

## ANCILLARY PRODUCTS

Anker Stuy Coatings provides a range of ancillary products, complementing our coatings with a complete finishing system. These products are an important addition to our recommended process and will help to ensure the success of your spray finishing.

**98-RAL-K7**

**RAL K7 Classic Colour Chart**

The RAL chart K7 CLASSIC includes 215 colour swatches offering a simple 4-digit colour code system for easy selection.

**98-Gloves-L**

**ASAP Exam Glove Nitrile X-Thick Black**

Box of 100 high quality powder free examination gloves (black) available in LARGE and XL.

**98-Sponge-P180**

**Mirka® Sanding Sponge 2-sided 98x120x13mm**

Sanding sponge with a soft foam plastic core, grains on two sides. Used for sanding profiled and rounded surfaces, including window frames.

**98-Goldflex**

**Mirka® Goldflex Soft 115x125mm perforated roll**

The soft and flexible Goldflex Soft has been developed for sanding profiled surfaces and irregular, difficult-to-reach details by hand.

**98-Gold-150**

**Mirka® Gold 150 mm**

This durable, all-round abrasive is very well suited for high-speed sanding in a multitude of applications. Available in 240, 340 and 400 grit.

**98-Tape**

**Mirka® Tape**

High-grade masking tape suitable for water and solvent-based paints, with easy application on uneven surfaces. Available in 36mm & 48mm width.

**98-Guide-Coat**

**Mirka® Dry Guide Coat Black 100g**

Black Dry Guide Coat used for light colour surfaces. Dry Guide Coat with excellent covering properties. The powder makes all imperfections and scratches visible.

## INTERIOR COATINGS

Ankocryl Interior water-based wood coatings offer a modern and eco-friendly solution for enhancing and protecting your wooden surfaces. With their low VOC content, these coatings minimise environmental impact and promote healthier indoor air quality. They provide excellent durability, resisting scratches, stains, and fading while retaining the natural beauty of the wood.

## SINGLE COMPONENT

The Ankocryl Waterbased Interior PU Topcoat line is based on a blend of self-crosslinking acrylic and polyurethane dispersions. This blend has been chosen to allow for the optimum balance of properties such as chemical resistance, scratch resistance as well as resistance to impact and tannin blocking. This is a single component reactive coating without the downsides of a true 2-pack system, for instance mixing with a hardener, a limited potlife and flammable material related storage concerns.

Furthermore the latest available technology gives the best chemical resistance against known aggressive household chemicals such as coffee, blackcurrent cordial, red wine and alcohol on both dark, pastel and white shades.
