.

Pre-lit Giant Wreaths

Made for indoor and outdoor use, creating a classic look

Pre-lit Garlands

Made for indoor and outdoor use, connectable to create long lengths

Here's a thought! Every year £850million of c9 Christmas lights are sold in the USA! So why don't we have them here in the UK? Now we do!

Supporting POS displays

Christmas lights made to fit

America's most popular Christmas lights, now available in the UK

The only Christmas lights that you can cut to fit your property EXACTLY!!!

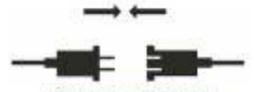

American Christmas Lights Made for the UK!!!

Measure the size required

Cut anywhere for exact size

Connect multiple sets and re-use off cuts

Just watch how easy it is!!!

We understand the importance of good product support and marketing. When we partner with a retailer we want to ensure that all of our products sell. Beyond our competitive pricing, it's vital that all items are displayed properly.

We have created a selection of POS displays, most of which come complimentary with minimum purchase orders. For partners with a lower order value we will be happy to provide these at cost.

Furthermore, for partners who spend over £10,000, we will provide a display of our products fully installed in your premises, free of charge. All installations will need to be completed by 10th September.

Integrated video screen playing informative videos about the product, with volume as well as captions.

QR code for customers to scan to watch and download "how to" videos.

Pre-lit Garlands & Wreaths With DualChip Technology

Warm White to Ice

Get the best of both worlds with our large pre-lit wreaths that have dual chip LED's, allowing you to swap between 2 colours whenever you fancy a change!

- 48 inch diameter
- Indoor & Outdoor Use
- 160 Dual Chip LED's on hidden cable
- Long Life Superbright LED's
- Connectable to other items
- UV Stabilised PVC that won't fade
- Galvanised steel that won't rust

Warm White to Multicolour

Also available as a 24 inch Door wreath.
· 50 LED's
· Commercial battery pack
· Timer controller

Available in Warm White & Ice White
Warm White & Multicolour

Garlands also come in dual chip LED's and are available as plug in or battery operated.

- 9ft long with male/female connectors to extend upto 10 lengths
- Indoor & Outdoor Use
- 80 Dual Chip LED's on hidden cable
- Long Life Superbright LED's
- Connectable to other items
- UV Stabiised PVC that won't fade
- Galvanised steel that won't rust
- Twine backed so won't scratch any delicate surfaces

'Plug in' Garlands

Our garlands are made to the highest specifications.

The lights are specially designed to fit down the rear spine with each LED attached to the tips. This means that you don't see any ugly cabling as you normally would on any other garland.

All metal is galvanised meaning that it won't bleed rust if it's outdoors.

The tips are all attached to the core with a twine, so anything that it's attached to won't get scratched.

Specs:

- 9ft (275cm) long
- 280 x 14cm tips
- Flame retardant PVC
- Indoor/Outdoor use
- 230 volts
- 80 dual chip LED's
- Connect up to 20 garlands

Uses:

- Over fireplaces
- Around doorways
- Banisters
- Building Facades
- Around windows
- Building entrances

Dual Chip LED's

What are dual chip LED's?

This is when an LED light has 2 chips encased inside it. The customer gets to choose which chip lights up, whenever it suits them. As the years pass, you can change your mind as to what colour you have depending on what takes your fancy at the time.

There are two types of dual chip LED's to choose from.

- Warm White / Ice White
- Warm White / Multi Colour

£38.97 each based on 70 on a pallet, with carriage paid
£41.17 each based on small qty orders, min 8
+ VAT
Can be mixed LED colours and plug in and battery operated
RRP £69.99 - £79.99

Mains voltage garlands have a male at one end and a female at the other. This allows the customer to add multiple garlands together should they need to.

