

We are CAD+T

"We supply digital solutions and efficient processes to enable customers, to be the top of their industries".

CAD+T is a leading international software company with more than 30+ years of experience supplying complete CAD/CAM & ERP software solutions for the interior design and production business, specialized in bespoke furniture. Whether you are a joiner, cabinetmaker, shop fitter or an exhibition booth builder, individual design requires individual solutions – that's what CAD+T stands for.

From design and visualization up to production with direct connection to CNC/Nesting machinery and a complete ERP system, CAD+T covers all the needs of a furniture manufacturing company and enable efficient and productive working methods.

Benefit from the latest innovations in cloud technology, configurator and contactless parts tracking via RFID technology. Moreover, the company provides webinars, online trainings, consultations in machinery, hardware investments, quality and process management, communication and HR development.

CAD+T is a family owned business and its goal is to satisfy the customer's needs in the best possible way!
