Spacevac International is the world's leading manufacturer of high-level cleaning and inspection systems.

Our range of innovative reach cleaning systems enable operators to clean from the safety of the ground, without the need for scaffolding or scissor lifts.

Our focus on customer driven solutions has seen SpaceVac widely adopted across a range of industries from food & drink manufacturing to leisure, education and retail. Our products are used by some of the largest companies in the world and are available internationally through a network of distribution partners.

Explore our range of solutions and be sure to book a free presentation. See for yourself the benefits SpaceVac systems can have on your business and cleaning regime.

#TeamSpaceVac

SpaceVac provides a safe and cost efficient method of cleaning up to 25m, all from the safety of ground level.

Our systems are ideal for the cleaning of walls, ceilings, ducting, pipework, window ledges, vents and other inaccessible high level areas where dust and other contaminants quickly settle.

Our range includes products for gutter cleaning, removing dust and other materials from internal areas and our world class systems for the removal of combustible materials in specialist combustible environments.

The introduction of SpaceVac reach cleaning systems presents cleaning teams and building managers with a number of distinct and valuable benefits...

Cleaning work becomes instantly safer by removing the need for working at height.

A SpaceVac system can be deployed in seconds with minimal impact to the surrounding area's - Less downtime = improved productivity and reduced costs

Removes the need to hire access equipment such as hydraulic lifts & scaffolding, saving businesses significant hire costs.

Fast ROI - typically paying for itself in as little as 4 weeks which adds up to substantial yearly savings.

Cleaning work can be completed faster without the restrictions of working in a lift basket. Increasing productivity whilst improving standards.

Improve indoor air quality, reducing the risk of respiratory issues by removing settled dust that can easily be re-circulated and become airborne again.

Market leading vacuum filtration as standard on all industrial vacuums.

Applications for SpaceVac:

Beams

Ducting

In internal environments, dust, dirt and combustible materials circulate and then settle and build up in inaccessible areas such as pipework, ledges, lighting and cable trays and on top of machinery and fittings.

This build up of contaminate presents not only a visual issue but also a safety issue; with increased risk of fire, explosion or cross contamination.

Walls

Ledges & Sills

Our range of brushes, cleaning tools and angle heads provide a flexible modular solution for cleaning all previously hard to reach area's.

Vents

Gutters

The external issue is that organic waste such as leaves, dirt, twigs and even nests can cause blockages in guttering and downpipes. Our heavy duty professional system breaks up and removes these blockages from the safety of the ground, before serious costs are suffered.

Some of our clients include...

# THE SPACEVAC RANGE:

Our range of reach cleaning systems provides options for operators to reach different heights or work in different operating environments. Compare the full range below:

A range of options for the removal of high-level dust and dirt from environments including hotels, cinemas, theatres, schools, warehouses, arenas, airports, museums & industry

**Reach:** 5m – 20m

- Internal **Lite** [38mm / 1.5"]
- Internal **Pioneer** [38mm / 1.5"]
- Internal **Classic** [38mm / 1.5"]
- Internal **Pro** [38mm / 1.5"]
- Internal **Ultra** [38mm / 1.5"]
- Internal **Museums Pack**

A selection of specialist and fully conductive poles, heads & tools for use removing combustible dust from C2D2 and combustible environments such as factories or food manufacturing facilities:

**Reach:** 5m – 20m

- Atex **Lite** [38mm / 1.5"]
- Atex **Pioneer** [38mm / 1.5"]
- Atex **Pro** [38mm / 1.5"]
- Atex **Pro** [50mm / 2"]
- Atex **Ultra** [38mm / 1.5"]

A durable selection of professional tools for the simple removal of blockages from the external guttering and downpipes found on domestic, industrial and commercial premises.

**Reach:** 5m – 15m

- External **Protex** [50mm / 2"]
- External **Lite** [50mm / 2"]
- External **Classic** [50mm / 2"]
- External **Pro** [70mm / 2.7"]
- **Universal** [50mm / 2"]

Our accessory lines are sourced and designed to handle those awkward challenges as well as making our systems even easier to use.