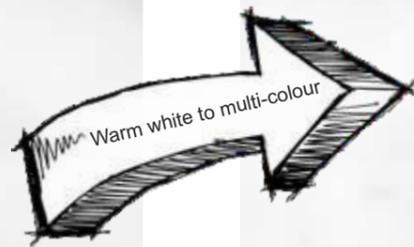

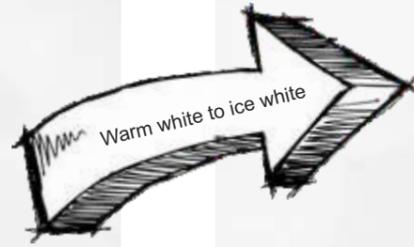

It's simple 'plug 'n play' and only takes seconds!

'Battery Operated' Garland

No need to worry about finding a socket nearby with these fantastic battery operated garlands. The latest technology allows the LED's to remain lit for 50 days without losing any of their brightness.

The lights are specially designed to fit down the rear spine with each LED attached to the tips. This means that you don't see any ugly cabling as you normally would on any other garland. All metal is galvanised meaning that it won't bleed rust if it's outdoors. The tips are all attached to the core with a twine, so anything that it's attached to won't get scratched.

Most people shy away from battery operated lights because they are either not bright enough or the batteries just don't last.

We have been fine tuning the technology we use within our chips to create a balance between brightness and duration.

When you first turn on the lights within these garlands they will remain on for 10 hours and then

automatically switch off for 14 hours. They will then repeat this process for over 60 days until the batteries eventually run out. They won't dim over time, they will just run out, on or around the 60th day.

e.g. If you first switch them on at 2pm they will remain on until midnight. They will repeat this process for around 60 days.

The battery pack can easily be hidden inside the garland.

Large 'plug in' Wreaths

Our giant pre-lit wreaths are manufactured to the highest specifications. The lights are specially designed to fit down the rear spine of the metal ring with each LED attached to the tips. This means that you don't see any ugly cabling as you normally would on any other wreath. All metal is galvanised so it won't bleed rust if it's outdoors in the rain.

£96.38 each based on 20 on a pallet, with carriage paid.
Can be mixed LED colours
£103.22 each based on small qty orders, min 8
+ VAT

RRP £199.99 - £229.99

Specs:

- 48 inches (122cm) diameter
- 350 x 14cm tips
- Flame retardant PVC
- Indoor / outdoor
- 230 volts
- 160 Dual chip LED's
- Male / Female connector

Uses:

- Gates
- Walls
- Building Facades
- Apexes

24 inch battery operated

These wreaths are ideal for front doors, on window frames and over fireplaces.

Made from a mixture of PE and PVC the tips are attached to a steel frame that gives this wreath dimension.

The LED's are wired into the greenery and are operated by a battery pack that will last for the whole festive season. When first switched on, the lights will remain on for 10 hours and then go off for 14 hours, repeating the process every day.

£24.80 each based on 40 on a pallet, with carriage paid.
Can be mixed LED colours
£28.10 each based on small qty orders, min 8
+ VAT

RRP £49.99

Available in your own branded box for minimum orders of 100 pieces.

Specifications can be made bespoke for all pre-order customers. For example, 200 LED's with 20% twinkling, or dual chip LED's with multi colour and warm white.

Large Luxury Bows

The perfect accompaniment to any garland or wreath is a luscious giant bow.

They come in three sizes of small - ideal for your door wreath, medium for your gate or apex wreath and extra large if you like to 'go big or go home' they look great on your garlands too and add immediate impact to any decor.

They are a luxurious velvety fabric with wired edges to create that perfect sculptured loop and tail. With hand wrapped wire ties on the back they can easily be attached to your wreath or garland with a simple twist.

