Our transparent supply chain, offering only the highest quality of products.

Ingredients UK Limited is a family run business founded in 2013, with a combined 35 years' experience within the industry. We import and offer a distribution service supplying an extensive range of natural raw materials, functional ingredients & specialties, focusing on supplying, plant based, sustainable and ethically sourced ingredient options.

Our company was built on a strong ethos with a responsive and personal touch. This has enabled us to develop trusted relationships with our customers throughout the UK and round the world. Our office address is situated in rural West Berkshire, with our warehouse based in the east of the UK, within close proximity to major ports and access routes.

Inulin		

We believe that quality is the most important factor.

Ingredients UK Limited is committed to continuous improvement which is measured by monitoring key performance indicators within the business and by adhering to the British Retail Consortium (BRC) standards for Food Safety.

BRC Agents and Brokers provide a critical link in the movement and trade of products, and influence supplier product safety and quality standards, as well as being responsible for maintaining an effective chain of traceability.

The Global Standard for Agents and Brokers has been developed to provide a framework for managing product safety, quality and legality for non-manufacturing businesses in the food industry.

Ingredients UK Limited work directly with our GFSI accredited suppliers and manufacturers, who are all approved through our quality management system. Our commitment to sustainable development and ethical sourcing is also reflected in our involvement in platforms such as SEDEX.