- Vacuums
- **Pathfinder** Camera & Monitor system
- **ATEX Ex-plorer** Camera & Monitor
- **Spacesuit**
- Floor & Under racking conversion kits
- Oven kits

**Systems designed to provide cleaning on demand, and to improve your working environment...**

Capable of reaching over 25m in height, our Carbon Fibre internal cleaning poles 'click lock' to safely reach and clean inaccessible high level areas such as walls, ceilings, vents, ducting, windowsills and all high architecture..

Manufactured in the UK, all systems comes fully equipped with a full range of brushes and angled cleaning heads for the easy removal of dust and dirt from a wide range of areas.

The Internal range is a fast, convenient and cost efficient way to instantly improve the aesthetics of facilities, as well as reducing the risk of respiratory issues and other health concerns relating to sick building syndrome.

**NEW - Endeavour Industrial vacuums**

Manufactured to our exacting specifications and designed to provide the perfect partner to any of our reach cleaning systems, our Endeavour internal vacuums offer market leading filtration and powerful cleaning performance..

**The Internal Range Compared:**

	No of Poles	Pole Diameter	Reach	Pole Length	Heads	Tools	Brushes
Internal <b>Lite</b>	3	38mm/1.5"	5.75m	1.25m	1	0	3
Internal <b>Pioneer</b>	3.5	38mm/1.5"	6.6m	1.6m	3	1	3
Internal <b>Classic</b>	5.5	38mm/1.5"	9.8m	1.6m	4	1	4
Internal <b>Pro</b>	7.5	38mm/1.5"	13m	1.6m	4	1	4
Internal <b>Ultra</b>	9.5	38mm/1.5"	16m	1.6m	4	1	4

**Features & Benefits:**

- ✓ Designed and manufactured in the UK
- ✓ Add extra poles to reach over 20m
- ✓ Compatible with most vacuums - including backpack vacs
- ✓ Full range of accessories and add-ons including wireless camera system.

**Suitable for Use In:**

Warehouses, airports, theatres, cinemas, schools & colleges, hospitals, museums, hotels, shopping centres, conferences centres, places of worship, offices and more.

**Whats Included: The Internal Range**

**Internal 38mm Lite**

3 cleaning poles, 1 x angled cleaning head, 3 x cleaning brushes, hose adaptor.

**Internal 38mm Pioneer**

3.5 cleaning poles, 1 x angled cleaning heads, 3 x cleaning brushes, hose kit.

**Internal 38mm Classic**

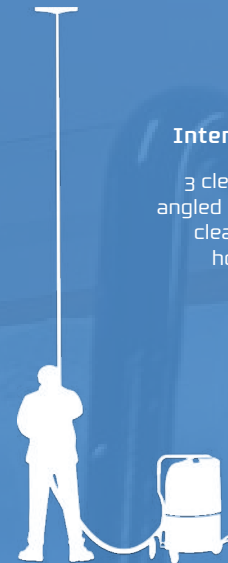

5.5 cleaning poles, 4 x angled cleaning heads, 5 x cleaning brushes/tools, hose kit.

**Internal 38mm Pro**

7.5 cleaning poles, 4 x angled cleaning heads, 5 x cleaning brushes/tools, hose kit.

**Internal 38mm Ultra**

9.5 cleaning poles, 4 x angled cleaning heads, 5 x cleaning brushes/tools, hose kit.

**Durable solutions for the cleaning and maintenance of external guttering and downpipes...**

Given their constant exposure to the elements, external guttering and downpipes can quickly become clogged and blocked with leaves, dirt and other organic material - causing leaks, structural damage, impacting the health of inhabitants and in some cases even leading to the refusal of insurance. Our external gutter cleaning system is a powerful tool for the fast and easy removal of waste such as leaves, pine needles and moss that can quickly build up in guttering and downpipes.

Manufactured in the UK, The system is built around wider 50mm or 70mm poles to allow greater airflow when removing heavy organic waste. The system is equipped with a range of durable stainless steel gutter cleaning tools for cleaning industrial, commercial and domestic properties.

