IFE27 SHELL SCHEME SPECIFICATION

WALLS

The shell scheme white wall structure comprises of 2.5m high extruded aluminium posts and beams which enclose 3mm thick white Foamex panels. Each post has an octagonal cross section and measures 40mm in diameter, whilst connecting beams feature a rectangular cross section of 16mm width and 70mm height.

It is essential that these dimensions are taken into consideration if building an interior to the shell scheme or ordering internal graphics. Please contact **Showlite** for any exact dimensions or calculations required for a specific stand.

- ***The graphic panel size is 950mm x 2340mm (Width x Height)***
- ***Half panel size is 455mm x 2340mm (Width x Height)***

For any questions regarding graphics please contact Showlite.

The panels are non-loadbearing, but lightweight display material may be attached to them. The preferred method of fixing is Velcro or sticky tabs, or by other means that do not damage the panels in any way. **In the event that damage occurs, Showlite may charge the stand holder for the full panel price.**

ELECTRICS

All shell scheme stands will be supplied with the following electrical packages, as per your stand size:

Up to 5.9m²	2 x LED Spotlights
6 – 20 m²	1 x 500watt socket & 2 x LED Spotlights
20.1 – 26 m²	1 x 500watt socket & 4 x LED Spotlights
26.1 – 36 m²	1 x 500watt socket & 6 x LED Spotlights

The organisers have arranged for exhibitors to request 24-hour supply on their socket free of charge. **Please note you will need to let Showlite know what you are running off the sockets and whether a 24-hour supply is required, otherwise the power will be switched off 15 minutes after the show closes each day.**

If you require any additional electrics, you can order these by clicking here.

NAMEBOARD

The nameboard will display the name as it appears on your contract; please let the Organisers know if you require a nameboard change by Monday 15th February 2027. Any changes requested after this deadline or onsite will incur a cost of £100 + vat. It is helpful for visitors if the company name on the stand is the same as the catalogue entry.

FASCIA

Stands will feature white quad posts with no colour cladding. The fascia nameboard will be the only coloured element and will be fitted to each open side of the stand. Each open side will hold a nameboard with your company name in Title Case text, stand number and our section icon, please note there is a 30-character limit per nameboard. Please note that nameboards will be mounted directly onto the front fascia beams and will not be suspended below them.

FLOORCOVERING

- **Grey carpet** will be laid direct to the floor.
- **No platforms are provided with shell scheme stands**. However, if you are ordering services such as water & waste, mains gas or heavy-duty electrics, the Organisers highly recommend laying a platform direct to the hall floor.

NB: No refund will be given to any exhibitor who decides to provide their own floor covering to shell scheme stands.

CEILING

All shell schemes feature a ceiling grid where lighting may be placed. This is once again non weight bearing but lightweight fixtures may be attached to it.

The distance from the floor the ceiling grid is 2430mm.

Shell Scheme Extras

Showlite offer a range of shell scheme extras; please click here to view the range and order any items.
