Glass and dishwashing machines for commercial applications

Founded in 1985 in Castelfranco Veneto, Italy, DIHR is a leading manufacturer of warewashing machines, distributing their equipment in over 120 countries. In its high-tech plant, DIHR covers the complete manufacturing process, from the stainless steel cutting and fabrication to final product assembly.

The DIHR product range includes, glasswashers, undercounter, hood-type, utensil, rack and flight dishwashers. These products are designed with a strong emphasis on providing customised washing solutions. DIHR's vision is to minimize the use of environmental resources and reduce customer operating costs.

The Dibr Range

Premium Glass and Dishwashers

Electron Series

The latest generation of high performance DIHR glasswashers, dishwashers & hood-type machines. The Electron range includes full double skin machines through the range, designed to be silent and reliable.

The range offers a minimum of four programmable cycles with the 'Plus range' guaranteeing the rinse temperature and pressure. Available with the option of an automatic water softener.

Options in the Electron range include Hygiene +, Heat Recovery, & Connectivity 4.0.

Hygiene+, offering superior features, including 2 extra wash cycles, allowing the machine to perform at a higher temperature and for longer, which will eliminate nearly all bacteria. A great option for healthcare settings or where higher levels of hygiene are required.

Heat Recovery, ensures optimum efficiency, eliminates hot air escaping into the environment, thus improving working conditions for the user and reduces energy costs.

Connectivity 4.0 means you can connect to your dishwasher where you are, with just one click. This allows the user to monitor the work phases, review error codes, remotely reconfigure parameters and ensure HACCP compliance. In case of a problem with the machine the user is notified immediately and a technician could access remotely to diagnose and potentially solve the problem.

Double Skinned Glass and Dishwashers

DS T Series

The glass and dishwashers of the DS T series are designed to meet the needs of many customers, including restaurants, hotels, bars and bistros. These double skin machines, offer high performance, improved wash control and electronic touch controls. The DS range can be paired with an external softener if required.

The LED panel displays the tank and boiler temperatures, the status of the wash cycle and the main error codes. Four different washing programs allows you to perfectly tailor the performances of the machine to the items that need to be cleaned.

HT 11 I T Series

The HT 11 I hood-type dishwasher is ideal for bars, pubs, restaurants and hotels. The insulated hood reduces noise, whilst continuing to offer high performance at a reasonable cost. HT 11 I can be paired with an external softener if required. The LED panel displays the tank and boiler temperatures, the status of the wash cycle and the main error codes. Four different washing programs allows you to perfectly tailor the performances of the machine to the items that need to be cleaned.

The Dibr Range

Single Skinned Glass and Dishwashers

GS T Series

The glass and dishwashers of the GS T series are ideal for bars, pubs, restaurants and hotels. These single skin machines, offer high performance at a reasonable cost and can be paired with an external softener if required.

The LED panel displays the tank and boiler temperatures, the status of the wash cycle and the main error codes. Four different washing programs allows you to perfectly tailor the performances of the machine to the items that need to be cleaned.

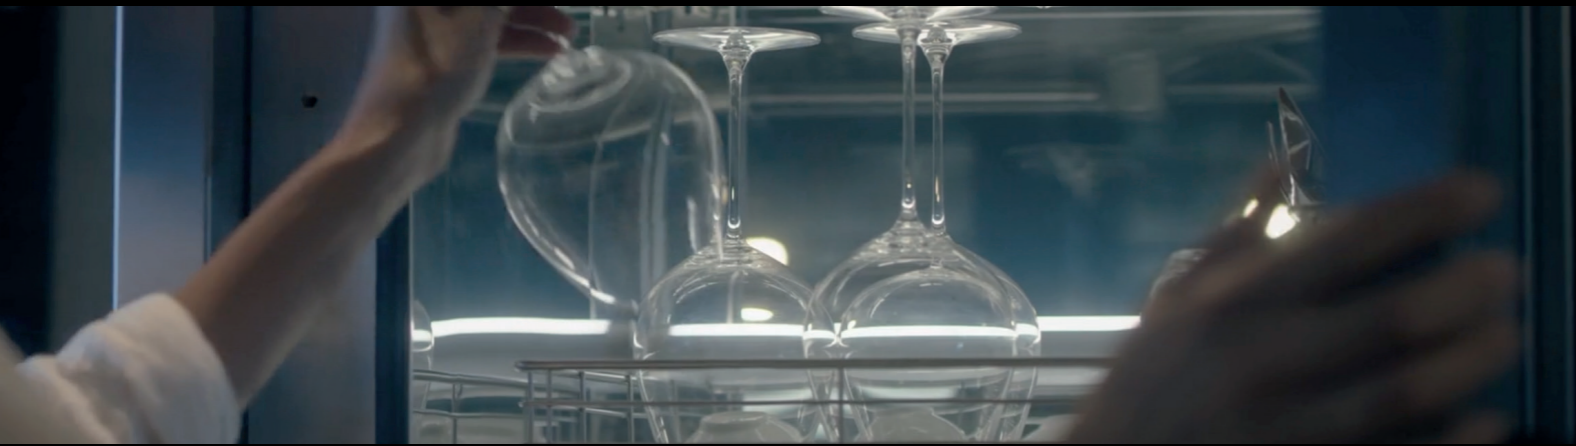

HT 11 T Series

The HT 11 hood-type dishwasher is ideal for bars, pubs, restaurants and hotels. This single skin machine offers high performance at a reasonable cost and can be paired with an external softener if required. The LED panel displays the tank and boiler temperatures, the status of the wash cycle and the main error codes. Four different washing programs allows you to perfectly tailor the performances of the machine to the items that need to be cleaned.

Utensil Washers

LP Series

The DIHR LP range features undercounter, front loading and hood-type models and does the job for you in full comfort, thanks to its ultra-low-sound level and minimal heat loss in the room. LP Utensil Washer line have a control panel with easy and intuitive functions. The high-level performance, quality materials, and versatility of the LP range reach levels that are hard to find on the market.

Undercounter Dishwashers

More and more business owners are realising the benefits of having a separate dishwasher that is only used for washing glasses. A glasswasher reduces both the amount of broken glasses and the need to manually polish the glasses. An essential appliance for busy bars and restaurants where hand washing is not an efficient solution, with fast wash cycles helping to provide a constant stream of clean glasses.