External 70mm Pro cleaning system and Saturn petrol vacuum in action

**The External Range Compared:**

	No of Poles	Pole Diameter	Reach	Pole Length	Heads	Tools	Brushes
External <b>Protex</b>	4.5	50mm/2"	7.3	1.4	1	1	0
External <b>Lite</b>	3.5	50mm/2"	7.3m	1.25m	1	2	0
External <b>Classic</b>	6.5	50mm/2"	11.4m	1.4m	1	4	0
External <b>Pro</b>	6	70mm/2.7"	9.4m	1.6m	1	4	0
<b>Universal</b>	6.5	50mm/2"	11.4m	1.6m	5	5	4

**Features & Benefits:**

- ✓ Designed and manufactured in the UK.
- ✓ Add extra poles to reach over 20m.
- ✓ Compatible with any appropriately rated wet/dry vac.
- ✓ Full range of accessories and add-ons including wireless camera system.

**Suitable for Use In:**

Any industrial, commercial or domestic property with external guttering, downpipes, valley's and hoppers.

**Whats Included: The External Range**

**External 50mm Lite**

3.5 cleaning poles, pole bag, 135 degree cleaning head, 2 spike tools, hose to pole adaptor, hose to vac cuff, hose bag.

**External 50mm Classic**

6.5 cleaning poles, pole bag, 135 degree cleaning head, round tool 2 spike tools, crevice tool, hose to pole adaptor, hose to vac cuff, hose, hose bag

**External 70mm Pro**

6 cleaning poles, pole bag, 70mm 135 degree cleaning head, adaptor, round tool 2 spike tools, crevice tool, hose to pole adaptor, hose to vac cuff, hose, hose bag

**Universal 50mm**

6.5 cleaning poles, pole bag, 135 degree cleaning head, round tool 2 spike tools, crevice tool, 4 x 38mm angled cleaning heads, 5 x 38mm cleaning brushes hose to pole adaptor, hose to vac cuff, hose, hose bag

**External 50mm Protex**

4.5 cleaning poles, pole bag, 135 degree cleaning head, 1 spike tool, hose to pole adaptor.

## Conductive options for cleaning in combustible environments...

Cleaning in specialist combustible areas (such as C2D2 designated facilities) requires specialised equipment to ensure the safety and wellbeing of staff and property. Failure to adequately clean in these areas increases the risk of fires or explosions, with insurance also being invalidated if damage occurs where a proper cleaning regime is not documented.

Manufactured in the UK, our 100% Carbon **ATEX** range is a fully conductive cleaning system, marked as safe for use for the removal of combustible dusts such as wood, flour, sugar and paper. The system is independently certified to meet the NFPA regulations and is safe for use in these explosive atmospheres..

The system is fully accessorised with a range of conductive and anti-static accessories for removing explosive waste from inaccessible areas such as vents, ducting, pipework, walls, ceilings, electrical trays etc.

In addition, our new **TITAN** and **MERCURY** vacuums offer users powerful cleaning options for removing combustible dust and waste in conjunction with our reach cleaning systems.

## The Specialist Range Compared:

	No of Poles	Pole Diameter	Reach	Pole Length	Heads	Tools	Brushes
Atex <b>Lite</b>	3	38mm/1.5"	4.5m	1.25m	2	1	1
Atex <b>Pioneer</b>	3.5	38mm/1.5"	6.6m	1.6m	3	2	1
38mm Atex <b>Pro</b>	5.5	38mm/1.5"	9.8m	1.6m	3	2	2
50mm Atex <b>Pro</b>	6.5	50mm/2"	11.4m	1.6m	4	3	1
Atex <b>Ultra</b>	9.5	38mm/1.5"	16m	1.6m	4	2	2

### Features & Benefits:

-  Designed and manufactured in the UK
-  Add extra poles to reach over 20m
-  Compatible with **ATEX certified** vacuum cleaners (see page 18)
-  Full range of accessories and add-ons including **ATEX Explorer** camera system.

### Suitable for Use In:

Woodshops, factories, food and drink processing, bakeries, laundries, mills, textiles, manufacturers, areas used in the manufacture of paper, plastic and card.

