

KARRY 
FOOD INDUSTRIES

About Us

Our factory is strategically located in Sadat City, occupying an expansive area of 50,000 SQM . This facility has been meticulously designed to comply with European Union standards, ensuring that our production processes meet the highest quality and safety benchmarks. We utilize state-of-the-art technology from CFT, Italy, which enhances our operational efficiency and product quality.

As an export-oriented establishment, KARRY Food Industries is committed to delivering premium products to international markets, thereby contributing to global food industry standards and fostering international trade relationships.

Our emphasis on innovation and compliance underscores our dedication to excellence in every aspect of our operations.

Our Factory

A world-class Saudi Arabian manufacturer with a team that holds a solid technical base and a strong potential for growth as a global exporter. KARRY Food Industries is a leading Egyptian producer of Tomato Paste, Juice Concentrates, Fruit Purées and Fruit pulps.

The first phase of the production line, which has been installed and is currently operating, has a capacity of 600 MT/Day and utilizes state-of-the-art technology from CFT/Italy.

Second phase - Q4 2025 installing a second processing line capacity 1000 ton/day. This line will be mainly for processing Tomato Paste. **Bringing our capacity of Tomato to 1600 MT/Day.**

Third phase - Q4 2025

Will be featuring a citrus processing line with a capacity of 1000 MT/day.

KARRY Food Industries is export oriented factory.

Tomato Paste

Average Value (Measured at 20 C)	Chemical Specification	Average Value (Measured at 20 C)

Agriculture

 **KARRY Food Industries takes pride in owning its agricultural land, which allows us to cultivate our own Tomatoes and Fruits. We carefully manage every aspect of the cultivation process, ensuring that we maintain rigorous oversight from the initial planting stages all the way through to the delivery of fresh tomatoes and fruits to our production facilities.**

 **Our agricultural operations are strategically located across several regions to optimize crop yield and quality. Specifically, we cultivate winter crops in Menia and Esna, while our summer crops are grown in El Hamam, Sadat, and the West Delta.**

 **This diversified approach not only enables us to maximize our production capacity throughout the year but also ensures that we can consistently provide high-quality, fresh produce for our manufacturing processes. By controlling the entire supply chain, we reinforce our commitment to excellence and sustainability in the food industry.**