SMALL - 40CM X 50CM
£10
RRP £19.99

MEDIUM - 65CM X 100CM
£17.42
RRP £29.99

LARGE - 75CM X 120CM
£24.87
RRP £49.99

GIGANTIC - 140CM X 300CM
£278
RRP £650

Christmas Red

Emerald

c9 lights

The biggest selling Christmas light in the USA

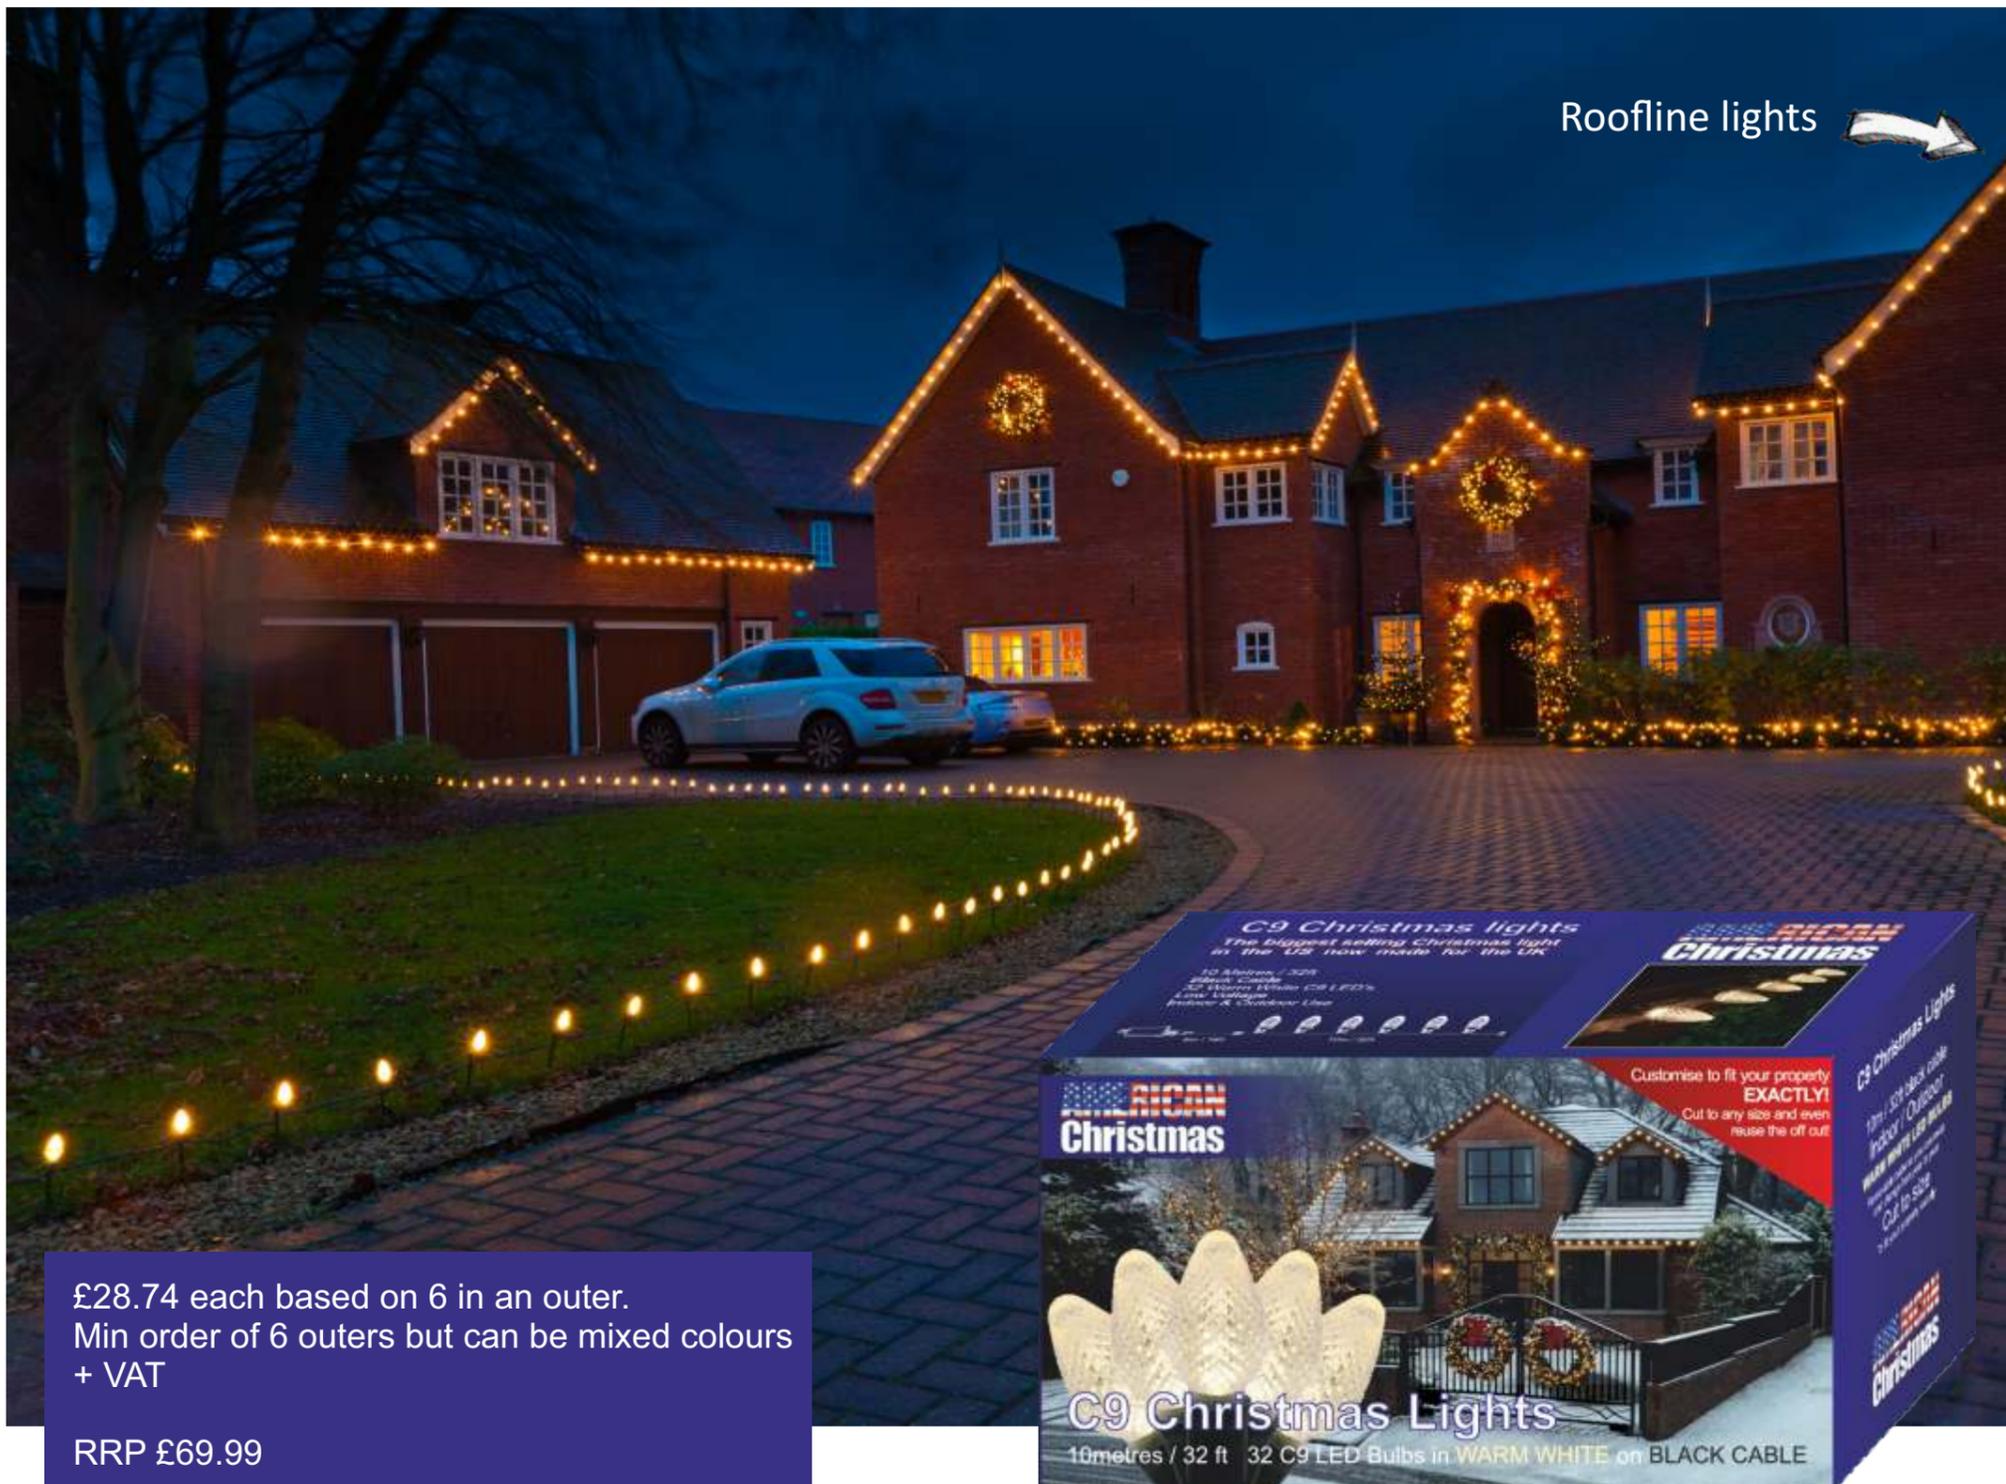

These lights are a game changer and we are the only manufacturers of them for the UK market. In the US over £350m a year of c9 lights are sold! What makes these lights so special is that they are totally adaptable and can be cut to any size. You can even reconnect the off cut if you wanted to.

If you look at the home below you will see how the lights fit perfectly to the property. There is no other light in the UK that would enable you to do this.

Specs:

- Available in black and white cable
- 24volts
- Removable bulbs
- Connect up to 140ft
- Cut to any length
- Reconnect/reuse off-cuts
- Indoor/Outdoor use

Roofline lights

£28.74 each based on 6 in an outer.
Min order of 6 outers but can be mixed colours
+ VAT