Watch our video for more...

ATEX Pro 38mm cleaning system in action

## Whats Included: The Specialist Range

**Atex 38mm Lite**

3 cleaning poles, pole bag, 2 x angled cleaning head, 2 x cleaning brushes, hose kit, mesh bag,

**Atex 38mm Pioneer**

3.5 cleaning poles, pole bag, 3 x angled cleaning heads, 3 x cleaning brushes/tools, hose kit, mesh bag,

**Atex 38mm Pro**

5.5 cleaning poles, pole bag, 4 x angled cleaning heads, 4 x cleaning brushes/tools, hose kit, mesh bag.

**Atex 50mm Pro**

6.5 cleaning poles, pole bag, 4 x angled cleaning heads, 4 x cleaning brushes/tools, hose kit, mesh bag.

**Atex 38mm Ultra**

9.5 cleaning poles, pole bag, 4 x angled cleaning heads, 4 x cleaning brushes/tools, hose kit, mesh bag.

\* Atex cleaning is a **specialist activity** that requires the correct equipment and training to avoid injury, damage to property and risk to life. Please be sure to consult an expert before beginning work in these areas for the first time.

12. SpaceVac: The World's Leading High Level Cleaning System!

Find Out More: [spacevacinternational.com](http://spacevacinternational.com) | @spacevac\_UK .13

## A Solution for World of Cleaning Problems...

Our SpaceVac systems can be accessorised with many tools to make the job of high level or hard to reach dust decontamination possible and easier. The 'click lock' modular nature of our systems are unique and offer the ultimate flexibility for users to design and build their own solution to local problems.

Contact SpaceVac if you have a problem that is causing you operational concerns and let's see if together we can solve the issue.

Be sure to browse our website at [spacevacinternational.com](http://spacevacinternational.com) to check out the full range of additional products that are available.

## Camera / Monitoring Systems:

SpaceVac offers two advanced camera and monitoring solutions designed to give operators real-time visibility during reach cleaning and inspection tasks. These systems improve accuracy, confidence, and efficiency by allowing users to see exactly what is happening in hard-to-reach areas, both during and after cleaning.

The **SpaceVac Pathfinder** is a lightweight, versatile camera system suitable for internal and external cleaning applications, while for hazardous and regulated environments, the **SpaceVac Ex-Plorer Extreme** offers an ATEX-rated solution designed for use in areas where combustible dust or explosive atmospheres may be present.

### Explorer Benefits

- **Assists & guides user to clean effectively and efficiently.**
- **Records 'before & after' for audit purposes.**
- **Use for 'dust' inspections to tailor your hygiene schedule**
- Featuring full **360 degree rotation** and a new ergonomic form factor
- Record footage in **1080p** and **take 12mp stills** in real time!
- Up to **NINE HOURS** performance from a single charge!
- Durable **waterproof** case and connection points
- Allow for **remote access** to streams from offsite at any time
- **ATEX Certified** version available for use in ATEX rated combustible environments.

## SpaceSuit:

The Spacesuit is an exciting addition to the SpaceVac range, specifically designed for use with our reach cleaning systems, making even prolonged use of our technology a breeze!

The SpaceSuit is designed to support and spread the weight of the SpaceVac system, making it even lighter and easier to work with!

The weight of the total system is distributed across the back and shoulders of the operator. This 'load' spreading reduces the operating weight of the poles in hand to almost nothing, light enough to lift the entire pole system with just one finger!

**LIGHT just got LIGHTER...**

### INTERNAL Vacuums

The **ENDEAVOUR** range presents a range of industrial vacuums for the removal of dust and dirt from internal areas.

**Ideal for use in:** Retail, education, Leisure & tourism, Warehousing & Logistics, FM/BSC, Medical & Pharma and more...

