CAD+T

Software for Interior Design and Production
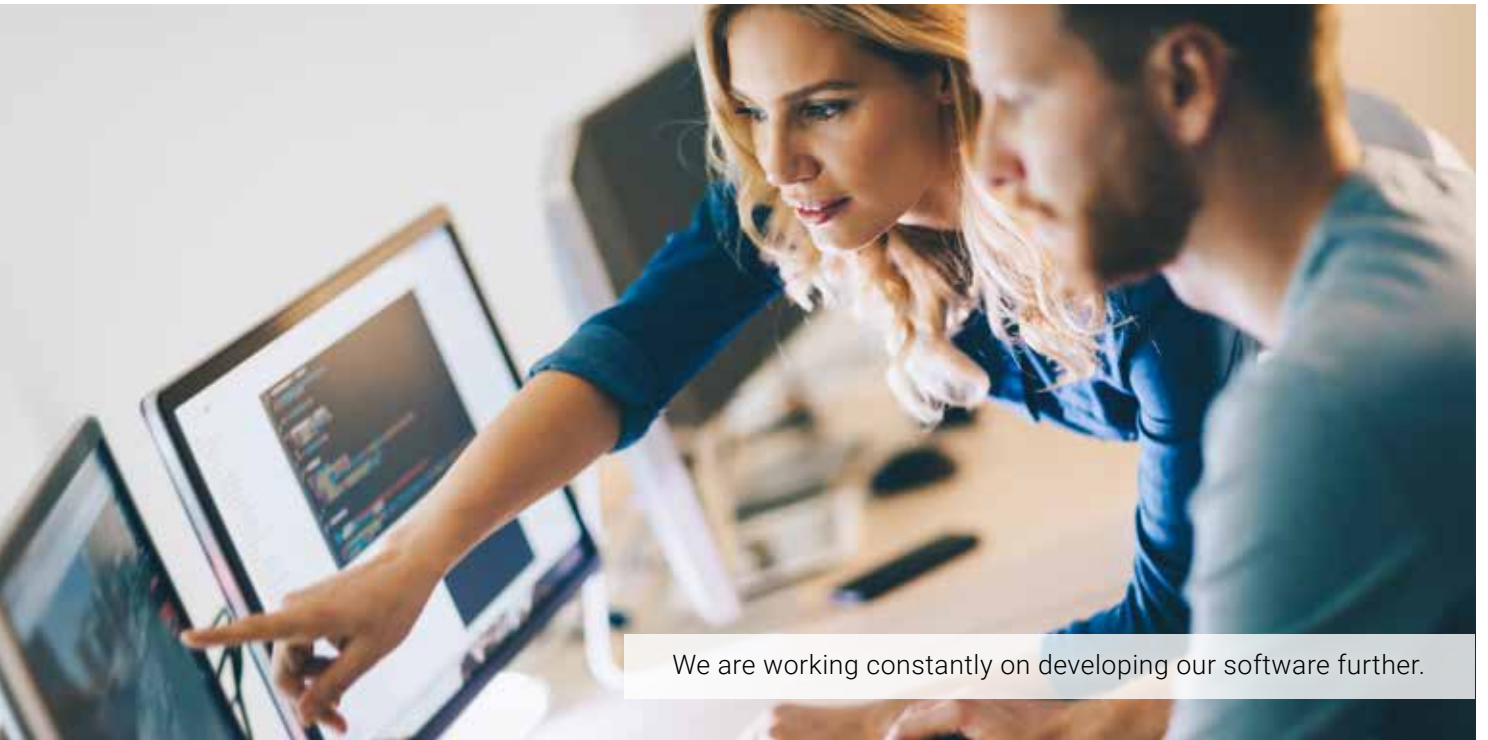

Web Solutions

TOGETHER PREPARED FOR THE FUTURE

"WE SUPPLY DIGITAL SOLUTIONS AND EFFICIENT PROCESSES TO ENABLE CUSTOMERS, BEING TOP OF THEIR INDUSTRIES."

We are working constantly on developing our software further.

PROFESSIONAL SOFTWARE

ALL-IN-ONE SOLUTION

PERSONAL CONSULTATION

CERTIFIED COMPANY

Enter into the new era of digitization and optimize your processes to the maximum. Whether you are an interior designer, joinery, shopfitter or exhibition stand designer.