RRP £69.99

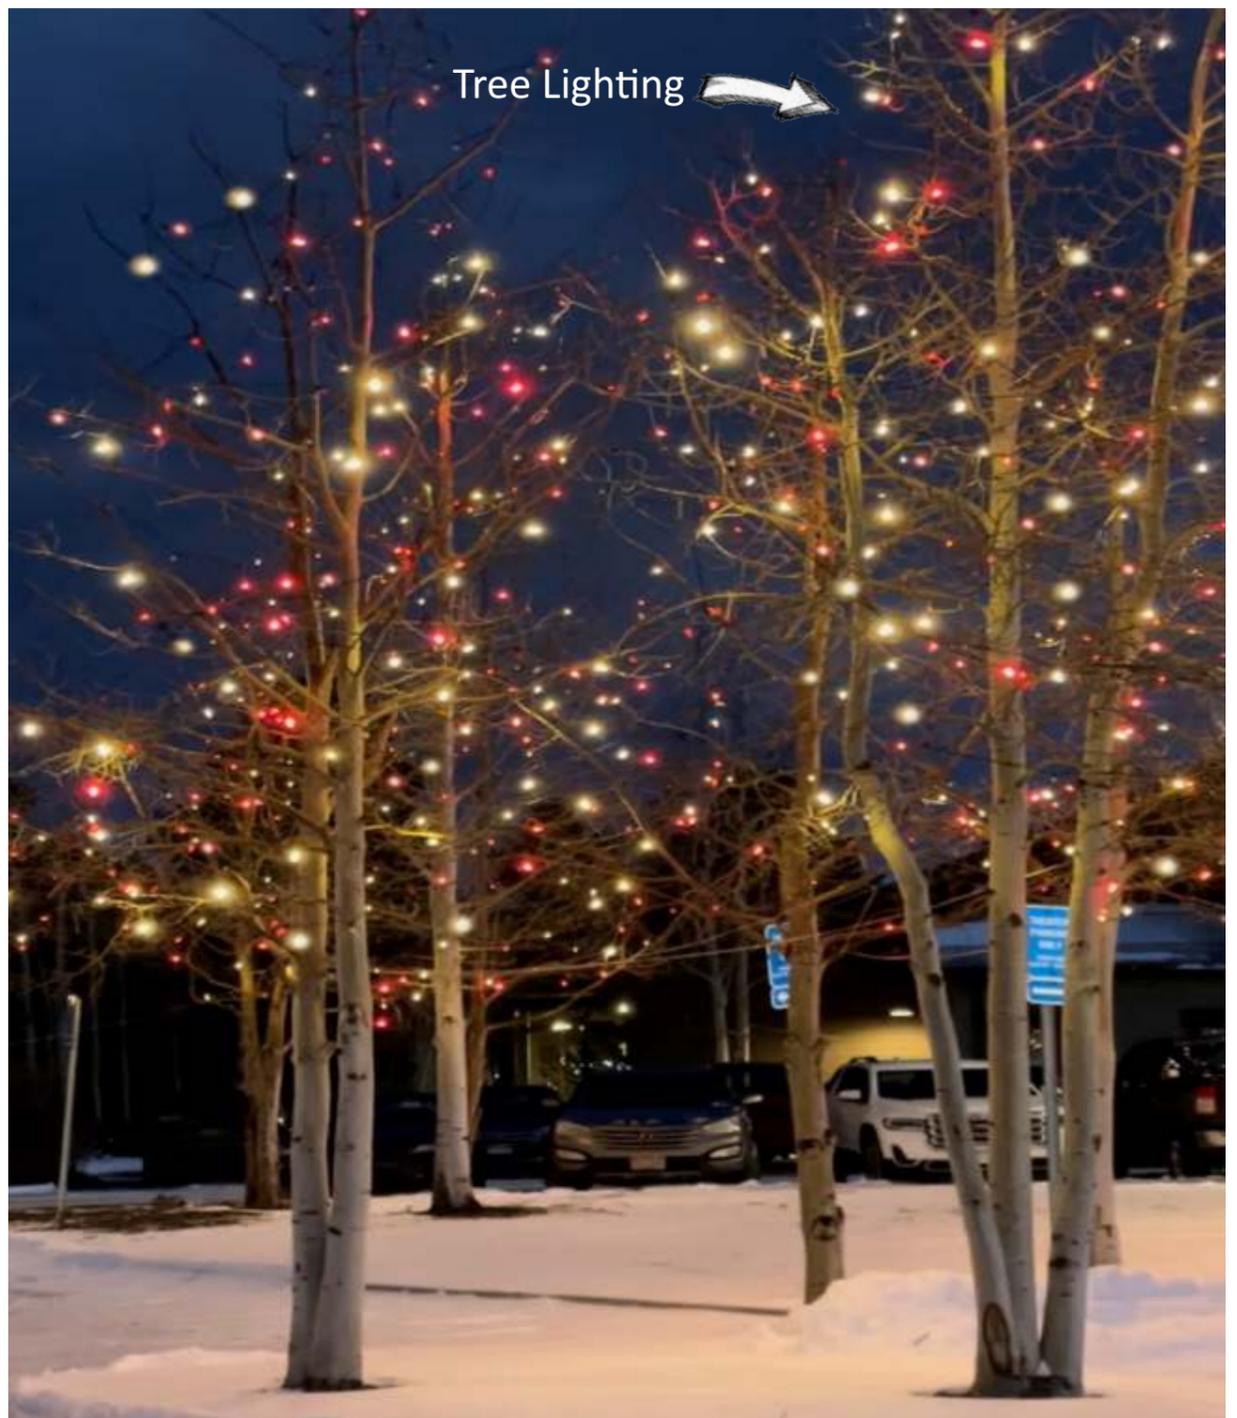

Filament LED c9 Bulbs

It took years to create an LED bulb that replicates the look and feel of the old fashioned traditional filament bulb. We now offer a range of colours which can be screwed into your c9 sockets in any arrangement of colour to suit the customer.

Diffused cap c9 Bulbs

It's a matter of taste, rather than right or wrong! Some people prefer the appearance of the diffused cap c9's which give a fabulous glow whether you go for warm or ice white. The bulbs are lit by 3 high performance 24volt SMD chips, with a life span of 20,000 hours.