Specifications		Endeavour 2 Portable	Endeavour 2 Commercial	Endeavour 2 Industrial
Voltage	V - Hz	110/230	110/230	110/230
Power	kW	1.15	2.3	3.45
Amps	A	(110) 8 / (230) 5	(110) 16 / (230) 10	(110) 20 / (230) 15
Max air flow	m <sup>3</sup> /h / CFM	180 / 106	360 / 212	360/212
Suction inlet	mm	50	80	50
Noise level [EN ISO 3744]	dB(A)	74	76	76
Tool Holders		No	38mm	38mm

### External Vacuums

The **NEPTUNE** range offers a number of powerful wet/dry industrial vacuums for the removal of blockages and waste from guttering and downpipes.

**Ideal for use in:** Retail, education, Leisure & tourism, Warehousing & Logistics, FM/BSC, Medical & Pharma and more...

Neptune 3

Specifications		Neptune 3
Voltage	V - Hz	110/230
Power	kW	3.45
Amps	A	(110) 20 / (230) 15
Max air flow	m <sup>3</sup> /h / CFM	540 / 318
Noise level [EN ISO 3744]	dB(A)	76
Tool Holders		Tools Only

Titan 1 Portable

Titan 2

## ATEX Vacuums

The **TITAN** range presents a range of industrial vacuums for the removal of dust and dirt from internal areas.

**Ideal for use in:** ATEX certified areas including Woodshops, Bakeries, papermills, Food processing facilities, manufacturing facilities, storage silos, construction areas and many more.

Specifications		Titan 1 Portable	Titan 2
Atex zones		Internal Z20/ External Z22	Internal Z20/ External Z22
Voltage	V - Hz	110/230	110/230
Power	kW	1.15	2.3
Amps	A	(110) 5 / (230) 8	(110) 16 / (230) 10
Max air flow	m <sup>3</sup> /h / CFM	180 / 106	360 / 212
Suction inlet	mm	50	80
Noise level [EN ISO 3744]	dB[A]	74	76
Tool Holders		No	38mm/50mm

Mercury 1 Portable

Mercury 2

## ACD Vacuums

The **MERCURY** range presents a range of industrial vacuums for the removal of combustible dust from non-combustible areas.

**Ideal for use in:** Woodshops, Bakeries, papermills, Food processing facilities, manufacturing facilities, storage silos and more.

Specifications		Mercury 1 Portable	Mercury 2
EX Category		CE ACD	CE ACD
Voltage	V - Hz	110	110
Power	kW	2.3	2.3
Amps	A	16	16
Max air flow	m <sup>3</sup> /h / CFM	360 / 212	360 / 212
Suction inlet	mm	50	80
Noise level	dB[A]	74	74
Tool holders		No	38mm/50mm

## SPECIALIST Vacuums

In environments where precision, safety, and reliability are critical, our range of specialist vacuum solutions delivers high-performance cleaning you can depend on. Designed for demanding applications, these systems support safe, effective removal of dust, debris, and hazardous materials across a wide range of industries, while meeting the highest safety and performance standards.

### Cleanrooms & Pharmaceuticals

Engineered for controlled environments, these vacuums feature HEPA / star filtration to capture ultra-fine particles. Ideal for pharmaceutical manufacturing and biotechnology, they help maintain contamination-free conditions and support compliance with strict industry regulations.

### Laboratories & Precision Cleaning

For laboratories requiring meticulous cleanliness, our vacuums enable the safe removal of dust, debris, and chemical residues without risking contamination or damage to sensitive equipment. Built for accuracy and durability, they enhance safety and productivity in research, electronics, and advanced technology environments.

### Data Centres

Data centres rely on clean, static-free conditions to protect critical infrastructure. Our specialist vacuums safely remove fine dust and electrostatic particles, helping prevent downtime and maintain the performance of sensitive servers and hardware.

### Heavy Duty & Industrial Applications

For factories and manufacturing environments, we offer powerful vacuum systems capable of handling heavy debris, oils, and industrial waste. Designed for tough conditions, these machines help maintain safety standards while keeping operations running efficiently.

### Hazardous Materials & Gases

In industries such as metalworking and chemical processing, our specialist vacuums safely manage metal particles and volatile substances using advanced filtration and explosion-protected designs.

### The Range You Can Trust

From precision laboratories to heavy industry, our specialist vacuums deliver dependable performance, durability, and compliance where it matters most.

Pharma

Metal
