

Software for Interior Design and Production

RFID-Part tracking

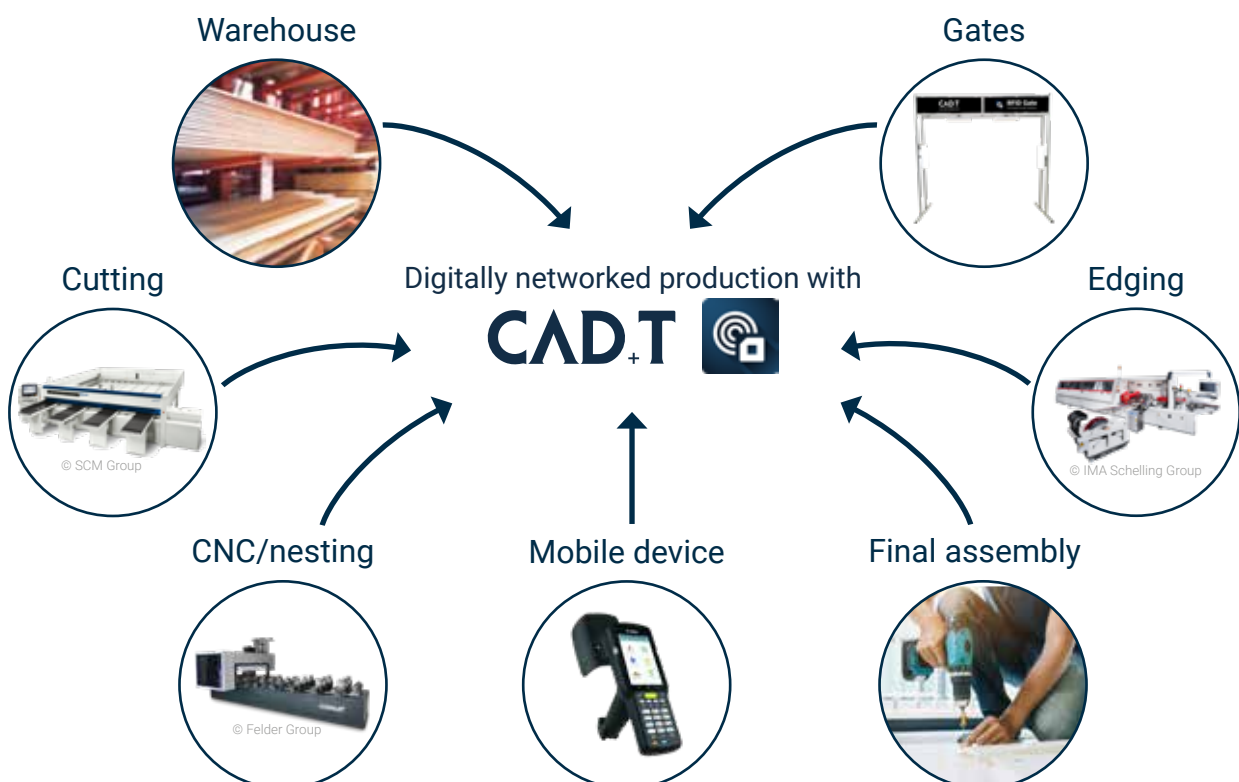

Digitally networked production - with solutions from CAD+T

BENEFITS - DIGITAL PRODUCTION

- + Continuous precise part tracking for your interconnected production
- + Knowledge of presence and absence of all parts in each production area at any time
- + Live status of each part in the factory
- + Time and cost savings due to optimized process and material efficiency
- + Completeness of all parts of your production order
- + Flexibility, planning and control of all resources (human, machinery, material)
- + Measurable processes within bespoke manufacturing
- + All parts just in time at the right place
- + Know deviations of planned workflow in time