C9 light spools

500ft rolls on black or white cable

For partners who are looking to retail C9 lights that go beyond standard retail packaging, these C9's come on a spool of 500 sockets on 500ft. They can be sold as an entire spool or custom cut for clients by the foot.

SPT1 wire on black or white cable - 250ft

This cable is used in conjunction with the vampire plugs and sockets below to form custom made cables making it possible to jump from one part of a property to another connecting with additional sections of C9 lights

Clip on vampire sockets and plugs

These small plugs and sockets along with the SPT1 cable and the secret to making an impressive looking Christmas lights display. No need for any tools, they simply clip on the C9 lights cable or SPT1 cable allowing the freedom to create a perfect display.

Commercial grade C9's

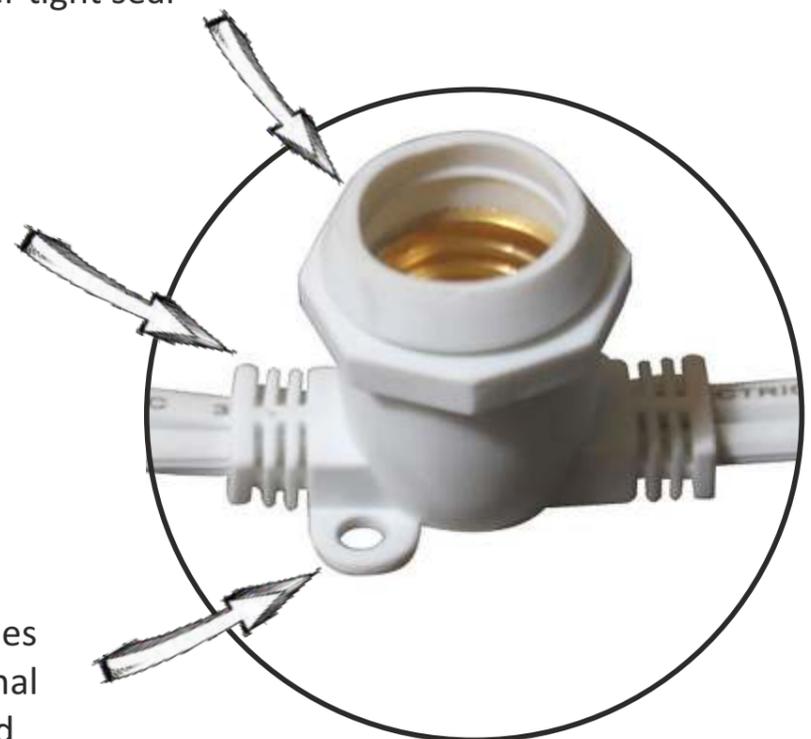

250ft rolls on black or white cable

Festive lights are becoming more popular all year round. For a more robust light that can be left in situ and exposed to the elements year round, this commercial grade C9 light is the best option. These lights are used in conjunction with standard SPT1 cable and vampire plugs and sockets.

Rubber gasket that compresses against the bulb as it's screwed in, making for a water tight seal

Sockets are machine moulded onto the cable

Moulded screw holes offering an additional attachment method

500ft C9 spools £146.54 RRP £399.99

250ft SPT1 Cable roll £43.52 RRP £79.99

250ft Commercial C9 Spool £162.57 RRP £399.99

Vampire socket 53p each, 50 in a pack

Vampire plug 53p each, 50 in a pack

Transformer plug £7.89 RRP £14.99

Only one is required to power up to 120 C9 bulbs

All costs are subject to VAT

Jumbo C9's

These jumbo c9's are a great novelty product and unique in the UK market. The large blow moulded cap houses a standard c9 bulb. Available in 6 colours and connectable up to 50 bulbs from one transformer. Each has a 50cm green cable with a male and female waterproof connector.

Red, Green, Blue, Orange, Purple, Yellow

£8.27 each based on 9 in an outer.
Min order of 3 outsers but can be mixed colours
+ VAT

RRP £19.99