As one of the leading companies in the digital furniture industry we know that we need to continuously invest in research and development. Only through constant pushing of our skills in technology to the limit and with our mission of creating innovations we are able to adapt and develop new efficient solutions for the changing needs of our customers. At CAD+T we have the best trained employees who have a high level of industry knowledge and experience so we can guarantee a successful and smooth implementation of the software in your company.

THE PRODUCT RANGE

DESIGN
Quick and easy 3D-designs including walls, doors, windows and cabinet configurator.

VISUALIZE
Create high-end renderings, 360° panoramas, videos and VR. Live-sync to design module available.

CONFIGURATOR
Ideal solution that simplifies the generation of data to takeover directly into either engineer classic or professional.

ENGINEER
3D CAD design software for individual designs. Automatically place hardware, create part lists, hardware lists and more directly out of the drawing.

CNC
Data transfer in consideration of material and manufacturing methods. Export CNC programs with our solutions, for nesting and up to 5-axis.

WEB SOLUTIONS
Full solutions from cloud based data management and licencing services to customizable online shops and e-commerce applications.

ERP
Plan, control and manage resources such as employees, materials and more. Optimize and organize your workflows.

AUTODESK®
Complete your ideas with various Autodesk® products, such as AutoCAD®, Inventor®, Vault® or Revit® for architecture using and BIM data.

CONSULTING
Our team guides and supports you in developing strategic goals, optimizing workflows, receiving subsidies and more.

HARDWARE
In addition to our software portfolio, we supply you with suitable hardware from HP® and complete RFID solutions for your production.

Web Solutions

Manage your data with EOS Docs and expand your sales channels with an Online Shop or E-Commerce solution.

EOS Docs

CAD+T EOS Docs is the perfect tool to store your data safely in the cloud. Your files (drawings) are backed up and versioned. Thereby you have access to all versions of your data. In addition, you manage your sales orders, material masters, license access and your CAD system settings can also be organized via CAD+T EOS Docs. The perfect tool if you want to share data and licences with your team or freelancers independent of their work location.

Online Shop

The perfect sales tool for your company. Expand your sales channels and offer your customers the possibility to configure and order your products quickly and easy directly from your online store on your website. There is also the possibility of ordering e.g. panels cut to size. It includes a direct connection to your CAD+T Construction Engineer Classic module, which allows you to process the orders from your online shop seamlessly.

E-Commerce

The CAD+T E-Commerce application can be used as a sales tool for your own sales team as well as an online store for your partners or directly by the end user. In connection with CAD+T EOS you can easily handle products, generate information at a single point and publish the data customised to each user. Choose from a wide range of options and increase your online sales volume!

EOS Docs Highlights

Cloud-based application

Secure data management

Save drawings centrally and versioned

Central material master

Easy management of CAD+T licenses

And much more...

Online Shop Highlights

Pre-built templates customized to your needs

Automatic price generation

Various payment methods

Automatic connection to your CAD+T Construction Engineer module

Hosting and technical maintenance by CAD+T

And much more...

E-Commerce Highlights

Using data from CAD+T EOS

User interface adaptable to your process

Dynamic 2D and 3D product preview created instantly

Managing different access rights for different target groups

Integration option for existing ERP and CRM systems

And much more...

ERP Cloud Products

NEW!!

Manage and integrate business processes through your system, decide which product suits you and your business best.

With the cloud-based ERP solution you are always up to date. This software solution allows you to work locally or remote and offers an automatic backup as well. With the central data management you have live connection to the data of your suppliers - meaning automatic price updates, availability of your articles and much more.

EOS Technical Highlights*

Including all functions of EOS Docs

Automatic parts list import from the CAD program

Management of production orders including revisions and versioning

Standard reports e.g. BOM, cutting list, hardware list, ...

1D + 2D cutting optimization (bars and panels)

* Only available as SaaS

EOS Professional Highlights*

Including all functions of EOS Docs and EOS Technical

Configurator with production know-how

Price and cost calculations e.g. production cost, ...

Customizable reports e.g. BOM, cutting list, hardware list, ...

Mobile time recording of different resources

Live 3D preview of your design

* Only available as SaaS

EOS Enterprise Highlights

Including all functions of EOS Technical and EOS Professional

Automated drawing generation

Drawing connection of CAD+T Construction Engineer Classic/Prof.

RFID-Integration

Available as cloud or perpetual license

On-premise installation possible
